1. Are language models intelligent enough for entrepreneurial work? A language-centered perspective

中文标题: 语言模型足够智能以胜任创业工作吗?基于语言中心视角的探讨

Authors / 作者: Stratos Ramoglou, Liang Shang, Yanto Chandra, Jeffery S. McMullen

DOI: 10.1016/j.jbusvent.2026.106589 Published / 发表日期: 2026-05-01

Fields & Theories / 领域与理论:

- 领域: 创业学, 数字创新, 人工智能
- Theories: Philosophy of Language, Entrepreneurial Judgment, Turing Test
- 理论: 语言哲学, 创业判断, 图灵测试

Abstract / 摘要:

Large Language Models (LLMs) are poised to fundamentally reshape entrepreneurial work, but it remains unclear whether this technology can support judgment-intensive entrepreneurial tasks. Prevailing skepticism holds that LLMs are inherently unreliable for such deep augmentation because, despite their language competence, they do not think. In contrast, we draw on Ludwig Wittgenstein and Alan Turing to advance a language-centered perspective on entrepreneurial work. Wittgenstein demystifies

thought as linguistic activity and treats reasoning and understanding as linguistic abilities exercised in thinking. Extending this stance to the domain of machine intelligence, Turing grounds claims about intelligence in testable performances of language use. Together, they enable us to (1) conceptualize LLMs as an epistemic technology whose linguistic competence may suffice for the deep augmentation of entrepreneurship and (2) reorient research from skepticism toward fine-grained Turing tests of entrepreneurial work. We illustrate and support the language-centered perspective through two studies on crafting effective entrepreneurial narratives, a judgment-intensive task. Initially, we document that the LLM competently blends expert rhetorical strategies to create and refine narratives that effectively align with stakeholder needs. We then experimentally demonstrate that, when coupled with stakeholder-guided iterations, LLMs produce measurable improvements in narratives tailored to distinct stakeholder priorities. More broadly, our rethinking of entrepreneurial work through language-centered lenses helps theoretically support bold predictions about what entrepreneurs can accomplish with a nonhuman intelligence that has “only” mastered human language.

大语言模型(LLMs)有望从根本上重塑创业工作,但目前尚不清楚该技术能否支持判断密集型的创业任务。普遍的怀疑观点认为,由于LLMs尽管具备语言能力但并不思考,因此在进行此类深度增强时本质上是不可靠的。相比之下,我们借鉴路德维希·维特根斯坦和艾伦·图灵的观点,提出了关于创业工作的语言中心视角。维特根斯坦将思维去神秘化为语言活动,并将推理和理解视为在思考中行使的语言能力。将这一立场扩展到机器智能领域,图灵将关于智能的断言建立在可测试的语言使用表现之上。两者结合使我们能够:(1)将LLMs概念化为一种认知技术,其语言能力可能足以实现对创业的深度增强;(2)将研究方向从怀疑论转向针对创业工作的细粒度图灵测试。我们通过两项关于撰写有效创业叙事(一项判断密集型任务)的研究,阐释并支持了语言中心视角。首先,我们证明了LLM能胜任地融合专家修辞策略,以创作和完善有效契合利益相关者需求的叙事。随后,我们通过实验证明,当结合利益相关者引导的迭代时,LLMs在为不同利益相关者优先级量身定制叙事方面产生了可衡量的改进。更广泛地说,我们通过语言中心视角对创业工作的重新思考,为关于创业者利用“仅”掌握了人类语言的非人类智能所能成就的事业的宏大预测提供了理论支持。

- **领域:** 创业学, 区域经济学, 数字基础设施
- **Theories:** Agglomeration Economies, Network Effects
- **理论:** 集聚经济, 网络效应

Abstract / 摘要:

We study whether advanced computing infrastructure catalyzes entrepreneurship by exploiting the staggered establishment of China's National Supercomputing Centers (NSCs) from 2007 to 2022. We find that NSCs significantly increase local new firm entry by strengthening network effects, attracting skilled labor, improving capital allocation, and intensifying government support. Importantly, these effects are conditional on local market environments, depending on computing demand, capacity to convert public computing resources into practical use, and the degree of competitive activation. We also note that while NSCs contribute to narrowing the coastal-inland entrepreneurship gap, their benefits appear to be uneven within inland regions, being more concentrated among highly skilled individuals and attenuated in markets dominated by leading incumbents.

本研究利用2007年至2022年中国国家超级计算中心(NSCs)交替建立的背景,探讨先进计算基础设施是否能催化创业活动。研究发现,国家超算中心通过增强网络效应、吸引高技能人才、优化资本配置以及强化政府支持,显著增加了当地新企业的进入。重要的是,这些效应取决于当地的市场环境,包括计算需求、将公共计算资源转化为实际应用的能力以及竞争激活程度。研究还指出,虽然国家超算中心有助于缩小沿海与内陆地区的创业差距,但其收益在内陆地区内部呈现不均衡分布,更多集中在高技能人群中,且在由领先在位企业主导的市场中效果有所减弱。

3. Debiasing entrepreneurial careers: A field experiment on female role model effects on entrepreneurial self-efficacy and early-stage career choices

中文标题: 消除创业职业偏见:关于女性榜样对创业自我效能感和早期职业选择影响的实地实验

Authors / 作者: Laura Bechthold, Laura Rosendahl Huber, Kimberly A. Eddleston

DOI: [10.1016/j.jbusvent.2026.106582](https://doi.org/10.1016/j.jbusvent.2026.106582) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurship, Gender Studies, Career Development
- **领域:** 创业学, 性别研究, 职业发展
- **Theories:** Role Congruity Theory, Social Cognitive Career Theory, Social Learning Theory
- **理论:** 角色一致性理论, 社会认知职业理论, 社会学习理论

Abstract / 摘要:

Women remain underrepresented not only as founders but also as employees – or “joiners” – in young and small firms, limiting their exposure to entrepreneurial environments that often serve as critical pathways to venture creation. To address this gap, we investigate whether introducing female entrepreneur role models in educational settings can shape young women's entrepreneurial self-efficacy and early career choices. Drawing on role congruity theory and social cognitive career theory (SCCT), we conducted a field experiment involving over 430 university students and 98 early-stage entrepreneurs. Using a pre-test/post-test design and longitudinal tracking of early career choices, we explore the causal effects of exogenously assigned female role models on students' decisions to join a young or small firm. We find that exposure to social interactions with female entrepreneurs significantly boosts female students' entrepreneurial self-efficacy. More importantly, women who were paired with a female entrepreneur were over 10% more likely to join a young firm after graduation compared to those assigned to a male entrepreneur. Mediation analysis confirms that entrepreneurial self-efficacy is a key mechanism linking exposure to same-sex role models with women's decision to join a young firm. These findings the potential of targeted role model interventions to reduce gender disparities in entrepreneurial entry pathways and expand the diversity of entrepreneurial ecosystems.

女性不仅在创始人中代表性不足,在初创及小型企业的员工(即“加入者”)中也同样如此,这限制了她们接触创业环境的机会,而这些环境通常是创建企业的关键路径。为了弥补这一差距,我们调查了在教育环境中引入女性创业榜样是否能塑造年轻女性的创业自我效能感和早期职业选择。借鉴角色一致性理论和社会认知职业理论(SCCT),我们对430多名大学生和98名早期创业者进行了一项实地实验。通过前测/后测设计和对早期职业选择的纵向跟踪,我们探讨了随机分配的女性榜样对学生加入初创或小型企业决策的因果影响。我们发现,与女性创业者的社交互动显著提升了女大学生的创业自我效能感。更重要的是,与分配给男性创业者的学生相比,与女性创业者配对的女性在毕业后加入初创企业的可能性高出10%以上。中介分析证实,创业自我效能感是联系同性榜样接触与女性加入初创企业决策的关键机制。这些发现揭示了针对性榜样干预在减少创业进入路径中的性别差异以及扩大创业生态系统多样性方面的潜力。

4. Emancipatory entrepreneurship by a stigmatized social group

中文标题: 受污名社会群体的解放型创业

Authors / 作者: Chang Lu, Rongrong Zhang, Trish Reay

DOI: [10.1016/j.jbusvent.2026.106578](https://doi.org/10.1016/j.jbusvent.2026.106578) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Social Entrepreneurship, Indigenous Entrepreneurship, Sociology of Entrepreneurship
- **领域:** 社会创业, 原住民创业, 创业社会学
- **Theories:** Entrepreneurship as Emancipation, Stigma Management Theory, Social Identity Theory
- **理论:** 创业即解放, 污名管理理论, 社会身份理论

Abstract / 摘要:

The entrepreneurship as emancipation (EE) perspective has inspired much research in the field of entrepreneurship. Yet, scholars have paid little attention to how a stigmatized social group collectively engages in emancipatory entrepreneurship. To address this gap, we carried out a qualitative investigation of how First Nations (Indigenous peoples) in Canada founded casinos to emancipate from post-colonialism in the face of racial stigma. Focusing on the interactions between the stigmatized entrepreneur group and audiences, we found that emancipatory entrepreneurship by a stigmatized group entailed waves of contestations between the entrepreneur group and audiences, interspersed with interim settlements and preceded by internal mobilization within the stigmatized group. Our core contribution is to provide a process model of emancipatory entrepreneurship by groups and to advance theory regarding the nature of interactions between emancipating entrepreneurs and external audiences. We also reveal how partial acquiescence to constraining actors may be critical in advancing emancipatory entrepreneurship over time and the importance of managing the interdependence between stigmatized entrepreneurs and stigmatizing audiences.

“创业即解放”(EE)视角启发了创业领域的许多研究。然而,学者们很少关注受污名的社会群体如何集体参与解放型创业。为了填补这一空白,我们对加拿大第一民族(原住民)如何面对种族污名,通过建立赌场以从后殖民主义中解放出来进行了定性调查。通过关注受污名的创业群体与受众之间的互动,我们发现受污名群体的解放型创业涉及创业群体与受众之间的一波波争论,其间穿插着临时协议,并以受污名群体内部的动员为先导。我们的核心贡献是提供了一个群体解放型创业的过程模型,并推进了关于解放型创业者与外部受众之间互动性质的理论。我们还揭示了对约束性参与者的部分默许如何对于随着时间的推移推进解放型创业至关重要,以及管理受污名创业者与施加污名的受众之间相互依赖的重要性。

5. I'll prove you wrong! The underdog effect as an antecedent to entrepreneurial action and venture persistence

中文标题: 我会证明你是错的!弱者效应作为创业行动和企业坚持的前因

Authors / 作者: Timothy L. Michaelis, April J. Spivack, Nicholas A. Smith, Jeffrey M. Pollack, Jon C. Carr, Alexander McKelvie

DOI: [10.1016/j.jbusvent.2026.106581](https://doi.org/10.1016/j.jbusvent.2026.106581) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurial Psychology, Entrepreneurship
- **领域:** 创业心理学, 创业学
- **Theories:** Psychological Reactance Theory, Underdog Effect, Entrepreneurial Persistence
- **理论:** 心理抗拒理论, 弱者效应, 创业坚持

Abstract / 摘要:

We the role that psychological reactance via the underdog effect (i.e., the need to prove others wrong) plays in eliciting direct and indirect entrepreneurial action. Drawing on psychological reactance theory (PRT), we examine how negative socio-emotional stimuli can result in a strong individual motivation for entrepreneurs to persist with their ventures. Further, we entrepreneurial hustle (direct action), entrepreneurship-related media engagement (indirect action), and obsessive thinking (indirect action) as mediating mechanisms linking the underdog effect to venture persistence. We test our theory-driven model across three studies. Findings from two quasi-experiments (Study 1, N = 424; Study 2, N = 579) which include 15 post-hoc interviews with entrepreneurs as part of Study 2, as well as a time-lagged mediation model (Study 3, N = 417), provide strong evidence consistent with the inference that venture persistence is closely linked to the underdog effect. We discuss multiple theoretical and practical implications that our work illustrates, and we offer numerous future research directions.

我们探讨了通过弱者效应(即证明他人是错误的需要)产生的心理抗拒在诱发直接和间接创业行动中的作用。借鉴心理抗拒理论(PRT),我们研究了负面的社会情感刺激如何产生促使创业者坚持其企业的强烈个人动机。此外,我们将创业拼搏(直接行动)、创业相关媒体参与(间接行动)和强迫性思考(间接行动)作为联系弱者效应与创业坚持的中介机制。我们在三项研究中测试了我们的理论驱动模型。两项准实验以及一个时滞中介模型的结果提供了强有力的证据,支持创业坚持与弱者效应密切相关的推论。我们讨论了这项工作所展示的多个理论和实践意义,并提出了众多的未来研究方向。

6. Momentum through a mantra: How a new architect legitimizes a nascent entrepreneurial ecosystem

中文标题: 口号带来的动力:新架构师如何使初创创业生态系统合法化

Authors / 作者: Brian J. Bergman, Jeffery S. McMullen

DOI: [10.1016/j.jbusvent.2026.106577](https://doi.org/10.1016/j.jbusvent.2026.106577) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurial Ecosystems, Entrepreneurial Leadership, Organizational Legitimacy
- **领域:** 创业生态系统, 创业领导力, 组织合法性
- **Theories:** Legitimacy Work, Institutional Work, Identity Construction
- **理论:** 合法性工作, 制度工作, 身份构建

Abstract / 摘要:

Despite widespread interest in entrepreneurial ecosystems (EEs), little is known about how particular actors effectively legitimize and lead them. Increasingly, scholars have identified “ecosystem architects” as individuals or organizations intended to achieve these objectives. However, research is silent regarding how a given actor becomes ecosystem architect – how they interpret or enact this role, how others respond to their efforts, and, importantly, how these actions ultimately help or hinder their ability to enhance their EE. To inform these interrelated issues, we conducted an in-depth case study of a nascent EE and a new entrepreneurial support organization (ESO), one of which was founded to serve as its architect and improve its trajectory. Drawing from research on EE emergence and legitimacy, we develop a model of architect-led ecosystem legitimation. Specifically, we detail how the new ESO successfully legitimized the nascent EE and situated itself as its architect. Our analysis reveals two forms of work – “ecosystem legitimacy work” and “architect work” – and shows how these forms interact over time as the aspiring architect evolves and targets different aspects of the ecosystem for different audiences. Further, our analysis shows how preoccupation with one aspect or audience puts pressure on the architect, while oscillating between them can legitimize the ecosystem, cement the architect's role, and generate ecosystem momentum. Ultimately, our study contributes to research on ecosystem architects, EE leadership, EE emergence, and ecosystem identity.

