Abstract / 摘要:

Research Summary: Organizations often struggle to identify promising innovations that balance novelty and feasibility in multidisciplinary domains, yet how does evaluator expertise heterogeneity shape these assessments? This study examines how evaluator expertise influences innovation evaluation through a field experiment with National Aeronautics and Space Administration's (NASA) Astrobee Robotic Arm Challenge, involving 354 evaluators assessing 101 solutions. Domain-spanning evaluators assign higher novelty ratings while maintaining similar feasibility ratings compared to domain-specific evaluators. Domain-adjacent evaluators show higher ratings on both dimensions. Human-LLM analysis of 3007 evaluator comments reveals a two-stage process: feasibility filtering (evaluating minimum viability) followed by integrative assessment (evaluating enhancement potential). Different expertise types serve complementary functions: domain-spanning evaluators recognize enhancement potential while maintaining rigorous standards; domain-adjacent evaluators show openness to novel approaches; domain-specific evaluators ensure technical rigor. These findings suggest effective innovation evaluation depends on strategically combining Received: 15 June 2023 Revised: 11 October 2025 Accepted: 11 December 2025 DOI: 10.1002/smj.70060 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–65. wileyonlinelibrary.com/journal/smj 1 complementary expertise types rather than identifying optimal individual evaluators. **Managerial Summary:** Organizations often struggle to identify innovations that are both novel and feasible, risking missed breakthroughs or wasted resources. We study how evaluator expertise shapes innovation assessments in a field experiment with NASA, in which 354 evaluators reviewed 101 robotic arm designs. Evaluators with expertise spanning multiple domains recognize more novel yet feasible ideas. Those with single-domain expertise provide essential technical gatekeeping but overlook cross-domain improvements, while adjacent-field experts are more open but less rigorous. Organizations can strengthen innovation selection by strategically combining these complementary expertise types—using domain-specific experts for initial feasibility screening and domain-spanning experts to identify integrative opportunities—rather than seeking one “ideal” evaluator. **KEYWORDS** boundary spanning expertise, expertise heterogeneity, field experiment, innovation evaluation, novelty-feasibility assessment 1 |

研究摘要: 组织在多学科领域往往难以识别能够平衡新颖性和可行性的具有前景的创新, 然而评估者的专家知识异质性如何塑造这些评估? 本研究通过美国国家航空航天局 (NASA) 的 “Astrobee 机械臂挑战赛” 这一实地实验, 对 354 名评估者评估的 101 个方案进行了分析。研究发现, 与特定领域评估者相比, 跨领域评估者在保持相似可行性评分的同时, 赋予了更高的新颖性评分。邻近领域评估者在两个维度上均表现出更高的评分。通过对 3007 条评估者评论的人机 (Human-LLM) 联合分析, 揭示了一个两阶段过程: 可行性过滤 (评估最低可行性) 和随后的综合评估 (评估提升潜力)。不同类型的专家知识发挥着互补功能: 跨领域评估者在保持严格标准的同时识别提升潜力; 邻近领域评估者对新颖方法表现出开放性; 特定领域评估者则确保了技术的严谨性。这些发现表明, 有效的创新评估取决于不同类型专家知识的战略性组合。

Abstract / 摘要:

Research Summary: Firm technological research has the potential to spawn multiple applications. Despite recognizing such potential, past literature disagrees on the process through which firms discover and grow new applications out of their past technological research. I examine this question in the context of deep learning, taking a question-driven approach. Difference-in-difference analysis suggests that firms radically increased cumulative investments in past deep learning research upon signals indicating elevated application potential of deep learning. Furthermore, rather than investing in proprietary efforts, firms disclosed their cumulative development trajectories to engage external innovation efforts from which they learn and build. Grounded in these findings, I propose that the discovery and growth of new applications of past research entails unfolding innovation interdependence which motivates firms to co-evolve with external innovators. **Managerial Summary:** Firm technological research has the potential to spawn multiple applications. This article examines how firms cumulatively invest in their past technological research to grow new applications in the context of deep learning. Employing a difference-in-difference approach, analysis suggests that firms Received: 1 April 2024 Revised: 19 November 2025 Accepted: 27 November 2025 DOI: 10.1002/smj.70045 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Abstract / 摘要:

Research Summary: How do analysts react to communication about firms' strategies? Research has shown that executive communication influences markets, but we know little about reactions to the deeper strategy content communicated. Drawing from research on how evaluative frames and expectation violations shape cognition, we show that when executives focus on growth strategies, analysts react by becoming more curious and analytically intensive. These changes in cognition partially mediate a positive effect on analysts' evaluations. Further, we consider two situations that reveal how analysts react to information that reinforces or violates their expectations, demonstrating different analyst reactions to similar strategies among S&P 500 firms. In doing so, we contribute new theory about how the evaluative assumptions of these influential market actors change and can be influenced by managerial framing. Managerial Summary: This paper focuses on how securities analysts react to executive communications about their business' strategies. We know that top executive communications influence markets, but this Received: 1 February 2023 Revised: 10 December 2025 Accepted: 14 December 2025 DOI: 10.1002/smj.70063 This is an open access article under the terms of the Creative Commons Attribution-NonCommercial-NoDerivs License, which permits use and distribution in any medium, provided the original work is properly cited, the use is non-commercial and no modifications or adaptations are made. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–32. wileyonlinelibrary.com/journal/smj 1 paper probes further to understand reactions to the specific strategies that are communicated. We show that when executives focus on new growth strategies, this piques analyst interest. Specifically, we find that this makes analysts more curious and analytically intensive, thereby shaping their forecasts and evaluations. However, we find that analyst reactions also depend on how well the strategies that executives talk about fit with what is expected from the company. When the strategy articulated aligns with expectations, firms are rewarded with yet stronger evaluations. In contrast, when a strategy does not align with expectations, firms are punished with lower evaluations. **KEYWORDS** evaluative frames, expectation violation theory, growth strategies, securities analyst evaluations, top executive communication 1 |

