#### Abstract / 摘要:

**Research Summary:** Knowledge accumulation requires that we understand whether and when relationships identified in any research setting generalize to others—that is, suggesting domains where results hold (or not). Strategy scholars carefully identify how theoretical mechanisms operate in their chosen research contexts, but attend less to whether their findings apply in other contexts. Accordingly, we recommend reframing empirical contexts, typically described in terms of nominal categories (e.g., industries, countries, or time periods), by highlighting contextual attributes of the nominal settings (e.g., industry concentration or technological modularity), which in turn reflect more abstract conceptual categories (e.g., uncertainty, interdependence, and variance) across potential research contexts. This approach can help integrate prior findings and suggest future study contexts to better enhance our understanding of the research landscape.

**Managerial Summary:** Academic research in strategic management tends to derive findings in very specific nominal settings—particular industries, years, and regions. Since strategy practitioners operate across a wide variety of industries and regions, they need to

1 assess whether available research findings are applicable in their own settings. We suggest that understanding whether and when research findings apply to unstudied settings can be facilitated by categorizing research settings using more abstract conceptual constructs (such as environment uncertainty, variance across firms, or interdependence between firms), rather than by the traditional emphasis on nominal settings. We discuss a variety of research setting attributes (such as industry concentration and technological modularity) that can aid the translation of extant research findings to settings where practitioners are operating.

**KEY WORDS** commensurability, cumulative learning, generalizability, mid-range theorizing, quasi-replication 1 |

**研究摘要：**知识积累要求我们理解在特定研究背景下确定的关系是否以及何时可以泛化到其他背景，即明确研究结果成立（或不成立）的领域。战略学者会仔细识别理论机制在所选研究背景下的运作方式，但较少关注其研究发现是否适用于其他背景。因此，我们建议重新界定实证背景。实证背景通常以名义类别（如行业、国家或时期）描述，我们建议通过强调名义背景的情境属性（如行业集中度或技术模块化）来重新界定，这些属性反过来反映了跨潜在研究背景的更抽象的概念类别（如不确定性、相互依赖性和方差）。这种方法有助于整合先前的研究发现，并为未来的研究背景提供建议，从而更好地增强我们对研究版图的理解。

**管理摘要：**战略管理领域的学术研究倾向于在非常具体的分名义背景（特定的行业、年份和地区）中得出结论。由于战略从业者在各种行业和地区开展业务，他们需要了解这些结论的适用范围。

## 2. Platform competition and strategic trade-offs for complementors: Heterogeneous reactions to the entry of a new platform

平台竞争与互补者的战略权衡：对新平台进入的异质性反应

**Authors / 作者:** Johannes Loh, Ambre Elsas-Nicolle

- **Theories:** Resource-Based View, Network Effects, Multihoming, Platform Orchestration
- **理论:** 资源基础观, 网络效应, 多栖, 平台编排

### Abstract / 摘要:

Research Summary: We study how the entry of a rival platform affects the strategies of the incumbent's complementors. The latter face a trade-off: While the entry threatens their benefits from indirect network effects, it also allows them to escape intense within- platform competition. Studying Epic Games' entry into the PC video game market—until then dominated by Steam—we show that this trade-off does not resolve uniformly, driving heterogeneity in strategic reactions. Complementors with weaker strategic resources (independent developers) were more likely to multihome and became less responsive to the incumbent's attempts to orchestrate collective action through platform-wide sales promotions. In contrast, complementors more reliant on indirect network effects (multiplayer developers) were less likely to multihome and became more responsive to orchestration attempts. Managerial Summary: As competition between digital platforms intensifies, complementors—firms that provide complementary products or services—must adjust how they engage with platform owners. The entry of a rival platform creates both opportunities and risks: it offers an alternative with less intense competition but also fragments the user base that underpins Received: 23 August 2023 Revised: 10 November 2025 Accepted: 27 November 2025 DOI: 10.1002/smj.70062 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–59. [wileyonlinelibrary.com/journal/smj](https://onlinelibrary.com/journal/smj) 1 network benefits. We find that these opposing effects shape complementors' behavior differently. Those with fewer strategic resources are more likely to join the new platform and become less willing to follow the incumbent's coordinated initiatives. In contrast, complementors whose products rely strongly on network effects tend to remain with the incumbent and cooperated more closely with its orchestration efforts. For managers, this highlights that platform competition not only shifts market dynamics but also reshapes the motivations and strategies of heterogeneous complementors. **KEYWORDS** complementors, ecosystem orchestration, market entry, multihoming, platform competition 1 |