尽管人们对创业生态系统(EEs)有着广泛的兴趣,但对于特定参与者如何有效地使其合法化并领导它们知之甚少。学者们越来越多地将“生态系统架构师”识别为旨在实现这些目标的个人或组织。然而,关于特定参与者如何成为生态系统架构师——他们如何解释或履行这一角色、他人如何回应他们的努力,以及重要的是,这些行动最终如何帮助或阻碍他们增强创业生态系统的能力,研究仍处于空白。为了探讨这些相互关联的问题,我们对一个初创创业生态系统和一个新的创业支持组织(ESO)进行了深入的案例研究,其中该组织的成立旨在担任架构师并改善生态系统的发展轨迹。借鉴创业生态系统涌现和合法性的研究,我们开发了一个由架构师领导的生态系统合法化模型。具体而言,我们详细阐述了新的创业支持组织如何成功地使初创创业生态系统合法化,并将其自身定位为架构师。我们的分析揭示了两种形式的工作——“生态系统合法性工作”和“架构师工作”,并展示了随着志向远大的架构师不断演变并针对不同受众瞄准生态系统的不同方面,这些形式如何随时间相互作用。此外,我们的分析显示,专注于某一方面或某一受众会给架构师带来压力,而在两者之间摆动则可以使生态系统合法化,巩固架构师的角色,并产生生态系统动力。最终,我们的研究对生态系统架构师、创业生态系统领导力、创业生态系统涌现和生态系统身份的研究做出了贡献。

7. Permission to play: Trying on entrepreneurship in times of crisis

中文标题: 许可参与:危机时期的创业尝试

Authors / 作者: Madeline Toubiana, Brian J. Bergman Jr., Angelique Slade Shantz, Sophie Bacq

DOI: [10.1016/j.jbusvent.2026.106583](https://doi.org/10.1016/j.jbusvent.2026.106583) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurship, Organizational Behavior
- **领域:** 创业学, 组织行为学
- **Theories:** Identity Play, Possible Selves, Entrepreneurial Action
- **理论:** 身份游戏, 可能自我, 创业行动

Abstract / 摘要:

This qualitative study explores how individuals try on entrepreneurship during crisis. We discover that individuals use entrepreneurship as a way to envision a possible future in a moment when their occupational trajectory is upended. We reveal that, when a crisis generates a sense of occupational disorientation, individuals are driven to regain control over their future, awakening latent entrepreneurial interests. Yet, our participants needed entrepreneurial self-permission — an emotional, social, and temporal justification for themselves — to engage in entrepreneurial play, experimenting with a possible entrepreneurial identity and potential venture ideas. Altogether, our findings contribute to the growing stream of research on entrepreneurship during crises while offering insight and nuance on broader topics in the field, including entrepreneurial action, decision-making, and identity play.

这项定性研究探讨了个人在危机时期如何尝试创业。我们发现,当职业轨迹被颠覆时,个人会利用创业作为构想未来可能性的方式。研究揭示,当危机产生职业迷茫感时,个人会被驱动去重新掌控未来,从而唤醒潜在的创业兴趣。然而,参与者需要“创业自我许可”——即一种心理、社会和时间上的自我辩护——来参与创业游戏,实验可能的创业身份和潜在的创业想法。总之,我们的研究结果为日益增长的危机创业研究做出了贡献,同时对该领域更广泛的主题(包括创业行动、决策和身份游戏)提供了见解和细微差别。

8. Populism, cultural tightness, and informal venture entry

中文标题: 民粹主义、文化紧致度与非正规创业进入

Authors / 作者: Paul Sanchez-Ruiz, Jorge Arteaga-Fonseca, Timothy L. Michaelis, Christopher Sutter

DOI: [10.1016/j.jbusvent.2026.106587](#) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurship, Political Economy, International Business
- **领域:** 创业学, 政治经济学, 国际商务
- **Theories:** Institutional Theory, Cultural Tightness-Looseness Theory
- **理论:** 制度理论, 文化紧致度-松散度理论

Abstract / 摘要:

This article examines how populist rhetoric and cultural tightness shape informal venture entry. We argue that populist rhetoric by national leaders, invoking the “will of the people” and directed against the “corrupt elite,” undermines trust in formal institutions and generates institutional uncertainty that pushes entrepreneurs toward informality. We further argue that cultural tightness moderates this relationship in a counterintuitive way. Cultural tightness typically enforces low tolerance for deviance and strong expectations of compliance; however, when populist rhetoric erodes confidence in democratic institutions, these same normative pressures likely heighten entrepreneurs' sensitivity to institutional uncertainty, amplifying the perceived risks of formal engagement. We theorize how informal venture entry emerges as a strategic response to populist rhetoric and test our framework using a cross-country dataset of 10,474 entrepreneurial ventures across developed and developing economies. Our results show that populist rhetoric increases the odds of informal venture entry and that this effect is magnified in culturally tight societies. We complement these findings with interviews from Nicaragua, a high-populism, tightnorm context, which illustrate entrepreneurs' lived experiences and provide ecological validity for our statistical results. By integrating institutional theory, political discourse, and cultural psychology, this study advances the understanding of how political forces shape informal entrepreneurship.

本文探讨了民粹主义修辞和文化紧致度如何影响非正规创业进入。我们认为,国家领导人诉诸“人民意志”并针对“腐败精英”的民粹主义修辞,削弱了对正式制度的信任,并产生了制度不确定性,从而促使创业者转向非正规经营。我们进一步认为,文化紧致度以一种反直觉的方式调节了这一关系。文化紧致度通常强制执行对偏差行为的低容忍度和对合规性的强预期;然而,当民粹主义修辞侵蚀了对民主制度的信心时,这些同样的规范压力可能会提高创业者对制度不确定性的敏感度,从而放大参与正式经营的感知风险。我们理论化了非正规创业进入如何作为对民粹主义修辞的战略反应而出现,并利用涵盖发达和发展中经济体10,474家创业企业的跨国数据集测试了我们的框架。结果显示,民粹主义修辞增加了非正规创业进入的概率,且这种效应在文化紧致的社会中更为显著。我们通过对尼加拉瓜(一个高民粹主义、高文化紧致度的环境)的访谈补充了这些发现,这些访谈阐述了创业者的亲身经历,并为统计结果提供了生态效度。通过整合制度理论、政治话语和文化心理学,本研究深化了对政治力量如何塑造非正规创业的理解。

9. Rewards-based crowdfunding as an institutional carrier: The cross-border backing of environmental projects

中文标题: 作为制度载体的奖励型众筹:环保项目的跨境支持

Authors / 作者: Ahmed Sewaid, Tom Vanacker, Shaker A. Zahra

DOI: [10.1016/j.jbusvent.2026.106586](#) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurial Finance, International Entrepreneurship, Sustainable Entrepreneurship
- **领域:** 创业金融, 国际创业, 可持续创业
- **Theories:** Institutional Theory, Institutional Logics, Institutional Carriers
- **理论:** 制度理论, 制度逻辑, 制度载体

Abstract / 摘要:

Entrepreneurs pursuing environmental projects face a paradox: they are most needed in weak institutional contexts, but in these contexts, they are also most under-resourced. We investigate whether global rewards-based crowdfunding platforms can mitigate this paradox by channeling cross-border (financial) resources to environmental projects, especially in weak institutional contexts. Drawing on institutional theory, we conceptualize such platforms as cross-border institutional carriers that transmit backer support across borders guided by pro-environmental community logics. Using Kickstarter data spanning campaigns in 153 countries and backers from 226 countries and territories, we find a positive relationship between projects' environmental orientation and their likelihood of attracting cross-border funding. Moreover, this crossborder support originates from countries with stronger environmental institutions and is especially directed toward projects in weaker institutional contexts. Our findings differ from prevailing expectations from international entrepreneurial finance research focused on venture capitalists and angels, which emphasize cross-border disadvantages for risky, environmental projects in weak-institutional contexts, while we report cross-border fundraising advantages for these projects. Our study contributes to research on the nexus of institutional theory, international entrepreneurship, and crowdfunding research by showing how international crowdfunding platforms can enable the bottom-up diffusion of pro-environmental values and resources across country borders.

从事环保项目的创业者面临一个悖论:他们在制度环境薄弱的地区最被需要,但在这些环境下,他们也最缺乏资源。我们调查了全球奖励型众筹平台是否通过将跨境(财务)资源引导至环保项目(特别是在制度环境薄弱的地区)来缓解这一悖论。借鉴制度理论,我们将此类平台概念化为跨境制度载体,在亲环境社区逻辑的引导下跨国传递支持者的支持。利用涵盖153个国家的众筹活动和来自226个国家及地区的投资者的Kickstarter数据,我们发现项目的环保导向与其吸引跨境资金的可能性之间存在正相关关系。此外,这种跨境支持源自环境制度较强的国家,并特别流向制度环境较弱地区的项目。我们的发现与专注于风险投资和天使投资的国际创业金融研究的普遍预期不同,后者强调在制度薄弱环境下风险较高的环保项目存在跨境劣势,而我们报告了这些项目在跨境融资方面的优势。通过展示国际众筹平台如何促进亲环境价值和资源在国家间的自下而上扩散,本研究对制度理论、国际创业和众筹研究的交叉领域做出了贡献。

10. Scale, scope, speed, and customization (pick two): Resourcing drives trade-offs in local compassion venturing effectiveness

中文标题: 规模、范围、速度与定制化(四选二):资源利用驱动当地慈悲创业有效性的权衡

Authors / 作者: Stella Seyb, Trenton A. Williams, Dean A. Shepherd

DOI: [10.1016/j.jbusvent.2026.106580](#) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Social Entrepreneurship, Crisis Management

- **领域:** 社会创业, 危机管理
- **Theories:** Resourcing Theory, Compassion Venturing, Trade-off Theory
- **理论:** 资源利用理论, 慈悲创业, 权衡理论

Abstract / 摘要:

Adverse events such as natural disasters create a sudden need for resource-intensive entrepreneurial action to alleviate suffering. Because individuals in the affected region have first-hand knowledge of their community's needs and capabilities, they are potentially well-placed to develop effective solutions. However, it is challenging for locals to mobilize resources in the aftermath of an adverse event because the event itself abruptly depletes resources in the focal community. Building on previous work explaining why some individuals respond entrepreneurially in the face of an adverse event, we focus on the post-launch phase of venturing to theorize about how locals' heterogeneous resourcing approaches influence the effectiveness of their new ventures. Our resourcing framework of local compassion venturing effectiveness outlines four pathways through which locals navigate the conditions imposed by the adverse event to develop effective entrepreneurial responses. We offer four propositions explaining how locals' varying perspectives on resourcing lead them to engage in resource acquisition and deployment in ways that produce different tradeoffs between the four formative dimensions of response effectiveness (scale, scope, speed, and customization). By explaining these tradeoffs, our theorizing contributes to the entrepreneurship literature by providing new insights into why and how compassion ventures differ in effectiveness and highlighting situations in which the aggregate effectiveness of individual ventures may not accurately reflect the community-level impact of compassion venturing.

自然灾害等负面事件会产生对资源密集型创业行动的突发需求,以减轻苦难。由于受灾地区的个人拥有其社区需求和能力的第一手知识,他们可能处于开发有效解决方案的有利位置。然而,当地人在负面事件发生后动员资源具有挑战性,因为事件本身会突然耗尽当地社区的资源。基于解释为何某些人在面对负面事件时会做出创业反应的前期研究,我们关注创业的启动后阶段,探讨当地人异质化的资源利用方式如何影响其新创企业的有效性。我们提出的当地慈悲创业有效性资源利用框架概述了当地人应对负面事件所施加条件的四条路径,以开发有效的创业反应。我们提出了四个命题,解释了当地人对资源利用的不同观点如何引导他们进行资源获取和部署,从而在反应有效性的四个构成维度(规模、范围、速度和定制化)之间产生不同的权衡。通过解释这些权衡,我们的理论通过提供关于慈悲创业有效性差异的原因和方式的新见解,为创业文献做出了贡献,并强调了单个企业的总体有效性可能无法准确反映慈悲创业在社区层面影响的情况。

11. The power of consumer solidarity framing in scaling up social impact

中文标题: 消费者团结框架在扩大社会影响中的力量

Authors / 作者: Yuliya Snihur, Clarence Bluntz, Nancy Bocken

DOI: [10.1016/j.jbusvent.2026.106579](https://doi.org/10.1016/j.jbusvent.2026.106579) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Social Entrepreneurship, Entrepreneurial Ecosystems, Strategic Communication
- **领域:** 社会创业, 创业生态系统, 战略沟通
- **Theories:** Framing Theory, Collective Action, Social-Emotional Perspective
- **理论:** 框架理论, 集体行动, 社会情感视角

Abstract / 摘要:

We study how a French social venture helped scale up social impact by selling fair-priced milk. Besides market success, the venture became a symbol of fair pricing for farmers, influencing public discourse and inspiring new laws. We develop a process model where energized consumer solidarity framing serves as a catalyst for mobilizing ecosystem actors, leading to the widespread adoption of the venture's solution to an economic and social crisis. This distributed process of scaling up social impact unfolds outside the venture's direct control, relying on community enactment as well as engagement and energizing from the media, incumbent retailers and competitors, as well as politicians. We contribute to research on scaling up social impact by explaining how and why entrepreneurial framing can mobilize diverse ecosystem actors. We also advance entrepreneurial framing research by offering a social-emotional explanation of how framing can enable change.