研究摘要：分析师如何对公司战略相关的沟通做出反应？研究表明，高管沟通会影响市场，但我们对分析师如何反应所传达的深层战略内容知之甚少。借鉴关于评估框架和预期违背如何塑造认知的研究，我们展示了当高管关注增长战略时，分析师的反应会变得更具有好奇心且分析强度更高。这些认知变化在一定程度上中介了对分析师评估的积极影响。此外，我们考虑了两种情况，揭示了分析师如何对强化或违背其预期的信息做出反应，展示了标普 500 指数企业中分析师对相似战略的不同反应。通过这种方式，我们贡献了关于这些有影响力的市场参与者的评估假设如何改变以及如何受到管理层框架影响的新理论。管理摘要：本文聚焦于证券分析师如何回应高管关于其业务战略的沟通。我们已知高层管理人员的沟通会影响市场，但其作用机制在于如何激发分析师的认知参与。

Abstract / 摘要:

Does gaining a foothold in the upper echelons of the corporate landscape carry different implications for women and men? We address this question by examining gender differences in how serving on the boards of prominent firms leads to new board appointments. While prominent affiliations are widely recognized as advantageous, research has yet to ask whether these benefits vary by gender. Using data on the population of directors in the FTSE-100 between 2010 and 2017, we find that women are, on average, more likely than men to obtain additional board appointments, consistent with prior literature showing that pressures to increase diversity stimulate demand for incumbent women relative to men. However, serving on more-prominent boards within the FTSE-100 increases men's likelihood of obtaining new appointments but decreases it for women. Thus, women's advantage diminishes and eventually reverses, becoming a disadvantage, as firm prominence increases. Our systematic evaluation of potential demand- and supply-side explanations for this pattern finds limited support for both. We propose, instead, that women's experiences of greater scrutiny and of informal demands on more-prominent boards may shape their willingness to pursue additional appointments. We highlight the dual role of prominent affiliations as sources of both opportunity and constraint, with implications for individual careers and organizational diversity.

在企业高层占有一席之地，对女性和男性是否具有不同的影响？我们通过考察在知名企业董事会任职如何导致新的董事任命，来探讨这一问题中的性别差异。虽然知名机构的任职经历被广泛认为是优势，但研究尚未询问这些收益是否因性别而异。利用 2010 年至 2017 年间富时 100 指数 (FTSE-100) 全体董事的数据，我们发现平均而言，女性比男性更有可能获得额外的董事任命，这与此前文献显示的增加多样性的压力刺激了对现任女性董事的需求一致。然而，在知名度更高的董事会任职增加了男性获得新任命的可能性，却降低了女性的可能性。因此，随着企业知名度的提高，女性的优势会减弱并最终反转为劣势。我们对这种模式潜在的需求侧和供给侧解释进行了系统评估，发现两者得到的支持都有限。相反，我们提出，女性在更知名的董事会中所经历的更高强度的审查和非正式要求，可能会影响她们追求额外任命的意愿。我们强调了知名任职经历作为机会和约束来源的双重角色，这对个人职业生涯和组织多样性都具有重要影响。

Abstract / 摘要:

Many scholars assume that initiatives to promote gender and racial pay equality are largely performative, helping firms appear socially responsible while making little progress. However, the extent to which such initiatives are genuinely supported may depend on the ideological leaning of the field in which they occur. We propose that the higher the ratio of liberals in an industry or occupation, the more its members will be guided by logics that support the equal distribution of resources between gender and racial groups. Using large-scale archival samples of U.S. employees and recent data on U.S. firms and nonprofit organizations, we find support for our theory. The results indicate that membership in liberal-leaning industries and occupations is associated with stronger support for the use of pro-equality practices. Liberal-leaning industries and occupations also showed greater progress toward gender and racial pay equality over time. Notably, we controlled for various alternative explanations, such as demographic and geographic differences between fields. Thus, this paper suggests that the political composition of a field may give rise to logics and norms that shape how efforts to promote group equality are understood and pursued.

许多学者认为, 促进性别和种族薪酬平等的倡议在很大程度上是表演性的, 其作用是帮助企业表现出社会责任感, 但进展甚微。然而, 这些倡议在多大程度上得到真诚支持, 可能取决于其所在领域的意识形态倾向。我们提出, 一个行业或职业中自由派的比例越高, 其成员就越会受到支持在性别和种族群体之间平等分配资源的逻辑的引导。利用美国雇员的大规模档案样本以及美国企业和非营利组织的最新数据, 我们发现研究假设得到了支持。结果表明, 身处倾向于自由派的行业和职业与对使用促进平等实践的更强支持相关联。随着时间的推移, 自由派倾向的行业和职业在性别和种族薪酬平等方面也表现出更大的进步。值得注意的是, 我们控制了各种解释, 如不同领域之间的人口统计学和地理差异。因此, 本文认为, 一个领域的政治构成可能会产生特定的逻辑和规范, 从而塑造人们对促进群体平等努力的理解和追求方式。

Abstract / 摘要:

Are employees willing to leave when their employer violates societal norms? We develop an event-based framework for understanding employee turnover in response to stakeholder violations—publicly announced, regulator-sanctioned harms to stakeholders. We theorize that intense violations prompt some employees to reassess their affiliation due to reputational concerns, especially when violations are broad in scope, occur in rapid succession, or diverge from past patterns. These features increase the likelihood that observers, including peers and future employers, will view the misconduct as systemic, elevating reputational risk for those who remain. Using eight years of job history data from 735 large U.S. public companies, sourced from LinkedIn by Revelio Labs, we find that violations amounting to 5% of a company's annual revenues translate into a 3.93% increase in employee turnover. Turnover rates rise further when violations are broad, rapid, or historically atypical. Departing employees tend to join firms with fewer prior violations, indicating a form of values-based sorting. We also estimate the financial toll of violation-induced turnover for representative firms in our sample. Our findings offer a new lens on stakeholder violations as organizational events that drive interorganizational migration.