我们研究了一家法国社会企业如何通过销售公平定价的牛奶来帮助扩大社会影响。除了市场成功外,该企业还成为了农民公平定价的象征,影响了公众舆论并启发了新法律的制定。我们开发了一个过程模型,其中充满活力的消费者团结框架作为动员生态系统参与者的催化剂,导致该企业针对经济和社会危机的解决方案被广泛采用。这种扩大社会影响的分布式过程在企业的直接控制之外展开,依赖于社区的执行,以及媒体、现有零售商和竞争对手以及政治家的参与和激励。我们通过解释创业框架如何以及为何能够动员多样化的生态系统参与者,为扩大社会影响的研究做出了贡献。我们还通过提供框架如何促进变革的社会情感解释,推进了创业框架研究。

Abstract / 摘要:

This study examines the conditions under which new ventures valorize employment as a strategic orientation. Challenging conventional efficiency-based views of entrepreneurship, we theorize that such employment valorization emerges not from financial constraints but from founder community origin. Specifically, we argue that founder origin, venture location, and local multi-plex relationships shape the valorization of employment. We argue that these conditions foster commitments to community stakeholders, reconfiguring employment from an economic input into a core purpose of firms. Using a dataset of 25,905 ventures founded in Japan between 1998 and 2007, our findings extend research on entrepreneurship and community by showing how place-based founder ties and relational engagement shape employment decisions in new ventures.

本研究探讨了新创企业将就业价值化作为战略导向的条件。挑战了传统的基于效率的创业观,我们从理论上阐述了这种就业价值化并非源于财务约束,而是源于创始人的社区背景。具体而言,我们认为创始人出身、企业所在地以及当地的多重关系塑造了就业价值化。这些条件促进了对社区利益相关者的承诺,将就业从一种经济投入转变为企业的核心宗旨。通过对1998年至2007年间在日本成立的25,905家企业的数据库进行分析,我们的研究结果扩展了创业与社区的研究,展示了基于地点的创始人联系和关系参与如何塑造新创企业的就业决策。

- **Theories:** Spillover Theory, Entrepreneurial Ecosystems, Social Connectedness
- **理论:** 溢出理论, 创业生态系统, 社会连通性

Abstract / 摘要:

When venture capital (VC) investment flows into a local economy, does it yield economic activity beyond the receiving ventures? While a large literature studies the effect of VC investments on venture-level activity, its consequences for broader economic activity are less well understood. We study the effect of VC investment flows on destination county employment, wages, and venture creation, using a novel instrument based on the ‘social connectedness’ of counties to major non-local sources of VC investment. Using detailed data on investor-to-venture VC flows, we find substantial positive effects: using instrumental-variable estimates, each million dollars invested into a county yields approximately one new venture, 41 jobs, and seven million dollars in payroll. We also document positive spillovers across industries, particularly toward those supplying VC-backed ventures—thereby contributing to the resource munificence of the local economy and its entrepreneurial ecosystem.

当风险投资(VC)流入地方经济时,是否会产生受资助企业之外的经济活动?虽然大量文献研究了风投对企业层面活动的影响,但其对更广泛经济活动的影响尚不明确。本研究利用一种基于县域与主要非本地风投来源地之间“社会连通性”的新型工具变量,探讨了风投资流入对目的地县域就业、工资和创业的影响。通过使用投资者到企业的详细风投流动数据,我们发现了显著的正向效应:工具变量估计显示,投入到某个县的每百万美元约能产生1家新企业、41个工作岗位和700万美元的工资支出。我们还记录了跨行业的正向溢出效应,特别是对那些为风投支持的企业提供供应的行业,从而提升了地方经济及其创业生态系统的资源丰裕度。

Fields & Theories / 领域与理论:

- **Fields:** International Business, Entrepreneurship, Regional Economics
- **领域:** 国际商务, 创业学, 区域经济学
- **Theories:** Organizational Learning Theory, Competition Theory, Institutional Theory
- **理论:** 组织学习理论, 竞争理论, 制度理论

Abstract / 摘要:

Research on the impact of inward foreign direct investment (IFDI) on new venture creation has primarily focused on the country level, often yielding inconsistent findings. To reconcile these inconsistencies, we develop a theory on the influence of IFDI stock on new venture creation at the industry-regional level, offering three possible complementary explanations. Drawing on learning and competition theories, we propose that IFDI in a specific industry and region has an inverted U-shaped effect on new venture creation, driven by the dual forces of learning opportunities and competitive threats anticipated by prospective entrepreneurs. Additionally, we found that IFDI in related industries in the focal region and IFDI in the focal industry in adjacent regions positively influence new venture creation. Furthermore, we argue that these effects are amplified in regions with more developed non-state economy. Analyzing data on all registered firms (2013–2023) collected from China National Enterprise Credit Information Publicity System provides robust support for our hypotheses. The findings make important theoretical contributions to research on foreign direct investment and entrepreneurship, as well as to the literature on learning and competition.

关于内向型外商直接投资(IFDI)对新企业创建影响的研究主要集中在国家层面,且结论往往不一致。为了解决这些矛盾,我们开发了一个关于行业-地区层面IFDI存量对新企业创建影响的理论,并提出了三个可能的互补解释。借鉴学习与竞争理论,我们提出特定行业和地区的IFDI对新企业创建具有倒U型影响,这是由潜在企业家预期的学习机会和竞争威胁双重力量驱动的。此外,我们发现焦点地区相关行业的IFDI以及相邻地区焦点行业的IFDI对新企业创建有积极影响。此外,我们认为这些影响在非国有经济较发达的地区更为显著。通过分析从中国国家企业信用信息公示系统收集的所有注册企业数据(2013-2023年),我们的假设得到了有力支持。研究结果对外国直接投资和创业研究,以及学习与竞争文献做出了重要的理论贡献。

- **Fields:** Technology Entrepreneurship, Entrepreneurial Marketing, Resource Acquisition
- **领域:** 技术创业, 创业营销, 资源获取
- **Theories:** Social Network Theory, Liability of Newness, Configuration Theory
- **理论:** 社会网络理论, 新进入缺陷, 构型理论

Abstract / 摘要:

Attracting customers is one of the most important milestones for technology ventures. Ties are generally considered as beneficial when attracting start-up resources, such as first customers, because they can mitigate information asymmetry to overcome liabilities of newness and smallness. Despite this, when and how entrepreneurs use different network approaches to attract their ventures' first paying customers remains understudied. We rely on the concept of tie strength to distinguish between ventures acquiring customers via pre-existing strong ties, weak ties, or no ties (i.e., through market-based mechanisms). Using fuzzy-set Qualitative Comparative Analysis on 72 entrepreneurs from 72 Flemish technology ventures, complemented by extensive qualitative data, we identify distinct, equifinal configurations of founder, firm, and environmental attributes that are associated with acquiring customers through strong, weak, or no ties. Our posthoc performance analyses further reveal performance differences: while attracting customers through no ties is associated with higher revenues, only using strong ties to attract first paying customers is associated with higher survival at scale. Our findings have important practical implications for entrepreneurs and technology commercialization policies. Overall, our study contributes a network-based perspective to customer acquisition to the literatures on entrepreneurial resource acquisition, entrepreneurial marketing and technology entrepreneurship.

吸引客户是技术创业企业最重要的里程碑之一。在吸引创业资源(如首批客户)时,关系通常被认为是有益的,因为它们可以减轻信息不对称,从而克服新进入缺陷和弱小缺陷。尽管如此,创业者何时以及如何使用不同的网络方法来吸引其企业的首批付费客户仍缺乏研究。我们依靠关系强度概念来区分通过预先存在的强关系、弱关系或无关系(即通过市场机制)获取客户的企业。通过对来自72家佛兰德技术创业企业的72名创业者进行模糊集定性比较分析(fsQCA),并辅以广泛的定性数据,我们识别出了与通过强关系、弱关系或无关系获取客户相关的创始人、公司 and 环境属性的独特且等效的构型。我们的事后绩效分析进一步揭示了绩效差异:虽然通过无关系吸引客户与更高的收入相关,但仅利用强关系吸引首批付费客户则与规模化后的更高生存率相关。我们的研究结果对创业者和技术商业化政策具有重要的实践意义。总的来说,我们的研究为创业资源获取、创业营销和技术创业文献贡献了基于网络的客户获取视角。

3. How cross-national border influences of global phenomena render entrepreneurship inherently international

中文标题: 全球现象的跨国界影响如何使创业本质上具有国际性

Authors / 作者: Stephanie A. Fernhaber, Christian Schwens

DOI: [10.1016/j.jbusvent.2025.106560](https://doi.org/10.1016/j.jbusvent.2025.106560) **Published / 发表日期:** 2026-03-01

Fields & Theories / 领域与理论:

- **Fields:** International Entrepreneurship, Global Strategy
- **领域:** 国际创业, 全球战略
- **Theories:** Institutional Theory
- **理论:** 制度理论

Abstract / 摘要:

Amid accelerating global change, entrepreneurship is increasingly shaped by political, social, and technological shifts that cut across borders. Yet, despite these pressing realities, international entrepreneurship (IE) scholarship has paid limited attention to how such global phenomena impact entrepreneurial actors, behaviors, and circumstances. This suggests a disconnect between the evolving global context and current academic attention to the field. Drawing on our perspective as area editors for IE at the *Journal of Business Venturing*, we reflect on this gap and the concerns voiced across the scientific community about the field's scope and future. In response, we propose an agenda for future research that treats entrepreneurship as inherently international and, in turn, invites future contributions not only by IE researchers but also from the wider entrepreneurship community. Observes a disconnect between the relevance of IE driven by global phenomena and its limited presence in leading entrepreneurship scholarship. Expands the conceptual boundaries of IE by introducing cross-national-border influences of global phenomena as a new third branch of IE. Charts a research agenda that allows for examining novel research questions on political, social, and technological global phenomena. Aims to reinvigorate interest in IE and invites future contributions not only by IE researchers but also from wider entrepreneurship.

在全球变革加速的背景下,创业日益受到跨越国界的政治、社会和技术变革的影响。然而,尽管现实紧迫,国际创业(IE)学术界对这些全球现象如何影响创业主体、行为和环境关注却很有限。这表明不断演变的全球背景与当前该领域的学术关注之间存在脱节。基于我们作为《商业创投杂志》(*Journal of Business Venturing*)国际创业领域编辑的视角,我们对这一差距以及科学界对该领域范围和未来的担忧进行了反思。作为回应,我们提出了一个未来研究议程,将创业视为本质上的国际化行为,并邀请国际创业研究者以及更广泛的创业学界做出贡献。研究观察到全球现象驱动的国际创业相关性与其在主流创业学术研究中的有限存在之间存在脱节。通过引入全球现象的跨国界影响作为国际创业的一个新的第三分支,扩展了国际创业的概念边界。制定了一个研究议程,允许探讨关于政治、社会和技术全球现象的新颖研究问题。旨在重新激发对国际创业的兴趣,并邀请未来不仅是国际创业研究者,还有更广泛创业领域的学者做出贡献。

4. Hype in entrepreneurial settings

中文标题: 创业情境中的炒作

Authors / 作者: Raghu Garud, Nelson Phillips, Yuliya Snihur, Llewellyn D.W. Thomas, Charlene Zietsma

DOI: [10.1016/j.jbusvent.2025.106559](https://doi.org/10.1016/j.jbusvent.2025.106559) **Published / 发表日期:** 2026-03-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurship, Innovation Management, Strategic Management
- **领域:** 创业学, 创新管理, 战略管理
- **Theories:** Hype Cycle, Expectation Management, Narrative Theory
- **理论:** 炒作周期, 预期管理, 叙事理论

Abstract / 摘要:

Although hype is widely discussed in the popular discourse around entrepreneurship, it has received limited attention in the entrepreneurship literature. In this introduction to the special issue on hype and entrepreneurship, we propose that hype in entrepreneurial settings can be usefully explored by considering the stages of the hype cycle that can unfold in these settings. The first stage is hyping, where entrepreneurs frame ideas, products, business models, and ventures using language designed to set exciting future expectations despite (and even because of) the absence of technical validation or evidence of the economic feasibility of the venture. These efforts can trigger a state of hype, which refers to a rapidly intensifying collective vision of the future across audiences leading to an upswing. During the upswing, unrealistic expectations emerge, which, if left unmet, can lead to a downswing when there is a reversal of momentum and even the stigmatization of the hyped assets. Yet, there is always the possibility of a revival of entrepreneurial efforts around what had been hyped but became stigmatized. Noting that not all entrepreneurial phenomena necessarily traverse all stages of the cycle, we discuss some of the triggers and contingencies that can lead to shifts across the different stages of the hype cycle. We also discuss the challenges and opportunities that these stages offer entrepreneurs to the extent they unfold within and across fields. We then introduce the papers that comprise the special issue and conclude with suggestions for future research.