当雇主违反社会规范时，员工是否愿意离职？我们开发了一个基于事件的框架，用于理解员工对利益相关者侵害（公开宣布、受监管机构制裁的对利益相关者的损害）的离职反应。我们理论化认为，严重的侵害行为会促使一些员工因声誉担忧而重新评估其归属关系，尤其是当侵害行为范围广泛、发生迅速或偏离过去模式时。这些特征增加了包括同行和未来雇主在内的观察者将不当行为视为系统性行为的可能性，从而提升了留任者的声誉风险。通过使用 Revelio Labs 从 LinkedIn 获取的 735 家美国大型上市公司八年的职业历史数据，我们发现，金额相当于公司年收入 5

- **理论:** 身份理论, 身份工作, 自我清晰度, 角色理论

Abstract / 摘要:

How do people develop and leverage self-definitions of who and what they are not, or their “not-me” identities, to navigate their work lives? In contrast to dominant portrayals of not-me identities as negative or oppositional, we explore how they can serve as resources in identity work. Drawing on a grounded theory study of 80 interviews with independent workers and clients, we identify a process we call “identity filtering.” Through this process, individuals identify and disconfirm misaligned role or relational elements, cultivating not-me identity repertoires that serve as reference points for how they engage in and shape their role-relationships. We identify two distinct pathways: some individuals enact their not-me identities through setting boundaries and role screening, which in turn enhance their self-clarity. Others suppress their not-me identities by engaging in enmeshment, which generates emotional strain. These diverging paths emerge

through distinct underlying mechanisms: self-worth and desire for control both enable enactment, while adaptability constrains it. By reconceptualizing not-me identities as resources, this study advances identity theory and deepens understanding of how (independent) workers navigate fluid role-relationships and uncertainty in contemporary work.

人们如何通过发展和利用关于“自己是谁”以及“自己不是什么”的自我定义（即“非我”身份）来应对其职业生活？与普遍将“非我”身份描绘成负面或对立面的观点不同，我们探讨了它们如何作为身份工作的资源。基于对 80 名自由职业者和客户访谈的扎根理论研究，我们确定了一个称为“身份过滤”的过程。通过这一过程，个人识别并否定不匹配的角色或关系要素，培养出“非我”身份库，作为他们参与和塑造角色关系的参考点。我们确定了两种不同的路径：一些人通过设定界限和角色筛选来践行其“非我”身份，这反过来增强了他们的自我清晰度。其他人则通过卷入（enmeshment）来压抑其“非我”身份，这产生了情绪压力。这些分歧路径通过不同的底层机制产生：自我价值感和控制欲都促成了践行，而适应性则制约了它。通过将“非我”身份重新定义为资源，本研究推进了身份理论，并深化了对（自由）职业者如何在当代工作中应对流动角色关系和不确定性的理解。

- **理论:** 角色理论, 编排, 观点采择, 窥视行为的商业化

Abstract / 摘要:

Voyeurism offers audiences a window into the private lives of others. Given the widespread appeal of voyeurism, it is unsurprising that organizations have sought to commercialize voyeuristic events across various industries. Prior research has focused on the audience's role in voyeuristic experiences. However, those being observed (i.e., observees) play an essential role in shaping audiences' voyeuristic experiences, making it crucial to explore how voyeuristic businesses strive to manage observees' engagement. For this exploration, we used an inductive approach. We focused on the voyeuristic business of slum tourism and interviewed the observees (slum residents), audience members (tourists), and orchestrators (tour guides) in the Dharavi slum. We found that businesses attempt to orchestrate a voyeuristic event to ensure continued observee participation by scripting the event, claiming to improve the lives of those in the transgressed community, bounding audience behavior, personalizing the observees, and memorializing the voyeuristic experience. This orchestrated interaction can temporarily blur the traditional roles of audience and observee, with some observees momentarily taking on the perspective of the audience and the audience momentarily being observed. This temporary switching of roles can enhance the experience of the voyeuristic event for the audience and for some of the nonconsenting observees.

窥视行为为观众提供了观察他人私生活的窗口。鉴于窥视行为的广泛吸引力，组织试图在各行各业中将窥视性事件商业化也就不足为奇了。先前的研究主要集中在观众在窥视体验中的作用。然而，被观察者在塑造观众的窥视体验中起着至关重要的作用，因此探索窥视类业务如何努力管理被观察者的参与至关重要。为此，我们采用了归纳法。我们关注贫民窟旅游这一窥视性业务，并访谈了达拉维（Dharavi）贫民窟的被观察者（贫民窟居民）、观众（游客）和策划者（导游）。我们发现，企业试图通过编写事件脚本、声称改善被侵扰社区的生活、约束观众行为、将被观察者个性化以及纪念窥视体验，来编排窥视性事件，以确保被观察者的持续参与。这种编排好的互动可以暂时模糊观众和被观察者的传统角色，一些被观察者会暂时采取观众的视角，而观众则会暂时成为被观察的对象。这种角色的临时切换可以增强观众以及一些非自愿被观察者对窥视性事件的体验。

Abstract / 摘要:

Management phenomena are often causally complex, and management research has increasingly turned to a configurational perspective to better account for this complexity. Yet, despite recent attention to configurational theorizing, we still lack comprehensive guidance on when a configurational approach is most appropriate, leading to confusion and avoidable disputes in the review process. Moreover, despite growing calls for theoretical triangulation, our understanding of how configurational theorizing can be effectively combined with other theorizing approaches is limited, slowing the development of novel organizational theories and confining configurational inquiry to largely abductive research and ex post theorizing. We address these challenges in two ways. First, we articulate a framework of four key indications—causal conjunction, causal disjunction, outcome asymmetry, and outcome intentionality—that provide systematic guidance on when a configurational approach is warranted. Second, we introduce two configurational hybrid theorizing approaches that integrate configurational theorizing with propositional and process grammars. Specifically, we demonstrate how configurational-propositional theorizing can generate novel predictions about complex causal relationships, and how configurational-process theorizing can incorporate temporal dynamics through temporal-configurational layering. Together, these contributions broaden the theoretical toolkit for studying complexity and offer new ways to advance the configurational perspective and management theory more generally.

管理现象往往具有因果复杂性，管理研究越来越多地转向组态视角以更好地解释这种复杂性。然而，尽管组态化建模（configurational theorizing）近期备受瞩目，但在何时采用组态方法最为合适方面仍缺乏全面的指导，导致评审过程中出现混淆和可避免的争议。此外，尽管理论三角验证（theoretical triangulation）的呼声日益增高，但我们对组态化建模如何与其他建模方法有效结合的理解依然有限，这减缓了新颖组织理论的发展，并将组态探究局限在溯因研究（abductive research）和事后建模中。我们通过两种方式应对这些挑战。首先，我们阐述了一个包含四个关键指征的框架——因果合取、因果析取、结果不对称性和结果意向性——为组态方法的适用时机提供系统指导。其次，我们引入了两种将组态化建模与命题式和过程式语法相结合的组态混合建模方法。具体而言，我们展示了“组态-命题”建模如何产生关于复杂因果关系的新预测，以及“组态-过程”建模如何通过“时间-组态分层”来纳入动态时间。这些贡献共同拓宽了研究复杂性的理论工具箱。

Abstract / 摘要:

While stakeholder support is essential for firm survival, when stakeholder pressures are at odds with firm interests, resistance becomes imperative for the firm. We theorize when and how empirically based responses enable firms to effectively resist stakeholders, without losing critical support, by following societal norms encouraging empirical debate. Extending arguments that stakeholder pressure progresses through phases, we argue that empirical debate is most influential before and after the phase when stakeholder deliberation occurs—that is, in the preceding phase, when issues are defined, and the subsequent phase, when remedies are debated. We detail two empirically based response strategies: (1) validity disputing and (2) validity promoting. While validity disputing sows doubt and uncertainty on the empirical elements of issues and remedies, validity promoting advances the empirical merits of the firm's preferred remedy relative to stakeholders' proposed remedy. Together, these strategies seek to mitigate stakeholder pressures by disrupting an issue's rise to salience, and, failing that, to avoid remedies constituting more substantive concessions. We complete our model by examining three contingencies: firm dependence on stakeholders, causal complexity, and the strength of stakeholders' values. Detailing empirical debate as a basis of response complements well-established, values-based approaches to address stakeholder pressures.

虽然利益相关者的支持对企业生存至关重要，但当利益相关者的压力与企业利益相悖时，抵抗就变得势在必行。我们构建了理论，探讨基于实证的响应如何通过遵循鼓励实证辩论的社会规范，使企业在不丧失关键支持的情况下有效地抵抗利益相关者。扩展了利益相关者压力分阶段进行的论点，我们认为实证辩论在利益相关者审议阶段之前和之后最具影响力——即在前期的议题定义阶段，以及后期的补救方案辩论阶段。我们详细阐述了两种基于实证的响应策略：（1）效度质疑（validity disputing）和（2）效度推介（validity promoting）。效度质疑对议题和补救方案的实证要素播下怀疑和不确定的种子，而效度推介则相较于利益相关者提出的方案，提升企业偏好方案的实证优势。这些策略共同旨在通过瓦解议题的显著性上升来减轻利益相关者压力；如果失败，则通过避免构成更实质性妥协的补救方案。我们通过考察三个权变因素来完善模型：企业对利益相关者的依赖程度、因果复杂性以及利益相关者价值观的强度。将实证辩论详细说明为响应基础，是对成熟的基于价值观的利益相关者压力处理方法的补充。

Abstract / 摘要:

This study examines the role of managerial structural knowledge in postacquisition integration (PAI) and its association with the retention of target firm managers. Although retaining top managers is often linked to improved acquisition outcomes, the conditions under which their retention may support integration remain underexplored. Drawing on organizational modularity theory, we theorize that structural similarity between acquiring and target firms is associated with higher managerial retention in related acquisitions. We propose that structural knowledge, defined as managers' experience within specific organizational structures, can support PAI and is associated with improved postacquisition performance. Using a data set of 2,941 mergers and acquisitions (M&A) deals and 18,987 target firm managers (1994–2018), we find a positive relationship between structural similarity and the retention of target managers in related acquisitions. At the individual level, managers with structural knowledge aligned with the acquiring firm's structure are more likely to be retained. Furthermore, the relationship between structural similarity and retention is stronger when the geographic distance between firms is greater or when the deal requires deep integration, as in absorption-type acquisitions. Finally, structural similarity between acquiring and target firms is positively associated with improved postacquisition performance. Our findings contribute to the M&A literature by introducing a structural knowledge perspective in understanding PAI. Our study also highlights the role of organizational modularity in M&As and advances the strategic human capital literature by identifying structural knowledge as a critical component of managerial capabilities. 本研究探讨了高管结构性知识在并购后整合（PAI）中的作用，及其与目标公司经理留任的关系。虽然留住高管通常与改善并购结果相关联，但在何种条件下他们的留任能支持整合仍有待深入探索。借鉴组织模块化理论，我们假设在相关并购中，收购方与目标公司之间的结构相似性与更高的经理留任率相关。我们提出，结构性知识（定义为经理在特定组织结构内的经验）可以支持并购后整合，并与并购后绩效的提升相关。通过对 2,941 笔并购交易和 18,987 名目标公司经理（1994-2018 年）的数据集进行分析，我们发现在相关并购中，结构相似性与目标公司经理留任之间存在正相关关系。在个体层面，其结构性知识与收购方组织结构相匹配的经理更有可能被留任。此外，当公司间的地理距离较远，或者当交易需要深度整合（如吸收型并购）时，结构相似性与留任之间的关系更强。最后，收购方与目标公司之间的结构相似性与并购后绩效的提升呈正相关。我们的研究结果为并购文献做出了贡献。

Abstract / 摘要:

The replication of routines is fundamental to knowledge transfer and retention in organizations. Because research on routine replication has historically been divided, proceeding within knowledge transfer (spatial replication) or knowledge retention (temporal replication), respectively, our understanding of how replicating routines in new organizational units (knowledge transfer) affects an organization's capacity to maintain adherence to those routines over time at existing units (knowledge retention) remains limited. Drawing on the organizational learning and related evolutionary economics literature on routines as well as the multiple goals literature and using data on a Fortune 100 franchise chain being scaled in the United States with thousands of outlets opened over a period of 10 years, we examine whether and how knowledge transfer affects knowledge retention. Our primary thesis is that knowledge transfer and knowledge retention create competing demands for limited attention and therefore the need to allocate attention between them. We posit that this gives rise to a negative relationship between the spatial (knowledge transfer) and temporal (knowledge retention) replication of routines, although the effect can be mitigated by organizational learning from experience. We find robust empirical support for our propositions, pointing to important attention and learning mechanisms that shape the organizational capacity to simultaneously navigate knowledge transfer and retention demands, that is, replicate routines across both space and time. 惯例的复制是组织内知识转移和保留的基础。由于以往关于惯例复制的研究在知识转移（空间复制）或知识保留（时间复制）方面长期处于相互独立的状态，我们对于在新的组织单元中复制惯例（知识转移）如何影响组织在现有单元长期维持对这些惯例的遵守（知识保留）的能力仍知之甚少。基于组织学习、演化经济学关于惯例的相关文献以及多目标文献，并利用一家在美国扩张、十年内开设数千家门店的财富 100 强特许经营连锁店的数据，我们考察了知识转移是否以及如何影响知识保留。我们的核心论点是，知识转移和知识保留对有限的注意力产生了竞争性需求，因此需要在两者之间分配注意力。我们假设这导致了惯例的空间复制（知识转移）与时间复制（知识保留）之间的负相关关系，尽管这种效应可以通过从经验中获得的组织学习来缓解。我们发现研究命题得到了稳健的实证支持，指出了塑造组织同时驾驭知识转移和知识保留能力的重要注意力和学习机制。