尽管在关于创业的流行话语中广泛讨论了“炒作”(hype),但在创业文献中受到的关注却很有限。在这一关于炒作与创业的特刊引言中,我们提出,通过考虑在创业情境中可能展开的炒作周期阶段,可以有效地探索创业情境中的炒作。第一阶段是“炒作行为”(hyping),创业者使用旨在设定令人兴奋的未来预期的语言来构建想法、产品、商业模式和风险企业,尽管缺乏技术验证或企业经济可行性的证据(甚至正因为缺乏这些证据)。这些努力可以触发一种“炒作状态”,即受众对未来的集体愿景迅速强化,导致上升趋势。在上升期,会出现不切实际的预期,如果这些预期未能实现,当动力逆转甚至被炒作的资产受到污名化时,可能会导致下降期。然而,围绕曾经被炒作但后来被污名化的事物,创业努力总是有复兴的可能。注意到并非所有的创业现象都必然经历周期的所有阶段,我们讨论了一些可能导致炒作周期不同阶段转变的触发因素和权变因素。我们还讨论了这些阶段在领域内和跨领域展开时给创业者带来的挑战和机遇。随后,我们介绍了构成该特刊的论文,并提出了未来研究的建议。

5. Social entrepreneurship mechanisms for systems change: A structuration approach

中文标题: 系统性变革的社会创业机制:一种结构化视角

Authors / 作者: Gorgi Krlev

DOI: [10.1016/j.jbusvent.2025.106561](https://doi.org/10.1016/j.jbusvent.2025.106561) **Published / 发表日期:** 2026-03-01

Fields & Theories / 领域与理论:

- **Fields:** Social Entrepreneurship, Sustainability, Institutional Change
- **领域:** 社会创业, 可持续发展, 制度变迁
- **Theories:** Structuration Theory, Systems Theory
- **理论:** 结构化理论, 系统理论

Abstract / 摘要:

Persistent social and environmental challenges require social entrepreneurs to work towards systems change, which is defined as fundamental shifts in social processes, practices, and structures. However, we do not understand well why some social entrepreneurs achieve systemic changes, while others fail to do so. In particular, we do not know which mechanisms help social entrepreneurs produce systemic transformations in society. This article advocates for harnessing Giddens' structuration theory to improve our understanding. I develop a structuration model of systems change through social entrepreneurship, which shows that connected modalities, that is, intricate combinations of (1) interpretative schemes, (2) resources, and (3) norms, act as the key mechanisms that enable systemic effects. I argue when social entrepreneurs mobilize connected modalities, they can realize high integrativeness, i.e., cover a wide variety of interconnected issues and trigger shifts at different societal levels. Connected modalities also enable high inclusiveness, i.e., unify a wide diversity of stakeholders. Both elements are needed to achieve systems change. I support the model's development with illustrations from research on social entrepreneurship with and without a systemic character. Thereby, I alter how we think about social entrepreneurship and effective ways of supporting it when the aim is to generate systems change.

持续的社会和环境挑战要求社会企业家致力于系统性变革,即社会过程、实践和结构的根本性转变。然而,我们并不清楚为什么有些社会企业家能实现系统性变革,而另一些人却失败了。特别是,我们不知道哪些机制能帮助社会企业家在社会中产生系统性转型。本文主张利用吉登斯的结构化理论来增进我们的理解。我开发了一个通过社会创业实现系统性变革的结构化模型,该模型表明,连接的调适手段(modalities),即(1)解释图式、(2)资源和(3)规范的复杂组合,是实现系统性效应的关键机制。我认为,当社会企业家动员连接的调适手段时,他们可以实现高度的整合性,即涵盖广泛的互联问题并在不同的社会层面触发转变。连接的调适手段还能实现高度的包容性,即统一广泛多样的利益相关者。这两个要素对于实现系统性变革都是必需的。我通过对具有和不具有系统特征的社会创业研究实例来支持该模型的开发。由此,我改变了我们对社会创业的思考方式,以及在目标是产生系统性变革时支持社会创业的有效方式。

6. The dynamics of narcissism in founding teams: Implications for co-founder turnover and venture growth

中文标题: 创业团队中的自恋动态:对联合创始人流失与创业企业成长的影响

Authors / 作者: Ulrich Lang, Victoria Berg, Jannis von Nitzsch, Andreas Engelen

DOI: [10.1016/j.jbusvent.2025.106569](https://doi.org/10.1016/j.jbusvent.2025.106569) Published / 发表日期: 2026-03-01

Fields & Theories / 领域与理论:

- **Fields:** Entrepreneurial Psychology, Team Dynamics, New Venture Management
- **领域:** 创业心理学, 团队动态, 新创企业管理
- **Theories:** Person-Organization (PO) Fit Theory, Upper Echelons Theory
- **理论:** 个人-组织(PO)匹配理论, 高层梯队理论

Abstract / 摘要:

Drawing on person–organization (PO) fit theory, we examine how different configurations of the personality trait narcissism within founding teams influence co-founder turnover and venture growth. We theorize that high mean levels of narcissism in founding teams reduce “supplementary fit,” heightening the likelihood of co-founder turnover and, in turn, undermining venture growth. In contrast, greater diversity in narcissism can foster “complementary fit,” especially through improved role and task allocations between narcissistic and less narcissistic co-founders, buffering the negative effects of high mean narcissism. To test our model, we utilize a unique longitudinal dataset of 911 U.S. tech-based ventures founded in 2010, which combines a LinkedIn-based measure of founder narcissism with detailed founding team and venture data. Our findings support our proposed founder-narcissism-configuration model, revealing that the mean level of narcissism and narcissism diversity jointly shape co-founder turnover and ultimately venture growth. This study advances research on narcissism in entrepreneurship, team-level narcissism, and PO fit theory.

基于个人-组织(PO)匹配理论,本研究探讨了创业团队中自恋人格特质的不同配置如何影响联合创始人的流失和企业的成长。理论认为,创业团队中高水平的平均自恋程度会降低“补充性匹配”,从而增加联合创始人流失的可能性,进而损害企业成长。相比之下,自恋特质的多样性可以促进“互补性匹配”,特别是通过改善自恋与非自恋联合创始人之间的角色和任务分配,缓冲高平均自恋带来的负面影响。为了验证该模型,我们利用了2010年成立的911家美国科技型企业的独特纵向数据集,该数据集结合了基于LinkedIn的创始人自恋测量指标以及详细的创业团队和企业数据。研究结果支持了我们提出的创始人自恋配置模型,揭示了自恋的平均水平和多样性共同塑造了联合创始人的流失并最终影响企业成长。本研究推进了创业学中的自恋研究、团队层面的自恋研究以及PO匹配理论。

- **领域:** 创新政策, 知识产权, 战略管理
- **Theories:** Law and Economics
- **理论:** 法律经济学

Abstract / 摘要:

This paper explores whether the U.S. Defend Trade Secrets Act (DTSA) increased the declaration of trade secrets. Leveraging cross-sectoral variation in the importance of trade secrets prior to the DTSA, empirical results show that the DTSA was followed by an increase in the intensive margin of trade secrets declaration in service industries, not in manufacturing industries though. The extensive margin of trade secret declaration increased in both services and manufacturing, where the surge was strongest in manufacturing. The extensive margin increased most strongly for manufacturing with a high sectoral R&D intensity. The results are of interest to policy makers as trade secrets can hinder knowledge flows with potential implications for innovation.

本文探讨了美国《商业秘密保护法》(DTSA)是否增加了商业秘密的申报。利用DTSA出台前商业秘密重要性的跨行业差异,实证结果显示,DTSA出台后,服务业商业秘密申报的密集边际有所增加,但制造业则不然。服务业和制造业的商业秘密申报扩展边际均有所增加,其中制造业的增幅最为强劲。对于行业研发强度较高的制造业,扩展边际增长最快。由于商业秘密可能阻碍知识流动并对创新产生潜在影响,这些结果对政策制定者具有参考价值。

Fields & Theories / 领域与理论:

- **Fields:** Sustainable Innovation, Digital Entrepreneurship, Social Entrepreneurship, Supply Chain Management
- **领域:** 可持续创新, 数字创业, 社会创业, 供应链管理
- **Theories:** Information Asymmetry, Socio-technical Systems Theory, Disruptive Innovation
- **理论:** 信息不对称, 社会技术系统理论, 颠覆性创新

Abstract / 摘要:

This article explores how digital innovations promote disruptive sustainability by supporting small-scale producers. Through an exploratory case study of Abalobi, a South African social enterprise, we examine how digital innovations reconfigure production and distribution networks by addressing information asymmetries and fostering greater transparency, equity, and inclusion in seafood systems. We identify key dimensions that enhance market access for small-scale producers and empower them with verifiable data for regulatory compliance: 1) the redefinition of digital provenance that enhances traceability and transparency in production and distribution; 2) the rethinking of producer-consumer relationships by leveraging storytelling and building a shared vision of disruptive sustainability; and 3) the empowerment of producers with data and information ownership. We develop a socio-technical framework for disruptive sustainability that emphasizes the interaction between digital interventions, mediating mechanisms, and sustainability outcomes. The framework advances beyond technological determinism by identifying how enabling conditions, relational processes, and reflexive feedback loops shape the pathways through which digital tools can produce inclusive and sustainable transformations. We contribute to discourses on disruptive sustainability by highlighting the potential of digital innovations to drive systemic change in industries historically marked by exclusion and inequality.

本文探讨了数字创新如何通过支持小规模生产者来促进颠覆性可持续性。通过对南非社会企业 Abalobi 的探索性案例研究,我们考察了数字创新如何通过解决信息不对称并促进海鲜系统中的透明度、公平性和包容性,来重新配置生产和分销网络。我们确定了增强小规模生产者市场准入并赋予其可验证数据以满足监管合规的关键维度:1)重新定义数字溯源,增强生产和分销的追溯性与透明度;2)通过利用叙事和构建颠覆性可持续性的共同愿景,重新思考生产者与消费者的关系;3)赋予生产者数据和信息所有权。我们开发了一个颠覆性可持续性的社会技术框架,强调数字干预、中介机制与可持续性成果之间的相互作用。该框架通过识别赋能条件、关系过程和反思性反馈回路如何塑造数字工具产生包容性和可持续转型的路径,超越了技术决定论。通过强调数字创新在历史上以排斥和不平等为特征的行业中推动系统性变革的潜力,我们为颠覆性可持续性的论述做出了贡献。

- **Theories:** Division of Labor, Organizational Design
- **理论:** 分工, 组织设计

Abstract / 摘要:

In October 2020, the United States Patent and Trademark Office (USPTO) introduced an automated process for routing new patent applications, in part to increase examiner specialization. In this research note, we first assess whether the USPTO achieved this objective using a difference-in-differences (DiD) research design on a sample of applications assigned to examiners between 2018 and 2021. The new routing system increased technical overlap between examiner work histories and newly assigned cases by nearly 57 percent, indicating a substantial increase in examiner specialization across the agency. In addition, we show that automated routing largely unknown in the academic literature effectively eliminated quasi-random assignment of applications to examiners. Given the importance of quasi-random assignment for empirical research, we discuss our findings within this context and their potential impact on future research.

2020年10月,美国专利商标局(USPTO)引入了一项自动路由新专利申请的流程,部分目的是提高审查员的专业化程度。在本研究简报中,我们首先利用2018年至2021年间分配给审查员的申请样本,采用双重差分(DiD)研究设计评估了USPTO是否实现了这一目标。新的路由系统使审查员的工作历史与新分配案件之间的技术重叠增加了近57%,表明整个机构的审查员专业化程度大幅提高。此外,我们表明,在学术文献中很大程度上不为人知的自动路由,实际上消除了审查员对申请的准随机分配。鉴于准随机分配对实证研究的重要性,我们在这一背景下讨论了我们的发现及其对未来研究的潜在影响。

- **领域:** 创业生态系统, 创业融资, 制度创业
- **Theories:** Institutional Theory, Discursive Institutionalism, Framing Theory
- **理论:** 制度理论, 话语制度主义, 框架理论

Abstract / 摘要:

While entrepreneurial infrastructure (EI)—the resources and institutions supporting entrepreneurial activity—has received attention by both scholars and policymakers, less attention has been directed to understanding how the EI systems that generate those resources develop. To address this gap, we propose an extension of existing conceptual entrepreneurial ecosystem frameworks to include the EI systems of actors and institutions that generate those resources, applying it to the case

of China's venture financing system that emerged and developed over 40 years. Based on our findings, we propose a discourse-driven process model of system change that included both policymaking and industry activity. First was policymaking, characterized by a tentative governance mode, with co-creation by policymakers and non-government actors leading to incremental changes in institutions (regulative, normative and cognitive) and, in turn, how new institutions created, allowed or legitimated new actors, or delegitimated others, over time. Second was industry activity by which new norms, beliefs and actors emerged as a result of non-government stakeholders (e.g., investors, venture capital firms, startups, stock exchanges) undertaking activities in pursuit of their organizational interests. Discourse and discursive strategies, including framing, theorizing, lobbying, convening, promulgating and demonstrating, among and between policymakers and non-government actors play a central role in the change process. We also show how these processes were affected by prior developments in the venture financing system, as well as national and international macroenvironmental factors. The findings have implications for entrepreneurial ecosystem and infrastructure research, as well as for policymakers wishing to develop and improve the infrastructure supporting new venture creation.