Abstract / 摘要:

When a temporary team faces an unfamiliar task environment, it should particularly benefit from including members who have collaborated before. Although several studies have made this prediction, it has not been supported empirically. We reconcile this discrepancy by distinguishing between prior collaborations in tightly versus loosely coupled roles, defined by the degree of interdependence among collaborators during prior work. Both forms of prior collaboration can help teammates communicate effectively, aiding team adaptation in new contexts. However, prior collaboration in tightly coupled roles also fosters shared routines that may create inertia and impede adaptation. As a result, we argue that the value of tightly coupled experience declines in unfamiliar environments, whereas the value of loosely coupled experience increases. We test these ideas using data from esports, where professional players with varying collaborative histories are randomly assigned to temporary teams. Unanticipated changes to the game exogenously alter teams' familiarity with their task environments. Consistent with our theory, we find that tightly coupled collaborative experience enhances team performance in familiar task environments but degrades it in unfamiliar ones. Loosely coupled experience provides modest benefits in familiar environments but substantially enhances performance in unfamiliar ones. Overall, our findings suggest that when environments change, tightly coupled experience can act as a faulty roadmap—anchoring teams to outdated routines—whereas loosely coupled experience can serve as a compass that promotes coordination and adaptation. Supplemental Material: The online appendix is available at <https://doi.org/10.1287/orsc.2024.19399>.

当临时团队面临陌生的任务环境时，包含曾有协作经验的成员应能特别受益。尽管已有研究做出了这一预测，但尚未得到实证支持。我们通过区分紧密耦合与松散耦合角色下的过往协作（由过往工作中协作成员间的相互依赖程度定义）来调和这一矛盾。两种形式的过往协作都能帮助团队成员有效沟通，辅助团队在情境变化中进行适应。然而，紧密耦合角色下的过往协作也会形成共享惯例，这可能会产生惯性并阻碍适应。因此，我们认为紧密耦合经验的价值在陌生环境中会下降，而松散耦合经验的价值则会上升。我们利用电子竞技数据测试了这些观点，在电子竞技中，具有不同协作历史的职业选手被随机分配到临时团队。游戏中的意外变化外生性地改变了团队对其任务环境的熟悉程度。与我们的理论一致，我们发现紧密耦合的协作经验能提升团队在熟悉任务环境中的表现，但在陌生环境中却会降低表现。松散耦合经验在熟悉环境中提供微弱的收益，但在陌生环境中能显著提升表现。总体而言，我们的研究结果表明，当环境发生变化时，紧密耦合的经验可能会.....

Abstract / 摘要:

Political polarization is recognized as a global risk. Although emerging studies on political dissimilarity at work highlight important implications for how employees behave and interact, findings are at times inconsistent. To provide a more nuanced understanding of when and why political dissimilarity disrupts workplace interactions, we draw on the social identity approach and threat processing to examine how political dissimilarity shapes perceptions of work relationships and behavior before and after election events. Across three studies, we demonstrate that political dissimilarity's effects depend on political macro events and thus become temporally activated. Study 1, an experience sampling field study during the 2020 U.S. presidential election, showed no significant impact of political dissimilarity on negative interpersonal interactions before the election, but significance emerged on election day and persisted for six days after the election. In Study 2, an online experiment during the 2022 U.S. midterm elections, we found that actual political dissimilarity indirectly influenced negative interpersonal interactions via reduced social mindfulness after the election but not beforehand. Study 3, a longitudinal experiment over four weeks during the 2024 U.S. presidential election, replicated the election effect, demonstrating that these effects persisted for at least two weeks and were mediated by cognitive (i.e., perspective-taking) and affective (i.e., empathic concern) subdimensions of social mindfulness. Our findings highlight political orientation as a critical dimension of workplace dissimilarity. Although its impact may be subdued, it becomes pronounced during macro-political events, shaping workplace interactions in significant ways, with the political dissimilarity effects being more easily reactivated in the postelection phase. Abstract / 摘要:

Professionals increasingly work within commercial and governmental organizations whose mandates often create tensions with their professional values. Prior research, however, shows mixed findings regarding how professionals respond to these value tensions, with some values being protected and others being compromised. We explore this inconsistency by investigating how Chinese patent examiners navigate tensions between their professional values and governmental pressures to promote domestic strategic innovation under the Made in China 2025 policy. Using a mixed-methods approach that combines qualitative interviews with 27 Chinese patent examiners and quantitative analyses of nearly 1 million patents reviewed by 10,304 examiners, we develop a hierarchical framework of professional values. We find that examiners perceive their values hierarchically, distinguishing between core identity-defining values and subordinate operational values. Under external pressures, they attempt to protect their core value of judgmental fairness while absorbing the pressures by compromising their subordinate value of diagnosing diligence. Professional interactions with foreign examiners and experienced patent agents mitigate this compromise by anchoring examiners' attention to the operational details where diagnosing diligence is embedded. Moreover, our quantitative analyses reveal that compromised diagnosing diligence ultimately undermines judgmental fairness due to interdependence within the value hierarchy. Our study advances the understanding of professional value dynamics under external pressures and provides insights into how experts balance their professional ideals with institutional mandates. Supplemental Material: The online appendix is available at <https://doi.org/10.1287/orsc.2024.18504>.

专业人士越来越多地在商业和政府机构中工作, 这些机构的指令往往与其职业价值产生冲突。然而, 以往研究关于专业人士如何应对这些价值冲突的结果褒贬不一, 有些价值得到了保护, 而另一些则被妥协。我们通过调查中国专利审查员如何在职业价值与政府压力(在“中国制造 2025”政策下促进国内战略创新)之间寻求平衡, 来探讨这种不一致性。采用混合方法研究, 结合了对 27 名中国专利审查员的定性访谈以及对 10,304 名审查员审阅的近 100 万件专利的定量分析, 我们构建了一个职业价值的层级框架。研究发现, 审查员对价值的感知具有层级性, 能够区分定义身份的核心价值与从属的运作价值。在外部压力下, 他们试图保护“评判公平性”这一核心价值, 同时通过妥协“诊断勤勉性”这一从属价值来吸收压力。与外国审查员及经验丰富的专利代理人的职业互动缓解了这种妥协, 因为这些互动将审查员的注意力锚定在嵌入了诊断勤勉性的运作细节上。此外, 我们的定量分析显示, 受损的诊断勤勉性由于价值体系内的相互依赖性, 最终会削弱评判公平性。

Abstract / 摘要:

While cultural entrepreneurship research has highlighted how entrepreneurs craft stories to legitimize their

ventures, we know much less about how entrepreneurs gain legitimacy for a novel organizational form. Drawing upon a detailed, historical examination of Japanese family mottos from the Edo period (1603–1868), we show how stories embedded in family mottos enabled legitimation by symbolically leveraging two core socio-cultural institutions of Edo Japan (religion and family), advancing our understanding of how broader cultural resources can be leveraged to legitimate a new organizational form. We discuss implications for scholarship on family business and cultural entrepreneurship.

虽然文化创意研究强调了创业者如何通过构建故事来使其创业项目合法化，但我们对于创业者如何为一种新型组织形式获取合法性却知之甚少。基于对江户时代（1603–1868）日本家训的详尽历史考察，我们展示了嵌入家训中的故事如何通过象征性地利用江户时代的两个核心社会文化制度（宗教与家庭）来实现合法化，从而推进了我们对更广泛的文化资源如何被用来使新组织形式合法化的理解。我们讨论了该研究对家族企业和文化创意学术研究的启示。

Abstract / 摘要:

The opportunity actualization perspective has recently gained attention as a key framework for exploring entrepreneurial opportunity. The perspective's theorizing, however, predominantly focuses on profit-driven opportunities, limiting its applicability across the spectrum of entrepreneurial behavior. To broaden applicability, we examine how entrepreneurs motivated by social and economic considerations form their opportunity beliefs. We use a qualitative research approach that combines think-aloud protocols and semi-structured interviews with 24 impact entrepreneurs. Our findings allow us to develop a holistic model of social business opportunity belief formation, incorporating market and non-economic considerations, emphasizing the role of non-market stakeholders. We derive important implications for both theory and practice.

机会实现视角作为探索创业机会的关键框架，近期受到了广泛关注。然而，该视角的理论构建主要集中在利润驱动的机会上，限制了其在各类创业行为中的适用性。为了扩大其适用范围，我们考察了受社会和经济双重因素驱动的创业者如何形成其机会信念。我们采用定性研究方法，结合出声思考方案与对 24 位影响力创业者的半结构化访谈。研究结果使我们能够开发出一个社会商业机会信念形成的整合模型，该模型纳入了市场和非经济因素，并强调了非市场利益相关者的作用。我们为理论和实践提供了重要的启示。

Abstract / 摘要:

Research Summary: Entrepreneurs make critical decisions in uncertain environments where information is limited, outcomes are difficult to predict, and multiple goals often compete. Yet, existing research offers scattered insights into how entrepreneurs dynamically adapt to such contexts and how their decisions are shaped by behavioral and cognitive foundations such as judgment, intuition, and experience. We shed light on these phenomena by exploring how decision-making is influenced by factors at multiple levels, from individual traits and family dynamics to team interactions and organizational structures. A key aspect of our inquiry focuses on how entrepreneurs manage uncertainty by balancing economic goals, such as growth and profitability, with non-economic objectives like social impact, sustainability, or knowledge advancement. By integrating these perspectives, this work offers a conceptual framework that connects antecedents, processes, and outcomes of entrepreneurial decision-making under uncertainty and competing goals, providing a promising roadmap for future research. **Managerial Summary:** Entrepreneurs often make decisions in uncertain environments, where they must contend with limited information and competing goals. This work explores how entrepreneurs balance economic objectives, such as profit, with non-economic ones, like satisfying various stakeholders, achieving social impact, and sustainability. It highlights the role of individual, family, team, and organizational factors in shaping these decisions, offering novel insights into how entrepreneurs can manage trade-offs, adapt feedback-based strategies, and recalibrate priorities over time. For owners, managers, and business leaders, understanding these dynamics can lead to better decision-making, improved risk management, enhanced strategic alignment, increased innovation, and a more balanced approach to growth. 1 |

创业者在信息有限、结果难以预测且多个目标往往相互竞争的不确定环境中做出关键决策。然而，现有研究对于创业者如何动态地适应此类情境，以及他们的决策如何受到判断、直觉和经验等行为和认知基础的影响，仅提供了零散的见解。我们通过探讨多层面因素（从个人特质和家族动态到团队互动和组织结构）如何影响决策，来阐明这些现象。我们研究的一个核心方面聚焦于创业者如何通过平衡经济目标（如增长和盈利能力）与非经济目标（如社会影响、可持续性或知识进步）来应对不确定性。通过整合这些视角，本研究提出了一个概念框架，连接了不确定性和竞争性目标下创业决策的前因、过程和结果，为未来的研究提供了一个充满前景的路线图。

Abstract / 摘要:

Research Summary: We explore the impact of new venture team (NVT) stability on long-run organizational growth. With an instrumental variable design, we leverage a matched employer-employee dataset of all Danish new ventures from 1981 to 1997. We find strong evidence that NVT stability has a positive effect on organizational growth in employees and that the effect grows stronger over time. We also find that stability is especially impactful for larger teams and for teams with higher education levels. The gains from stability also appear to be driven entirely by mixed-gender teams. We connect our findings to the literature on NVT dynamics and suggest avenues for future research. Managerial Summary: Stability within founding teams is crucial for the longevity and expansion of new ventures. We examine a dataset of Danish startups and find that ventures with stable founding teams demonstrate a 16.1 percentage point higher likelihood of survival and a 20.4% increase in average size after 10 years. This effect is accentuated in larger, more educated, and gender-diverse teams. For entrepreneurs, these insights underscore the importance of not only assembling a strong initial team but also maintaining its Received: 17 November 2023 Revised: 6 November 2025 Accepted: 16 December 2025 DOI: 10.1002/sej.70011 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). 我们探讨了新创企业团队 (NVT) 稳定性对组织长期增长的影响。采用工具变量设计, 我们利用了 1981 年至 1997 年间所有丹麦新创企业的雇主-雇员匹配数据集。我们发现了强有力的证据, 表明 NVT 稳定性对以员工人数衡量的组织增长具有正向影响, 且这种影响随时间推移而增强。我们还发现, 稳定性对于规模较大且教育程度较高的团队影响尤为显著。稳定性带来的收益似乎完全由性别混合的团队所驱动。我们将研究结果与 NVT 动态的相关文献联系起来, 并提出了未来的研究方向。

Abstract / 摘要:

Abstract The literature on the relationship between leader behaviours and effectiveness is a jungle of complementary yet often conflicting leadership theories that perplexes researchers and practitioners alike, as indicated by various theories of bright and dark side leadership (i.e., leader behaviours reflecting widely considered positive and negative leadership qualities, respectively). We disentangle this jungle by offering a

conceptual model that improves our understanding of bright and dark side leadership and their respective effectiveness, based on the concepts of leader character and context integrity. Our theory helps to reconcile the various bright and dark side leadership theories at a general level and suggests critical implications for leadership theory and practice.

关于领导行为与效能之间关系的文献如同一片由互补但往往相互冲突的领导理论组成的“丛林”，这令研究者和从业者感到困惑，各种关于光明面和黑暗面领导力的理论（即分别反映了被广泛认为是积极和消极领导特质的领导行为）便体现了这一点。基于领导者品格和情境完整性的概念，我们提供了一个概念模型来梳理这一丛林，从而增进我们对光明面和黑暗面领导力及其各自效能的理解。我们的理论有助于在一般层面上调和各种光明面和黑暗面领导力理论，并为领导力理论与实践提供了关键的启示。

Abstract / 摘要:

This essay is a vulnerable sharing of personal stories, lessons learned, but most of all, a call for action for management researchers and educators to engage in the development of loving, nurturing, and wholly generative academic friendships. The experiences we share with you here are grounded in an academic friendship which has flourished during a time of immense loss and grief. The brutal reality is that one of us is dying of cancer, one of us recently lived through 11 years of cancer treatment, and one of us wears the invisible scars of watching her brother and stepbrother die of the same disease. As we write this, two of us are living through the journey of watching a close and dear co-author, research partner, and friend battle an inoperable brain tumour; the other is devastated beyond words but is trying to live every day as fully as she can. Together, we are navigating this challenging time—one in which we have bridged our personal and professional lives. Here, we have built an academic friendship which is supporting us in complex and myriad ways to navigate one of life's most difficult yet inescapable challenges—one that remains taboo within and outside of our organizations—death.

这篇论文是一次关于个人故事和经验教训的脆弱分享，但最重要的是，它呼吁管理学研究者和教育者参与发展充满爱、滋养且具有完全生成性的学术友谊。我们在此分享的经验植根于一段在巨大的丧亲之痛和悲伤时期蓬勃发展的学术友谊。残酷的现实是，我们中的一人正因癌症走向生命终点，一人最近刚经历了11年的癌症治疗，还有一人因目睹兄弟和继兄弟死于同一种疾病而留下了隐形的伤疤。在我们撰写本文时，我们中的两人正经历着目睹一位亲密的合著者、研究伙伴和朋友与无法手术的脑瘤搏斗的历程；另一人则悲痛得无以言表，但正努力充实度地度过每一天。我们共同度过这段充满挑战的时光——在这段时间里，我们架起了个人生活与职业生活的桥梁。在这里，我们建立了一段学术友谊，它以复杂且多样的方式支持着我们去应对生命中最艰难但又无法回避的挑战之一——一个在组织内外仍然被视为禁忌的话题：死亡。

- **理论:** 生态系统理论, 反思性治理, 负外部性, 算法策展

Abstract / 摘要:

Abstract Castello, Colleoni, Scherer, and Trittin contend that social media platforms threaten democratic processes by facilitating the spread of misinformation and fostering polarized debates –dynamics that ultimately serve to monetize user attention. We acknowledge the problem but challenge their proposed solution of conceptualizing social media as political spaces. Instead, drawing on ecosystem theory, we propose an ‘ecosystem failure’ analysis as a more robust analytical framework. Within this perspective, we see these information-related problems as negative externalities that weaken the entire platform ecosystem. These externalities are structurally distinct due to algorithmic curation that selectively amplifies content in ways that reinforce user biases, strong network effects with almost zero replication costs, and engagement-based monetization that decouples production from editorial standards. We therefore advance a reflexive ecosystem governance approach that accounts for broader ecosystem value, shifting the focus beyond short-term economic performance to encompass overall ecosystem health. This approach transforms the management of negative externalities into a core strategic interest for the platform and aligns the incentives of individual actors ex ante, by design, prioritizing risk-adjusted reach and demotion of low-integrity content over ex post moderation. We analyse the mechanisms that align private incentives with democratic resilience and highlight the inherent trade-offs involved.