虽然创业基础设施(EI)——支持创业活动的资源和制度——已受到学者和政策制定者的关注,但对于产生这些资源的 EI 系统是如何发展的,关注较少。为了填补这一空白,我们建议扩展现有的创业生态系统概念框架,将产生这些资源的行动者和机构的 EI 系统纳入其中,并将其应用于中国 40 多年来出现和发展的创业融资体系案例。基于我们的发现,我们提出了一个由话语驱动的系统变革过程模型,其中包括政策制定和行业活动。首先是政策制定,其特点是试探性的治理模式,政策制定者和非政府行动者的共同创造导致了制度(规制、规范和认知)的渐进式变化,进而随着时间的推移,新制度如何创造、允许或合法化新的行动者,或使其他行动者失去合法性。其次是行业活动,非政府利益相关者(如投资者、风险投资公司、初创企业、证券交易所)为追求其组织利益而开展活动,从而产生了新的规范、信念和行动者。话语和话语策略(包括框架构建、理论化、劝说、召集、颁布和示范)在政策制定者与非政府行动者之间及内部的变革过程中发挥着核心作用。我们还展示了这些过程如何受到创业融资体系先前发展以及国内外宏观环境因素的影响。研究结果对创业生态系统和基础设施研究以及政策制定者具有启示意义。

- **领域:** 创新研究, 环境经济学, 可持续转型, 战略管理
- **Theories:** Induced Innovation Hypothesis, Radical Innovation, Policy Instrument Choice
- **理论:** 诱导性创新假设, 激进创新, 政策工具选择

Abstract / 摘要:

Environmental regulations present firms with two innovation pathways: developing abatement technologies that mitigate pollution from existing processes or investing in clean technologies that do not produce pollution by design. Achieving disruptive sustainability requires radical clean technologies—fundamental departures from established trajectories that enable system-level shifts. However, pursuing radical clean innovation demands substantial financial investment, organizational restructuring, and operational flexibility. While existing research examines how policy instruments affect the rate of environmental innovation, we lack an understanding of how they shape direction—whether they steer firms toward clean rather than abatement technologies, and whether they foster more radical clean innovation. We argue that market-based instruments provide long-term incentives and technological flexibility that enable transformative innovation, while generating market-size effects that shrink demand for polluting technologies and expand markets for clean alternatives. This creates strategic incentives for radical innovation. In contrast, command-and-control policies impose fixed compliance thresholds without altering market structures or generating continuous pressure for innovation. We test these hypotheses using environmental patenting data from manufacturing firms across 17 EU countries from 1991 to 2020. Results demonstrate that market-based policies significantly enhance clean technology innovation and increase technological radicalness, while command-and-control policies show no significant effect on environmental innovation. These findings contribute to research on disruptive sustainability and policy-

induced innovation by demonstrating how market-based instruments catalyze radical clean technologies and support sustainability transitions.

环境规制为企业提供了两条创新路径:一是开发减排技术以减轻现有生产过程中的污染,二是投资于设计上不产生污染的清洁技术。实现颠覆性可持续性需要激进的清洁技术,即从根本上偏离既定轨迹并实现系统级转变的技术。然而,追求激进的清洁创新需要大量的资金投入、组织重组和运营灵活性。虽然现有研究探讨了政策工具如何影响环境创新的速率,但我们仍缺乏对其如何塑造创新方向的理解——即政策是否引导企业转向清洁技术而非减排技术,以及是否促进了更激进的清洁创新。本文认为,基于市场的工具提供了长期激励和技术灵活性,能够实现变革性创新,同时产生市场规模效应,缩小对污染技术的需求并扩大清洁替代品的市场,从而为激进创新创造战略激励。相比之下,命令控制型政策设定了固定的合规阈值,而不改变市场结构或产生持续的创新压力。我们利用1991年至2020年间17个欧盟国家制造企业的环境专利数据对这些假设进行了验证。结果表明,基于市场的政策显著增强了清洁技术创新并提高了技术激进性,而命令控制型政策对环境创新没有显著影响。这些发现通过展示基于市场的工具如何催化激进清洁技术的发展,为颠覆性可持续性和政策诱导创新的研究做出了贡献。

- **Theories:** Organizational Learning Theory, Institutional Theory, Exploration-Exploitation Framework
- **理论:** 组织学习理论, 制度理论, 探索-利用框架

Abstract / 摘要:

Existing literature suggests that weak intellectual property rights (IPR) regimes are not conducive to innovation intensive activities. However, evidence of technology exploration activities by multinational companies (MNCs) in emerging countries challenges this view. We address this puzzle by examining how host-country IPR regimes influence MNCs' technology exploration, distinguishing between technology-seeking (TS) and home-base augmenting (HBA) activities. Drawing on organizational experience and learning theories, we also test the moderating role of MNCs' function-related (innovation function-specific and function-generic) and location-related (host country-specific and country-generic) international experience. Using PATSTAT patent data for 91 U.S. computer and electronics firms in the period 2001–2018, we find that weaker IPR protection is associated with a higher proportion of HBA initiatives. This challenges the conventional view that strong IPR regimes are indispensable for technology exploration. Moreover, we show that MNCs with extensive function-specific experience in the host and other foreign countries better navigate diverse IPR environments, making their technology exploration activities less affected by the strength of the host-country IPR regime.

现有文献表明,弱知识产权(IPR)保护制度不利于创新密集型活动。然而,跨国公司(MNCs)在新兴国家进行技术探索活动的证据挑战了这一观点。我们通过考察东道国知识产权制度如何影响跨国公司的技术探索(区分技术寻求型 TS 和母国基地增强型 HBA 活动)来解决这一难题。借鉴组织学习和经验理论,我们还测试了跨国公司功能相关(特定于创新功能和通用功能)以及位置相关(特定于东道国和通用国家)国际经验的调节作用。利用2001–2018年间91家美国计算机和电子企业的PATSTAT专利数据,我们发现较弱的知识产权保护与较高比例的HBA计划相关。这挑战了强知识产权制度对技术探索必不可少的传统观点。此外,我们表明,在东道国和其他外国拥有丰富特定功能经验的跨国公司能更好地应对多元化的知识产权环境,使其技术探索活动受东道国知识产权制度强度的影响较小。

- **理论:** 路径依赖, 集聚经济, 知识溢出

Abstract / 摘要:

This paper examines whether regions with early leadership in scientific research in an emerging technology achieve lasting patenting advantage in that technology. Using data on 27 emerging technologies (e.g., Artificial Intelligence, Cloud Computing) across U.S. Metropolitan regions over 20 years, we find that these "pioneer" regions achieve a large and increasing patenting advantage. This effect is strongest in "super-cluster" regions — those that combine pioneering scientific research in an emerging field with robust patenting capacity in related domains. Our findings the critical role of early scientific leadership in shaping regional patenting trajectories, and offer policy insights for fostering technological invention in emerging technologies.

本文探讨了在新兴技术领域拥有早期科学研究领先地位的区域,是否能在该技术领域获得持久的专利优势。通过分析美国大都市区20年间27项新兴技术(如人工智能、云计算)的数据,我们发现这些“先锋”区域获得了巨大且不断增长的专利优势。这种效应在“超级集群”区域最为显著,即那些将新兴领域的先锋科学研究与相关领域的强大专利能力相结合的区域。我们的研究结果强调了早期科学领先地位在塑造区域专利轨迹中的关键作用,并为促进新兴技术的创新提供了政策启示。

- **Theories:** Entrepreneurs-as-Scientists Framework, Resource-Based View, Scientific Method in Entrepreneurship
- **理论:** 企业家即科学家框架, 资源基础观, 创业中的科学方法

Abstract / 摘要:

This paper investigates whether a causal, theory-driven decision framework, such as the Entrepreneurs-as-Scientists (E-a-S) framework, influences how entrepreneurs reconfigure their entrepreneurial teams. We conducted a randomized controlled trial on 132 early-stage startups that participated in a pre-incubation program. During the pre-incubation program, we randomly assigned the early-stage startups to either a treatment group, which learned how to apply the E-a-S framework to make decisions, or a control group, which learned the same tools and skills as the treatment group, but without the E-a-S framework. For startups in both groups, we tracked the composition of the initial entrepreneurial team and its subsequent reconfigurations over 64 weeks. Employing a question-driven approach, we investigated whether E-a-S entrepreneurial teams evolved differently from those in the control group. Our analysis reveals that the entrepreneurs who learned the E-a-S framework composed their entrepreneurial teams differently from the other entrepreneurs: entrepreneurs who learned an E-a-S framework were more likely to use a resource-seeking strategy to compose their teams than those in the control group. Specifically, E-a-S entrepreneurs decreased the proportion of team members with technical backgrounds, while selectively adding individuals with managerial

and industry-specific experience. These findings demonstrate that E-a-S not only shapes venture pivots and terminations but also influences the formation of entrepreneurial teams. The implications of the results are discussed for research, entrepreneurs, and investors. E-a-S entrepreneurs reconfigure their entrepreneurial teams differently compared to other entrepreneurs. E-a-S entrepreneurs rely more on a resource-seeking strategy than non-E-a-S entrepreneurs when reconfiguring their teams. E-a-S entrepreneurs do not differ from non-E-a-S in using an interpersonal attraction strategy when reconfiguring teams. Randomized control trial experiment: Analysis based on 132 early-stage startups.

本文探讨了因果关系驱动、理论导向的决策框架——如“企业家即科学家”(E-a-S)框架——是否会影响企业家重新配置其创业团队的方式。我们对参加预孵化项目的132家初创企业进行了一项随机对照试验。在预孵化期间,我们将这些初创企业随机分配到实验组(学习如何应用E-a-S框架进行决策)或对照组(学习相同的工具和技能,但不包含E-a-S框架)。我们追踪了两组初创企业初始团队的构成及其在随后64周内的重新配置情况。通过问题驱动的方法,我们研究了E-a-S创业团队的演化是否与对照组有所不同。分析表明,学习了E-a-S框架的企业家在组建团队时与对照组存在显著差异:E-a-S企业家比对照组更倾向于使用资源寻求策略来组建团队。具体而言,E-a-S企业家降低了具有技术背景的团队比例,同时有选择地增加了具有管理和行业特定经验的人员。这些发现表明,E-a-S不仅塑造了企业的转型(pivots)和终止,还影响了创业团队的形成。本文讨论了研究结果对学术研究、企业家和投资者的启示。

- **理论:** 演化经济地理学, 知识溢出, 技能偏向型技术进步

Abstract / 摘要:

This work investigates the role of green foreign direct investments (FDIs) and local skill composition for regional technological diversification in green domains. We conduct the analysis on 287 US Metropolitan Statistical Areas (MSAs) observed from 2003 to 2018. Our results show that diversification in green technological domains is more likely to take place in MSAs with higher volumes of green FDIs and higher intensity of abstract skills. Moreover, we find that the local endowment of abstract and routine skills moderates the impact of green FDIs, activating compensation and reinforcing mechanisms, respectively. The findings of this work provide novel insights for the academic debate on the determinants of green technological diversification and for the design of an effective policy toolbox to sustain the regional green transition.

本研究探讨了绿色外商直接投资(FDIs)和地方技能构成在区域绿色领域技术多样化中的作用。我们对2003年至2018年间观察到的287个美国大都市统计区(MSAs)进行了分析。结果表明,在绿色外商直接投资规模较大且抽象技能强度较高的MSAs中,更有可能实现绿色技术领域的多样化。此外,我们发现地方抽象技能和常规技能的禀赋调节了绿色外商直接投资的影响,分别激活了补偿机制和强化机制。本研究的发现为关于绿色技术多样化决定因素的学术争论提供了新见解,并为设计有效的政策工具以支持区域绿色转型提供了参考。

8. Hold or hurry? Speed of imitation of rivals' innovations in changing technological landscapes

中文标题: 等待还是赶快?技术景观变迁中模仿对手创新的速度

Authors / 作者: Claudio Giachetti, Marco Balzano

DOI: [10.1016/j.respol.2026.105430](#) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Strategic Management, Innovation Management
- **领域:** 战略管理, 创新管理
- **Theories:** Competitive Dynamics, Technological Discontinuity, Dominant Design, Information-based Imitation
- **理论:** 竞争动态, 技术不连续性, 主导设计, 基于信息的模仿

Abstract / 摘要:

Firms seeking fast-mover advantages often confront a critical challenge: not only whether to imitate rivals' innovations but also how quickly to do so. Fast imitation, however, entails risks, particularly in highly uncertain environments. By bridging information-based and rivalry-based theories of imitation with the technological change literature, we investigate how firms adjust their speed of imitation of rivals' technological innovations during periods of technological transition and technological stability. Using a database of 9060 mobile phones and 156 mobile-phone-related technological innovations introduced from 1992 to 2019, we find that a firm's speed of imitation is lower during periods of technological transition following a technological discontinuity compared to periods of technological stability where a dominant design is established. Furthermore, we find that the relationship between technological transitions and a firm's speed of imitation is shaped by three moderating factors: the firm's pioneering orientation, the relative market share position of the technology pioneer, and the visibility of the technological innovation. Our study contributes to the imitation and technological change literature by providing a nuanced understanding of the trade-offs associated with speed of imitation in the context of industry-wide technological shifts.

追求快速追随者优势的企业经常面临一个关键挑战:不仅要决定是否模仿对手的创新,还要决定模仿的速度。然而,快速模仿伴随着风险,尤其是在高度不确定的环境中。通过将基于信息的模仿理论和基于竞争的模仿理论与技术变革文献相结合,我们研究了企业在技术转型期和技术稳定期如何调整其模仿对手技术创新的速度。利用1992年至2019年间推出的9060款手机和156项手机相关技术创新的数据库,我们发现,与确立了主导设计的技术稳定期相比,在技术不连续后的技术转型期,企业的模仿速度较低。此外,我们发现技术转型与企业模仿速度之间的关系受三个调节因素的影响:企业的先驱导向、技术先驱的相对市场份额以及技术创新的可见性。本研究通过对行业范围内技术转移背景下模仿速度相关的权衡提供细致的理解,为模仿和技术变革文献做出了贡献。

- **理论:** 演化经济学, 使命导向型创新政策, 赶超理论

Abstract / 摘要:

This paper builds an international trade macroeconomic agent-based model and introduces state-owned enterprises (SOEs) with an industrial policy mission in a developing country. We evaluate the macroeconomic convergence of the South with respect to the North. Our model suggests that SOEs may significantly enhance technological capabilities and innovation dynamics in the developing country, by accelerating the diffusion of new technologies thereby enhancing the overall productivity growth. They also positively affect market competition and trade dynamics by shaping long-term specialization patterns and development trajectories. The effectiveness of SOEs is driven by "patient capital" and improved technological endowment. Our results show that policies prioritizing the preservation of firms endowed with high technological capabilities, while relieving them from short-term financial constraints, may lead to improved convergence. This emphasizes the importance of strategic selectivity of policymakers, indicating that mission-oriented SOEs represent a relevant policy instrument for catching-up.

本文构建了一个国际贸易宏观经济主体基模型(ABM),并在发展中国家引入了肩负产业政策使命的国有企业(SOEs)。我们评估了南方国家相对于北方国家的宏观经济收敛情况。模型表明,国有企业通过加速新技术的扩散,从而提高整体生产率增长,可以显著增强发展中国家的技术能力和创新动力。它们还通过塑造长期专业化模式和发展轨迹,对市场竞争和贸易动态产生积极影响。国有企业的有效性是由“耐心资本”和技术禀赋的改善所驱动的。结果显示,优先保护具有高技术能力的企业,同时减轻其短期财务约束的政策,可能会带来更好的收敛效果。这强调了政策制定者战略选择的重要性,表明使命导向型国有企业是实现赶超的相关政策工具。

- **理论:** 制度理论, 资源基础观, 国家创新系统, 权变理论

Abstract / 摘要:

This paper investigates why firms facing identical carbon-pricing incentives exhibit heterogeneous decarbonization trajectories. We address this question through a theoretical framework that conceptualizes national institutional quality and innovation-system capabilities as boundary conditions that shape firms' adjustment capacity under emissions trading. Our analysis combines firm-level verified emissions from the EU Emissions Trading System (EU ETS) for 31 European countries over the period 2005-2018 with country-level indicators from the IMD World Competitiveness Center and the World Economic Forum. We provide evidence that firms operating in environments characterized by stronger human capital capabilities, more advanced technological and digital infrastructure, and more supportive legal and scientific frameworks achieve greater emissions abatement. These effects are strongest during Phase III of the EU ETS, when the carbon-pricing constraint became more binding. Overall, our findings show how institutional and capability conditions mediate firms' responses to a harmonized carbon price, offering new insights into the sources of heterogeneous abatement outcomes under a unified emissions trading system. From a policy perspective, our paper contributes to debates on the country level boundary conditions under which emissions trading can support more transformative decarbonization trajectories across heterogeneous national contexts.

本文探讨了为什么面对相同的碳定价激励,企业会表现出异质性的脱碳轨迹。我们通过一个理论框架来回答这一问题,该框架将国家制度质量和创新系统能力概念化为塑造企业在排放交易下调整能力的边界条件。我们的分析结合了2005-2018年间31个欧洲国家在欧盟排放交易体系(EU ETS)中的企业层面核证排放数据,以及来自IMD世界竞争力中心和世界经济论坛的国家层面指标。研究证明,在人力资本能力更强、技术和数字基础设施更先进、法律和科学框架更完善的环境中运营的企业,实现了更大程度的减排。这些效应在EU ETS第三阶段最为显著,此时碳定价约束变得更具强制性。总体而言,我们的研究结果揭示了制度和能力条件如何调节企业对统一碳价格的反应,为统一排放交易体系下异质性减排结果的来源提供了新见解。从政策角度看,本文为关于国家层面边界条件的辩论做出了贡献,即在何种条件下排放交易能够支持跨异质国家背景的更具变革性的脱碳轨迹。

Abstract / 摘要:

Are views on research ethics and questionable research practices discipline-specific? This study investigates attitudes toward research misconduct and questionable research practices (QRPs) among researchers ($n = 11,050$) and ethics reviewers ($n = 144$) across academic fields. Our findings indicate that while most questionable practices are viewed as unacceptable overall, attitudes vary systematically across fields. Medical researchers and ethics reviewers generally viewed questionable practices as less acceptable than researchers and reviewers in other fields. Female researchers and full professors also had stricter attitudes.

关于研究伦理和存疑研究行为(QRPs)的看法是否具有学科特异性?本研究调查了不同学术领域的科研人员($n = 11,050$)和伦理审查员($n = 144$)对研究失范和存疑研究行为的态度。我们的研究表明,虽然大多数存疑行为总体上被认为是不可接受的,但不同领域的态度存在系统性差异。医学研究人员和伦理审查员通常比其他领域的研究人员和审查员认为存疑行为更不可接受。女性研究人员和正教授的态度也更为严格。

- **领域:** 科学政策, 公共管理, 组织行为学
- **Theories:** Academic Engagement, Transdisciplinarity, Incentive Theory
- **理论:** 学术参与, 跨学科性, 激励理论

Abstract / 摘要:

Increasingly complex societal challenges require more transdisciplinary collaboration between researchers and practitioners. Previous studies measured and categorized motivations driving researchers to choose projects involving practitioners and provided empirical evidence for the existence of the 'puzzle-ribbon-gold' typology. However, neither well-known decision factors such as research funding and societal impact nor preferences on the terms of collaboration have yet been integrated in any researcher typology. Here, we use a discrete choice experiment to elicit the preferences of 862 researchers employed at German public research institutes (PRIs) over research project alternatives that vary in six attributes (funding volume, academic success, societal impact, knowledge transfer, knowledge co-production, and practitioner type), of which most had three levels (low, medium, high). We determine that scientists in our sample, on average, attach positive value to engaging with practitioners. However, their preferences are not homogeneous. We find that PRI researchers can be categorized in three latent classes: 'changemakers', who prioritise creating societal impact via public-sector knowledge co-production; 'fundraisers', who focus on acquiring financial resources by transferring knowledge to the private sector; and 'scholars', who concentrate on academic success and avoid practitioners. Thus, we derive inductively a researcher typology that accounts for so far neglected but demonstrably decision-relevant aspects, that is impact, funding, collaboration form, and partner type. Interestingly, various observable individual and contextual variables do not offer much additional information in terms of explaining preference heterogeneity. We conclude by discussing policy instruments to foster academic engagement as well as future research directions. Many scientists inherently value to collaborate with practitioners. A choice experiment and latent class analysis

measure researcher preferences and identify a researcher typology. Researchers may be categorized into impact-seeking changemakers, knowledge-transferring fundraisers, and reclusive scholars. Organisational context explains small parts of researcher preference heterogeneity, but most of it is unobserved.

日益复杂的社会挑战需要研究人员与从业者之间进行更多的跨学科合作。以往的研究衡量并分类了驱动研究人员选择涉及从业者的项目的动机,并为“谜题-勋章-金钱”(puzzle-ribbon-gold)类型的存在提供了实证证据。然而,诸如研究经费和社会影响等众所周知的决策因素,以及对合作条款的偏好,尚未整合到任何研究者类型学中。本研究采用离散选择实验,调查了德国公共研究机构(PRI)的862名研究人员对具有六个属性(资助规模、学术成功、社会影响、知识转移、知识共同生产和从业者类型)的研究项目方案的偏好。我们发现,样本中的科学家平均而言对与从业者接触持积极态度。然而,他们的偏好并非同质。我们发现PRI研究人员可以分为三个潜在类别:“变革者”,优先通过公共部门的知识共同生产创造社会影响;“筹款人”,专注于通过向私营部门转移知识来获取财务资源;以及“学者”,专注于学术成功并回避从业者。因此,我们归纳得出了一种研究者类型学,考虑了此前被忽视但显然与决策相关的方面,即影响、资助、合作形式和伙伴类型。有趣的是,各种可观察的个人和背景变量在解释偏好异质性方面并未提供太多额外信息。最后,我们讨论了政策工具。

- **领域:** 学术创业, 创业教育, 创新政策
- **Theories:** Knowledge Spillover Theory, Social Identity Theory, Human Capital Theory
- **理论:** 知识溢出理论, 社会身份理论, 人力资本理论

Abstract / 摘要:

Studies of knowledge and behavioral spillovers resulting from entrepreneurial training programs of scientists have ignored how such training may influence: (1) scientists who are “managed” by the trainee; (2) scientific peers of the trainee; (3) other agents and institutions in university innovation and entrepreneurial ecosystems. In this study, we quantify such spillovers, based on data from a regional NSF I-Corps program, a seven-week experiential training program that prepares researchers to commercialize their inventions. We find limited evidence of spillovers in terms of changes in entrepreneurial identity, technology transfer climate, championing, or entrepreneurial intentions. Our results suggest that the regional I-Corps program may function as a filtering mechanism, helping scientists identify which entrepreneurial ideas are not ready or suitable for commercialization. The program's role in “weeding out” less viable endeavors can be seen as a form of success, as it prevents the unnecessary investment of time and resources into unpromising ventures. Our results have important implications for entrepreneurial support organizations, which may need to provide greater focus on developing entrepreneurial identity.

关于科学家创业培训项目产生的知识和行为溢出的研究,忽略了此类培训如何影响:(1) 由受训者“管理”的科学家;(2) 受训者的科学同行;(3) 大学创新和创业生态系统中的其他主体和机构。在本研究中,我们基于 NSF I-Corps 区域项目的数据对这些溢出效应进行了量化,该项目是一个为期七周的体验式培训项目,旨在帮助研究人员将其发明商业化。我们发现,在创业身份、技术转移氛围、拥护行为或创业意向的变化方面,溢出效应的证据有限。我们的结果表明,区域性 I-Corps 项目可能起到一种过滤机制的作用,帮助科学家识别哪些创业想法尚未成熟或不适合商业化。该项目在“剔除”可行性较低的努力方面的作用可以被视为一种成功,因为它防止了在沒有前景的创业项目上投入不必要的时间和资源。我们的研究结果对创业支持组织具有重要意义,这些组织可能需要更加关注创业身份的培养。

- **Theories:** Emotions as Social Information (EASI) Theory, Epistemic Leadership, Cognitive Inference Theory
- **理论:** 情绪作为社会信息 (EASI) 理论, 认知领导力, 认知推断理论

Abstract / 摘要:

Open collaboration is increasingly used to advance scientific discovery, yet sustaining participation remains difficult when leadership is informal and problems are open-ended. We study projects from Polymath—a large-scale open collaborative initiative in which mathematicians jointly work on unsolved mathematical problems under conditions of extreme epistemic and social uncertainty. Drawing on public online discussion data from four Polymath projects and using computerized text analysis, we examine how leaders' emotional expressions facilitate continued participation. We find that leaders' emotional expressions are associated with higher crowd participation. This effect does not happen through emotional contagion but through cognitive inference. Participants interpret leaders' emotions as informational cues that help them contribute despite radical uncertainty. The relationship weakens when leaders' emotions are framed as questions rather than affirmative statements, suggesting that clarity in emotional signaling matters for sustaining participation. These findings show how emergent epistemic leadership operates as leaders shape collective inquiry not through formal coordination but by signaling meaning and direction through emotions.

开放协作越来越多地被用于推动科学发现,但当领导力是非正式且问题是开放式的时候,维持参与仍然具有挑战。我们研究了 Polymath 的项目——这是一个大型开放协作计划,数学家们在极端的认知和社会不确定性下共同研究未解决的数学问题。通过对四个 Polymath 项目的公开在线讨论数据进行计算机文本分析,我们探讨了领导者的情绪表达如何促进持续参与。研究发现,领导者的情绪表达与更高的大众参与度相关。这种效应并非通过情绪感染产生,而是通过认知推断实现的。参与者将领导者的情绪解读为信息线索,帮助他们在极端不确定性下做出贡献。当领导者的情绪以提问而非肯定陈述的形式表达时,这种关系会减弱,这表明情绪信号的清晰度对于维持参与至关重要。这些发现展示了涌现出的认知领导力是如何运作的,即领导者不是通过正式协调,而是通过情绪传递意义和方向来塑造集体探究。

- **领域:** 战略管理, 创新政策, 产业组织
- **Theories:** Absorptive Capacity, Certification Effect, Resource-Based View
- **理论:** 吸收能力, 认证效应, 资源基础观

Abstract / 摘要:

This paper studies the impact of public support for innovation on the firm's decision to establish non-technological strategic alliances. These alliances are crucial for firm efficiency and growth as they provide access to new markets, distribution channels,

and expertise. We provide a theoretical discussion of the potential mechanisms at play (absorptive capacity and certification effect) and test them using Uruguayan data spanning the years 2007 to 2015. Our empirical findings present evidence of a positive causal effect of public support for innovation and a firm's propensity to engage in non-technological strategic alliances. Additionally, we show that the absorptive capacity mechanism drives the effect while we find no evidence supporting the certification effect.