Castello、Colleoni、Scherer 和 Trittin 认为，社交媒体平台通过促进虚假信息的传播和滋生极化辩论威胁到民主进程——这些动态最终服务于用户注意力的变现。我们承认这一问题，但挑战了他们将社交媒体构想为政治空间的解决方案。相反，借鉴生态系统理论，我们提出将“生态系统失灵”分析作为一个更稳健的分析框架。在这一视角下，我们将这些与信息相关的问题视为削弱整个平台生态系统的负外部性。由于算法策展以强化用户偏见的方式选择性地放大内容、具有几乎零复制成本的强网络效应，以及将生产与编辑标准解耦的基于参与度的变现模式，这些外部性在结构上具有独特性。因此，我们提出了一种反思性生态系统治理方法，该方法考虑了更广泛的生态系统价值，将焦点从短期经济表现转向涵盖整体生态系统健康。这种方法将负外部性的管理转化为平台的核心战略利益，并通过设计预先对齐个体行动者的激励机制，优先考虑风险调整后的触达率和低诚信内容的降权，而非事后审核。我们分析了将私人激励与民主韧性相结合的机制。

Abstract / 摘要:

Abstract

This article contributes to discussions about the future of work by providing a systematic review of the broad yet fragmented management literature on how skills are changing with digital technologies (DTs). Our aim was to understand the nature of scholarly engagement with this relationship to inform a future research agenda. Our systematic review identified 225 original empirical articles that explicitly examined skills and DTs. We highlight the diverse categories of context, mechanisms, and outcomes in the form of an analytical matrix, guided by an organizational conceptualization of skill that spans positivist and social constructivist approaches. Our analysis generates four theoretical framings of how skills are changing with DTs: market shift, control shift, recombination, and imbrication. These framings are derived from two analytical dimensions of skill change: transactional versus transformational and objective versus relational. We interrogate the fit between each theoretical framing and the affordances of DTs, bringing to light how skill change with DTs is entangled with shifting temporal dimensions and a rich variety of interactions and interdependencies. Our theoretical framings, analytical dimensions, and insights into the relationship between skill change and DTs provide the basis for a more coherent management research agenda.

本文通过对关于技能如何随数字技术（DTs）改变的广泛但零散的管理学文献进行系统综述，为关于工作未来的讨论做出贡献。我们的目标是理解学术界对这一关系的参与本质，以为未来的研究议程提供参考。我们的系统综述识别了 225 篇明确探讨技能与数字技术的原创实证论文。我们以分析矩阵的形式强调了背景、机制和结果的多样化类别，该矩阵受横跨实证主义和社会建构主义方法的组织技能概念化指导。我们的分析产生了四种关于技能如何随数字技术改变的理论框架：市场转移、控制转移、重组和交叠。这些框架源自技能变化的两个分析维度：交易性与变革性，以及客观性与关系性。我们探讨了每种理论框架与数字技术可担承性之间的匹配度，揭示了数字技术带来的技能变化是如何与不断变化的时间维度以及丰富的互动和相互依赖关系纠缠在一起的。

- **理论:** 企业行为理论, 注意力基础观, 冗余资源

Abstract / 摘要:

This paper examines how the rate of firm growth influences corporate social responsibility (CSR). Periods of rapid growth can place substantial financial and managerial demands on firms, requiring leaders to prioritize the allocation of limited resources toward managing expansion. We propose that when firms grow quickly, managers may limit CSR investments—not because they undervalue CSR, but because growth itself consumes financial and attentional capacity. Using 19 years of data from 4,305 firms across 46 countries, we find that faster firm growth is associated with lower levels of CSR activity. This relationship is moderated by firms' financial and attentional resources: firms with greater financial slack and managerial bandwidth maintain stronger CSR engagement even while growing rapidly. Overall, our results suggest that the relationship between growth and CSR reflects a pragmatic balancing of competing demands. Keywords: firm growth;

managerial attention; financial slack; corporate social responsibility; business sustainability

本文研究了企业增长率如何影响企业社会责任（CSR）。快速增长时期会给企业带来巨大的财务和管理需求，要求领导者优先将有限的资源分配给扩张管理。我们提出，当企业快速增长时，管理者可能会限制 CSR 投资——不是因为他们低估了 CSR，而是因为增长本身消耗了财务和注意力带宽。利用来自 46 个国家、4,305 家企业的 19 年数据，我们发现较快的企业增长与较低水平的 CSR 活动相关。这一关系受到企业财务和注意力资源的调节：拥有更多财务冗余和管理带宽的企业，即使在快速增长时也能保持更强的 CSR 参与度。总的来说，我们的结果表明，增长与 CSR 之间的关系反映了对竞争性需求的务实平衡。

- **Theories:** Institutional Maintenance, Custodianship, Place Materiality, Institutional Work
- **理论:** 制度维护, 守护者身份, 场所物质性, 制度工作

Abstract / 摘要:

Custodians are integral to institutional maintenance, and instrumental to preserving institutionally significant places. Yet when institutional decline impacts institutionally significant places, we do not know how custodians manage the tensions between preservation efforts aimed at saving these places and the need for adaptation. Using a rich qualitative dataset of interviews with custodians from and participant observation at 26 rural church buildings in England, we examine custodian responses when institutional decline in belief in Christian religion impacts sacred church buildings. We find that in response to experiencing place materiality, relational, and practices tensions, custodians are torn between preserving the institutional role of place and the need to find resources to maintain such places. Custodians manage these tensions by deliberately evaluating materiality alterations and adopting innovative practices within the bounds of institutional appropriateness and resource constraints. The process we flesh out leads to distinct outcomes: place augmentation, practices augmentation, and, in a few instances, no augmentation. Our model portrays the pathways followed by institutional custodians that are rooted in the tensions they experience between the attachment to the institutional role of place and the need for change in response to institutional decline. Our study contributes to research on custodianship and place by uncovering divergent custodian responses when institutional decline impacts institutionally significant places and place as an institutional carrier and the locus of custodian place work.

守护者是制度维护不可或缺的一部分，在保护具有制度意义的场所方面发挥着关键作用。然而，当制度衰退影响到这些场所时，我们尚不清楚守护者如何管理旨在挽救场所的保护努力与适应需求之间的紧张关系。利用对英格兰 26 座农村教堂建筑的守护者访谈和参与式观察获得的丰富定性数据，本研究探讨了当对基督教信仰的制度性减弱影响到神圣的教堂建筑时，守护者所做出的反应。研究发现，在经历场所物质性、关系和实践的紧张关系时，守护者在保留场所的制度角色与寻找维持这些场所所需资源的需求之间感到进退两难。守护者通过在制度适当性和资源约束的范围内，审慎地评估物质性改动并采用创新实践来管理这些紧张关系。我们阐明的过程导致了不同的结果：场所增强、实践增强，以及在少数情况下的无增强。我们的模型描绘了制度守护者所遵循的路径，这些路径根植于他们对场所制度角色的依恋与应对制度衰退所需的变革需求之间的矛盾。本研究通过揭示守护者在面对制度挑战时的不同反应，为守护者身份和场所研究做出了贡献。