本文研究了公共创新支持对企业建立非技术性战略联盟决策的影响。这些联盟对于企业的效率和增长至关重要,因为它们提供了进入新市场、分销渠道和获取专业知识的机会。我们对可能发挥作用的机制(吸收能力和认证效应)进行了理论探讨,并利用2007年至2015年间的乌拉圭数据进行了测试。我们的实证结果证明了公共创新支持与企业参与非技术性战略联盟的倾向之间存在正向因果关系。此外,我们表明吸收能力机制驱动了这一效应,而没有发现支持认证效应的证据。

- **Theories:** Economic Complexity, Relatedness, Optimization Theory
- **理论:** 经济复杂性, 相关性, 优化理论

Abstract / 摘要:

Efforts to apply economic complexity to identify diversification opportunities often rely on diagrams comparing the relatedness and complexity of products, technologies, or industries. Yet, the use of these diagrams, is not based on empirical or theoretical evidence supporting some notion of optimality. Here, we introduce an optimization-based framework that identifies diversification opportunities by minimizing a cost function capturing the constraints imposed by an economy's pattern of specialization. We show that the resulting port folios often differ from those implied by relatedness–complexity diagrams, providing a target-oriented optimization layer to the economic complexity toolkit.

利用经济复杂性来识别多元化机会的努力通常依赖于比较产品、技术或产业的相关性与复杂性的图表。然而,这些图表的使用并非基于支持某种最优性概念的经验或理论证据。本文引入了一个基于优化的框架,通过最小化捕捉经济专业化模式所施加约束的成本函数来识别多元化机会。我们表明,由此产生的投资组合通常与相关性-复杂性图表所暗示的投资组合不同,从而为经济复杂性工具箱提供了一个面向目标的优化层。

- **Theories:** Pluriversality, Decolonial Theory, Epistemic Justice, Knowledge Integration
- **理论:** 多元宇宙性, 去殖民化理论, 认知正义, 知识整合

Abstract / 摘要:

Amid accelerating socio-ecological crises—climate breakdown, mass extinctions and widening inequalities—there is an urgent need for transformative approaches that address root causes rather than symptoms. Disruptive sustainability seeks such transformations; however, it remains theoretically underdeveloped regarding how radically different knowledge systems can work together across the life-cycle of technologies. Drawing on science and technology studies and decolonial scholarship, we build a decolonial typology of knowledge integration in ‘pluriversal technologies’—technologies co-designed, co-produced and co-owned across epistemic communities. We identify four modes: extractive appropriation, parallel operation, adaptive integration and transformative integration. We demonstrate how each appears along the design, production and ownership dimensions of a technology’s life-cycle. This study makes three contributions. First, by demonstrating that a single technology can occupy different integration modes across its life-cycle, it exposes the dimensional unevenness that often derails ostensibly collaborative initiatives. Second, it moves beyond binary treatments of integration to a graded, four-mode framework. Third, it identifies catalytic mechanisms—such as trust building, co-learning, shared governance, recognition and reparation—that enable initiatives to shift between modes. This typology enriches research on disruptive sustainability by clarifying how diverse knowledge systems can collaborate or clash and by mapping routes toward more just, sustainable and effective innovation. Decolonial typology of knowledge integration in pluriversal technologies Four modes: extractive, parallel, adaptive and transformative Integration varies across design, production and ownership phases Identifies mechanisms enabling shifts between integration modes Moves sustainability transitions beyond participatory/not-participatory framings

在社会生态危机(气候崩溃、物种大规模灭绝和不平等加剧)加速的背景下,迫切需要采取针对根源而非症状的变革性方法。颠覆性可持续性寻求此类转型;然而,关于截然不同的知识系统如何在技术的整个生命周期中协同工作,其理论发展仍不充分。借鉴科学技术研究(STS)和去殖民化研究,我们构建了“多元宇宙技术”(pluriversal technologies)中知识整合的去殖民化类型学——即跨认知共同体共同设计、共同生产和共同拥有的技术。我们识别了四种模式:榨取式占用、平行运作、适应性整合和变革性整合。我们展示了每种模式如何在技术生命周期的设计、生产和所有权维度中体现。本研究做出了三项贡献:首先,通过证明单一技术在其生命周期中可以处于不同的整合模式,揭示了经常导致协作倡议失败的维度不平衡性。其次,它超越了对整合的二元处理,提出了一个分级的四模式框架。第三,它识别了催化机制——如信任建立、共同学习、共享治理、认可与补偿——使倡议能够在不同模式之间转换。该类型学通过阐明不同知识系统如何协作或冲突,并绘制通往更公正、可持续和有效创新的路径,丰富了颠覆性可持续性的研究。

18. Policy instrument mix balance for waste management in china: Under the policy-piloting scenario

中文标题: 中国废物管理的政策工具组合平衡:政策试点情景下

Authors / 作者: Jingjing Zhang, Yan Yan, Yinghuan Wang, Guifang Luo

DOI: [10.1016/j.respol.2026.105450](#) **Published / 发表日期:** 2026-05-01

Fields & Theories / 领域与理论:

- **Fields:** Public Policy, Environmental Management, Innovation Policy
- **领域:** 公共政策, 环境管理, 创新政策
- **Theories:** Policy Mix Theory, Experimentalist Governance, Instrument Choice Theory
- **理论:** 政策组合理论, 实验主义治理, 工具选择理论

Abstract / 摘要:

Within a policy instrument mix, among its characteristics, balance holds a significant position. However, studies have presented mixed findings on its effect on policy effectiveness. To address this issue, we untangled the impact of instrument combinations comprising different instrument types and empirically investigated their impact on policy outcomes. Furthermore, we considered China’s policy-piloting practice, which is a mechanism through which a policy is tested in certain areas before nationwide implementation, as a contingent factor in the instrument mix–outcome relationship. By relying on the context of waste management in China, we manually coded 4762 policy documents from 73 cities between 2012 and 2020. We used quasi-experimental methods, specifically propensity score matching and two-stage residual inclusion, but did not find statistically significant evidence supporting the impact of the instrument mix balance on policy performance. We found that the combination of market-based and voluntary (MV) policies can best promote policy effectiveness, whereas the combination of command and market-based (CM) policies or command and voluntary (CV) policies can impede it. The results show that policy

piloting positively moderates the effects of MV and CV policy combinations. The findings have implications not only for policymaking and management but also for research on the instrument mix balance, instrument combinations, and policy piloting.

在政策工具组合的特征中,平衡占据重要地位。然而,关于其对政策有效性影响的研究结论不一。为解决这一问题,我们梳理了由不同工具类型组成的工具组合的影响,并实证研究了它们对政策结果的影响。此外,我们将中国的政策试点实践(即在全国推广前在特定地区测试政策的机制)视为工具组合与结果关系中的调节因素。基于中国废物管理的背景,我们手动编码了2012年至2020年间73个城市的4762份政策文件。我们使用了准实验方法,特别是倾向得分匹配(PSM)和两阶段残差纳入法(2SRI),但未发现支持工具组合平衡对政策绩效有显著影响的统计证据。我们发现,市场型与自愿型(MV)政策的组合最能促进政策有效性,而命令型与市场型(CM)或命令型与自愿型(CV)政策的组合则会阻碍有效性。结果显示,政策试点正向调节了MV and CV政策组合的效果。这些发现不仅对政策制定和管理具有启示意义,也对工具组合平衡、工具组合及政策试点的研究具有参考价值。

Abstract / 摘要:

This paper investigates the relationship between international postdoctoral stays and academic career advancement among researchers returning to the Italian university system. Using a unique dataset of Italian PhD holders observed over a 30-year period, we analyze how international postdoctoral stays are associated with two key career outcomes: (i) the time between PhD completion and first appointment as Assistant Professor (time-to-entry), and (ii) the time between Assistant Professor appointment and promotion to Associate Professor (time-to-promotion). We identify international postdoctoral stays by tracing foreign affiliations in researchers' publication records and examine how their association with career progression is moderated by institutional inbreeding, home-country linkages, and the persistence of international research networks. To explore these relationships, we apply a Cox proportional hazards model combined with entropy balancing. Our findings were validated by using curriculum vitae information for a subsample of researchers. We found that international postdoctoral stays are associated with slower entry into the academic system but are positively related to shorter time-to-promotion. Notably, this association is strongest for researchers promoted at universities other than their alma mater. We also observe that maintaining a strong home-country publishing network is associated with quicker entry as Assistant Professor, while sustained collaboration in postdoc-period co-author networks is linked to faster promotion to Associate Professor. Postdocs returnees to the Italian academic system take longer time to get an Assistant Professorship position. Controlling for productivity, postdocs returnees get promoted faster. Postdoctoral stays longer than 18 months at prestigious foreign host institutions are associated with faster promotion in "non-inbreeding" universities. The Italian academic labor market has increasingly rewarded quality and mobility among recent PhD cohorts.

本文研究了返回意大利大学系统的研究人员中,国际博士后经历与学术职业晋升之间的关系。利用一个涵盖30年间意大利博士学位持有者的独特数据集,我们分析了国际博士后经历与两个关键职业结果的关联:(i)获得博士学位到首次被任命为助理教授的时间(入职时间),以及(ii)从助理教授任命到晋升为副教授的时间(晋升时间)。我们通过追踪研究人员出版记录中的海外机构署名来识别国际博士后经历,并考察了机构内近亲繁殖、母国联系以及国际研究网络的持久性如何调节其与职业进展的关系。为了探索这些关系,我们采用了Cox比例风险模型并结合了熵平衡法。通过对部分研究人员简历信息的验证,我们发现国际博士后经历与进入学术系统的速度较慢有关,但与较短的晋升时间呈正相关。值得注意的是,这种关联在非母校晋升的研究人员中最为显著。我们还观察到,保持强大的母国出版网络与更快地入职助理教授相关,而博士后期间合作者网络的持续合作则与更快地晋升为副教授相关。返回意大利学术

系统的博士后需要更长的时间才能获得助理教授职位,但在控制生产力的情况下,回国博士后的晋升速度更快。超过18个月的博士后停留...

- **理论:** 库恩范式理论, 累积性知识生产, 认识论多元化

Abstract / 摘要:

This paper offers a critical reassessment of claims that scientific progress is best understood through the disruptiveness of new research. Park, Leahey and Funk in Nature (2023) have re-opened the debate by presenting results using the citation-based 'CD index' to assess the extent to which individual academic publications are consolidating or disruptive. Analyzing Park et al. as a focal point of these claims, we challenge the adequacy of this approach to capture both genuine scientific disruption and scientific progress, particularly within the social sciences. Drawing on philosophy and sociology of science, we show that scientific progress is predominantly cumulative rather than disruptive, and that papers' high disruptiveness scores may often reflect phenomena such as pseudo-novelty or fragmentation rather than true epistemic breakthroughs. Our analysis demonstrates that in fields marked by intellectual pluralism and weak paradigmatic consensus, apparent disruptiveness may be an artifact of scholarly practices rather than an indication of substantive innovation. Hence, measures of disruptiveness appear ill-suited as a marker of scientific progress – as used in individual and collective research evaluations. Instead, we advance a constructive agenda by proposing that scientific progress is best conceptualized not as a dichotomy between cumulation and disruptiveness, but as a multi-dimensional process embracing elements of both disruption and consolidation within an overarching cumulative trajectory, whereby established knowledge is iteratively refined, rejected, or recombined in the light of new evidence or insight. By rethinking how scientific advancement is measured and cultivated, and suggesting ways to foster cumulative scientific progress, this article contributes to the theory and practice of research evaluation.

本文对“科学进步应通过新研究的颠覆性来理解”这一观点进行了批判性重新评估。Park、Leahey和Funk在《自然》(2023)上发表的研究利用基于引文的“CD指数”评估单篇学术论文的巩固性或颠覆性,从而重新开启了这一辩论。我们以Park等人的研究为焦点,质疑了这种方法在捕捉真正的科学颠覆和科学进步(特别是在社会科学领域)方面的充分性。借鉴科学哲学和科学社会学,我们指出科学进步主要是累积性的而非颠覆性的,论文的高颠覆性得分往往反映的是伪新颖性或碎片化等现象,而非真正的认识论突破。我们的分析表明,在以智力多元化和范式共识薄弱为特征的领域,表面的颠覆性可能是学术实践的产物,而非实质性创新的指标。因此,颠覆性指标似乎不适合作为个人和集体研究评估中科学进步的标志。相反,我们提出了一个建设性的议程,建议将科学进步概念化为一个多维过程,而非累积与颠覆之间的二元对立。它在总体的累积轨迹中包含颠覆和巩固的元素,即既有知识根据新的证据或见解进行迭代改进、否定或重组。通过重新思考科学进步的衡量和培养方式,并提出促进累积性科学进步的方法,本文做出了贡献。

- **Theories:** Institutional Theory, Bricolage, Institutional Multiplicity, Hybrid Logics
- **理论:** 制度理论, 拼凑, 制度多样性, 混合逻辑

Abstract / 摘要:

The sovereign right of self-governance for Native nations has been both contentious and unevenly applied throughout its deeply rooted history in the United States. As a vital aspect of tribal sovereignty, this research explores the outcomes of entrepreneurial self-determination of Native American Tribes. Using a mixed methods approach, our study leans on qualitative interviews of 18 tribal leaders to catalyze a quantitative analysis consisting of data from 161 Native American Tribes collected from the US Federal Register, the National Indian Gaming Commission, and from a Freedom of Information Act request of the US Department of Interior. Data are used to better understand the role that entrepreneurial self-determination plays in Native American Tribes and its effects on economic and cultural sovereignty. What we find is that the institution of sovereignty itself is a site of innovation, where tribal leaders are not only defending but innovating it, reinterpreting what it means and how it functions through modern entrepreneurial mechanisms. The research contributes to innovation policy and institutional theory by theorizing sovereignty as a contested institution that is reshaped by entrepreneurial self-determination under conditions of institutional multiplicity. Sovereignty is an evolving institution continually shaped through innovation and tribal governance. Entrepreneurial self-determination reshapes sovereignty's boundaries and sovereignty-as-innovation. Tribal leaders work in institutional voids, adapting dominant economic models to local realities. Institutional entrepreneurship in Native Nations tests boundaries through bricolage and hybridized logics. Innovating sovereignty can bring economic gains but may involve significant cultural tradeoffs for tribes.

对于原住民国家而言,自治的主权权利在美国根深蒂固的历史中既充满争议,又在应用上参差不齐。作为部落主权的一个重要方面,本研究探讨了美国原住民部落创业自决的结果。本研究采用混合方法,通过对18位部落领袖的定性访谈,催化了对161个美国原住民部落的定量分析,数据来源于美国联邦公报、国家印第安博彩委员会以及通过《信息自由法》向美国内政部获取的资料。数据用于深入理解创业自决在原住民部落中的作用及其对经济和文化主权的影响。研究发现,主权制度本身就是一个创新的场所,部落领袖不仅在捍卫主权,还在对其进行创新,通过现代创业机制重新诠释其含义和运作方式。本研究通过将主权理论化为一个受制度多样性影响、并被创业自决重塑的争议性制度,对创新政策和制度理论做出了贡献。主权是一个不断演进的制度,通过创新和部落治理持续塑造。创业自决重塑了主权的边界以及“主权即创新”的内涵。部落领袖在制度真空(institutional voids)中工作,使主流经济模式适应当地现实。原住民国家的制度创业通过拼凑(bricolage)和混合逻辑测试边界。创新主权可以带来经济收益,但也可能涉及部落重大的文化权衡。

Abstract / 摘要:

Technological diversification is crucial for regions to foster innovation and, therefore, to support economic growth. In this paper, we study how different types of technological diversification affect the performance of regional economies. We focus on the effect of changes in technological relatedness and unconventionality – as indicators of related and unrelated diversification – on GDP and employment growth in European regions. Leveraging information on regional economic performances and patents

filed at the European Patent Office, we estimate Panel Vector Autoregression models and generate Impulse Response Functions to assess to what extent and with what persistence relatedness and unconventionality affect regional economic performances. Our findings, which have implications for the design of new place-based innovation policies, reveal that increases in technological relatedness have a short-term positive effect on employment growth but a negative effect on GDP growth. Conversely, increases in technological unconventionality have a higher and long-lasting positive impact on GDP growth but no effect on employment growth.

技术多元化对于区域促进创新并进而支持经济增长至关重要。本文研究了不同类型的技术多元化如何影响区域经济绩效。我们关注技术相关性(relatedness)和非常规性(unconventionality)的变化——作为相关多元化和非相关多元化的指标——对欧洲区域国内生产总值(GDP)和就业增长的影响。利用区域经济绩效和在欧洲专利局申请的专利信息,我们估计了面板向量自回归(Panel VAR)模型并生成脉冲响应函数(IRF),以评估相关性和非常规性在何种程度上以及以何种持续性影响区域经济绩效。我们的研究结果对设计新的基于地点的创新政策具有启示意义,结果显示技术相关性的增加对就业增长有短期积极影响,但对GDP增长有负面影响。相反,技术非常规性的增加对GDP增长具有更高且持久的积极影响,但对就业增长没有影响。

- **Theories:** Technological Innovation Systems, Social Construction of Technology, Multi-Level Perspective, Policy Mixes
- **理论:** 技术创新系统, 技术的社会建构, 多层视角, 政策组合

Abstract / 摘要:

It is well established within the transition literature that emerging technologies are subject to interpretive flexibility, allowing for the pursuit of, and contestation among, multiple innovation directions. The role of ideas in shaping transition pathways and the formation of sociotechnical niches, in particular, have attracted considerable attention. However, what is relatively less explored is how ideational dynamics mediate between a technology innovation system (TIS) and the broader sociotechnical system. To investigate these dynamics, we bridge the social construction of technology literature with perspectives on TIS, sociotechnical transitions and policy mixes. We demonstrate our novel framework through analysis of the interpretive flexibility of smart grids as it manifests in policy mixes along with the innovation directions being advanced – i.e. integrated microgrids, super grids and a combined model. Our methodology incorporates document analysis as well as semi-structured interviews with stakeholders in the electric power system. Our core contribution is the development of a novel framework to reveal interpretive dynamics flowing among policy mixes, TISs and wider system contexts. Results show how the policy mix helps to shape three innovation directions for emerging smart grids that have important implications for the orientation of the TIS and its interactions with the broader sociotechnical system. From this, our findings indicate that policy mix incoherence should not always be considered as a detriment as it can also help to generate new and productive innovation directions in early transition phases.

转型文献中已经确立,新兴技术具有解释灵活性,允许追求多个创新方向并在其间产生争论。观念在塑造转型路径和形成社会技术利基(niches)中的作用尤其受到关注。然而,观念动力学如何在技术创新系统(TIS)与更广泛的社会技术系统之间起到中介作用,目前研究相对较少。为了调查这些动力学,我们将技术的社会建构文献与TIS、社会技术转型和政策组合的视角相结合。我们通过分析智能电网在政策组合中表现出的解释灵活性以及正在推进的创新方向(即集成微电网、超级电网和组合模式)来展示我们的新框架。我们的方法结合了文件分析以及对电力系统利益相关者的半结构化访谈。核心贡献是开发了一个新框架,以揭示在政策组合、TIS和更广泛的系统背景之间流动的解释动力学。结果表明,政策组合如何帮助塑造新兴智能电网的三个创新方向,这些方向对TIS的导向及其与更广泛社会技术系统的互动具有重要影响。据此,我们的发现表明,政策组合的不连贯性并不总是被视为不利因素,因为它在转型早期阶段也有助于产生新的、富有成效的创新方向。

24. The making of a funding call text: How funding professionals craft interdisciplinary research opportunities for Social Sciences and Humanities

Abstract / 摘要:

Whilst it is well-known that research funding significantly shapes research landscapes, there is too little known about the processes that sit behind the funding opportunities — and specifically the publicly-shared funding call texts. The aim of this paper is therefore to investigate the processes experienced by EU funding professionals in authoring and operationalising funding call texts, to surface the different ways in which interdisciplinarity is understood. In seeing these texts as artefacts of situated practices, we conducted a case study on the European Union (EU) Cluster 5 Work Programmes (on climate, energy, mobility) as part of Horizon Europe, including its predecessor calls in Horizon2020. From our analysis of 15 semi-structured interviews, we identified 10 roles that funding professionals adopt, across three stages of a funding call text lifetime: within the Call Creation stage (led by European Commission Policy Officers), there was Steering, Feedback Integration, Quality Control, and Disruption; the Call Dissemination stage (led by EU National Contact Points) involved Awareness-raising, Matchmaking, and Gap-spotting; and the Proposal Selection stage (led by Commission Project Officers overseeing evaluations) involved Expertise Cultivation, Consensus-building, and being a Critical Friend. This study provides empirically-driven insights into the dynamic social processes and institutional interactions, through which funding calls are negotiated, interpreted and ultimately travel. As such, we also contribute to literature on interdisciplinarity, by examining the ways in which different forms of interdisciplinarity are imagined, designed-in, rewarded and excluded by funders. We make clear how integrating Social Sciences and Humanities, and doing interdisciplinarity, consistently represents hard work by funding professionals. How funding professionals produce and use funding call texts affects research landscapes. Horizon Europe Pillar 2 funding is especially complex as it is driven by EU policy priorities. 10 professional roles directly shaped the forms of interdisciplinarity being funded. Professionals must work hard to ensure opportunities for Social Sciences and Humanities. Professionals demonstrate partial agency in steering funding processes.

虽然众所周知研究资助显著塑造了研究格局,但对于资助机会背后的过程——特别是公开分享的资助征集文本——却知之甚少。因此,本文旨在调查欧盟资助专业人士在撰写和执行资助征集文本时所经历的过程,以揭示理解跨学科性的不同方式。通过将这些文本视为情境实践的产物,我们对作为“欧洲地平线”(Horizon Europe)一部分的欧盟第5集群工作计划(关于气候、能源、交通)及其在“地平线2020”中的前身征集进行了案例研究。通过对15个半结构化访谈的分析,我们确定了资助专业人士在资助征集文本生命周期的三个阶段中所承担的10个角色:在征集创建阶段,包括引导、反馈整合、质量控制和颠覆;征集传播阶段涉及意识提升、撮合和缺口发现;提案选择阶段涉及专业知识培养、共识建立和充当“批判性朋友”。本研究为资助征集被协商、解释并最终传播的动态社会过程和机构互动提供了实证驱动的见解。因此,我们还通过考察资助者想象、设计、奖励和排除不同形式跨学科性的方式,为有关跨学科性的文献做出了贡献。我们明确了整合社会科学和人文科学以及开展跨学科研究的过程。

25. The sources of technological complexity in regions

中文标题: 区域技术复杂性的来源

Abstract / 摘要:

This study investigates the origins and evolution of technological complexity in Canadian regions using patent records linked to firm-level ownership and geographical data. Since 2000, larger Canadian cities have experienced a notable increase in levels of technological complexity. The analysis examines the determinants of this complexity, with a particular focus on the role of intra- and inter-firm collaborations across different geographical scales. The findings reveal the significant contributions of multilocal firms and intra-organizational collaborations to the development of more complex technologies in regions. Further analysis shows that the introduction of complex technologies does not stem from novel recombinations of components but rather from combinations developed internationally by firms, often coupled with combinations originating within the host region.

本研究利用与企业层面所有权和地理数据相关联的专利记录,调查了加拿大各地区技术复杂性的起源和演变。自2000年以来,加拿大主要城市的技术复杂性水平显著提高。分析探讨了这种复杂性的决定因素,特别关注了不同地理尺度下企业内部和企业间协作的作用。研究结果揭示了多地经营企业和组织内部协作对区域开发更复杂技术的显著贡献。进一步分析表明,复杂技术的引入并非源于组件的新颖重组,而是源于企业在国际上开发的组合,且通常与源自东道地区的组合相结合。

Abstract / 摘要:

This study examines how disruptive sustainable business models (DSBMs) drive sustainability transitions across micro, meso, and macro levels of socio-technical systems. Analyzing 29 case companies, the research identifies five key drivers of DSBM development and scaling: technological experimentation, entrepreneurial initiative, user-driven innovation, industry collaboration, and regulatory support. These drivers interact with seven critical factors: industry dynamics, organizational structure, geographical context, innovation ecosystems, regulatory environment, policy coherence, and market readiness that shape how DSBMs evolve from niche innovations to regime-level change. Drawing on and extending the Multi-Level Perspective (MLP) framework, the study demonstrates how firms actively couple business model innovation with institutional change across levels. The findings show that DSBMs achieve large-scale impact by leveraging policy mixes that destabilize unsustainable practices while supporting innovation scaling. The role of adaptive governance frameworks and cross-sectoral policy coherence is crucial for aligning DSBMs with global sustainability goals, such as the Paris Agreement. Moreover, the study offers a novel contribution by conceptualizing DSBMs as recursive and cross-scalar instruments of transition agency. This research contributes to the literature on sustainability transitions by integrating business model innovation more explicitly into MLP theory and providing evidence of how firm-level agency interacts with structural change. Disruptive sustainable business models operate across niche,

regime, and landscape levels. Business model innovation drives sustainability transitions beyond technological change. Policy fragmentation constrains the scaling of disruptive sustainable business models. Adaptive governance enables firms to challenge and reconfigure unsustainable regimes. Evidence from 29 firms reveals sector-specific transition pathways.

本研究探讨了颠覆性可持续商业模式(DSBMs)如何推动社会技术系统在微观、中观和宏观层面的可持续转型。通过对29家案例公司的分析,研究识别了DSBM开发和规模化的五个关键驱动因素:技术实验、创业倡议、用户驱动的创新、行业协作和监管支持。这些驱动因素与七个关键因素相互作用:行业动态、组织结构、地理背景、创新生态系统、监管环境、政策协调性和市场成熟度,这些因素共同塑造了DSBM如何从利基创新演变为体制层面的变革。本研究借鉴并扩展了多层次视角(MLP)框架,展示了企业如何主动将商业模式创新与跨层面的制度变革相结合。研究发现,DSBM通过利用政策组合来打破不可持续的惯例,同时支持创新规模化,从而实现大规模影响。自适应治理框架和跨部门政策协调对于使DSBM与全球可持续发展目标(如《巴黎协定》)保持一致至关重要。此外,本研究通过将DSBM概念化为递归且跨尺度的转型代理工具,做出了新颖的贡献。本研究通过将商业模式创新更明确地整合到MLP理论中,并提供企业层面能动性 with 结构性变革相互作用的证据,丰富了可持续转型的文献。