研究摘要：我们研究了竞争平台的进入如何影响在位平台互补者的策略。后者面临一种权衡：虽然新平台的进入威胁到他们从间接网络效应中获得的利益，但同时也允许他们摆脱激烈的平台内竞争。通过研究 Epic Games 进入此前由 Steam 主导的 PC 视频游戏市场的情况，我们表明这种权衡的结果并非千篇一律，从而导致了战略反应的异质性。战略资源较弱的互补者（独立开发商）更有可能进行多栖（multihome），并且对在位平台通过全平台促销活动来编排集体行动的尝试反应较不积极。相比之下，更依赖间接网络效应的互补者（多人游戏开发商）进行多栖的可能性较小，并且对编排尝试的反应更为积极。管理摘要：随着数字平台之间的竞争日益激烈，互补者（提供互补产品或服务的企业）必须调整与平台所有者的互动方式。竞争平台的进入既带来了机遇也带来了风险：它提供了竞争程度较低的替代方案，但也分散了支撑业务的用户群。

- **理论:** 动态能力, 微观基础, 修辞性历史, 诠释学

### **Abstract / 摘要:**

**Research Summary:** This study provides a causal explanation concerning how managerial actions using historical values contribute to dynamic capabilities, or sustaining competitive advantage in changing environments. Based on historical methods that consist mainly of hermeneutics, contextualization, and source criticism, it analyzes sources and data on how Toyota strategically responded to the competitive dynamics of the automotive industry centered around modularization. This resulted in the identification of three types of managerial action using historical values—filtering, integrating, and modifying—which have a rhetorical influence on the processes of strategic diagnosis, choice, and action respectively in ways that strengthen the micro-foundations of dynamic capabilities. This enables the firm to adapt to hyper-competitive environments while maintaining the idiosyncrasies of its core capabilities. **Managerial Summary:** Toyota has sustained its competitive advantage for decades by consistently relying on its core capabilities, especially the Toyota Production System and its longstanding supplier relations. How has Toyota been able to do so while facing rapidly changing environments? This paper seeks to explore. Received: 27 August 2024 Revised: 21 January 2026 Accepted: 22 January 2026 DOI: 10.1002/smj.70069 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–31. [wileyonlinelibrary.com/journal/smj](https://wileyonlinelibrary.com/journal/smj) 1 this question by comparing Toyota's and Nissan's strategies in response to modularization in the automotive industry in the 1990s and 2000s. It uncovers how a firm's managers can utilize historical values in ways that influence the processes of strategy formation and implementation. This allows the firm to incorporate key elements of new strategies that its rivals introduce in the marketplace alongside the firm's strategies based on its core capabilities, thereby adapting to hyper-competitive environments while sustaining its idiosyncrasies and competitive advantage. **KEYWORDS** competitive advantage, dynamic capabilities, historical methods, historical values, Toyota 1 |

**研究摘要:** 本研究针对利用历史价值的管理行动如何促进动态能力, 或在变化的环境中维持竞争优势, 提供了因果解释。基于主要由诠释学、情境化和史料批判构成的历史方法, 本研究分析了关于丰田如何战略性地应对以模块化为核心的汽车行业竞争动态的资料和数据。研究识别了利用历史价值的三种管理行动——过滤、整合和修正。这些行动分别对战略诊断、选择和执行过程产生修辞性影响, 从而强化了动态能力的微观基础。这使企业能够适应超强竞争环境, 同时保持其核心能力的特异性。管理摘要: 几十年来, 丰田通过始终如一地依靠其核心能力, 特别是丰田生产方式及其长期的供应商关系, 维持了其竞争优势。在面对快速变化的环境时, 丰田是如何做到这一点的? 本文旨在探讨...

#### Abstract / 摘要:

Some organizations in stigmatized markets are more successful than others at managing audience perceptions and attracting consumers. Despite extensive research on organizational stigma management, less is known about the conditions under which different strategies drive consumer patronage. This study examines two broad approaches—(1) distancing from the stigmatized market, and (2) displaying associations with the stigmatized market—that operate through opposing mechanisms and offer competing prescriptions for organizations. We consider how group stigma affects dynamics between organizations and consumers to influence the effectiveness of stigma management strategies. We introduce the concept of market-stigmatized groups and predict that the local concentration of these groups moderates the effectiveness of distancing and displaying in generating sales. Examining dispensaries in Washington state' s marijuana market, we find that displaying strategies are associated with lower sales in areas with higher concentrations of Black residents, a market-stigmatized group in this industry, whereas distancing strategies have diverging effects. Our study contributes to stigma research by demonstrating that the effectiveness of stigma management strategies is contingent on the local concentration of market-stigmatized groups, showing how stigmas interact across levels to affect organizational outcomes, and identifying a source of performance heterogeneity in stigmatized markets.

在污名化市场中，某些组织在管理受众感知和吸引消费者方面比其他组织更成功。尽管关于组织污名管理已有广泛研究，但对于不同策略驱动消费者惠顾的条件仍知之甚少。本研究考察了两种广泛的方法：(1) 与污名化市场保持距离（疏远策略），以及 (2) 展示与污名化市场的关联（展示策略），这两种方法通过相反的机制运作，并为组织提供了相互竞争的处方。我们思考了群体污名如何影响组织与消费者之间的互动，从而影响污名管理策略的有效性。我们引入了“市场污名化群体”的概念，并预测这些群体的局部集中程度调节了疏远和展示策略在产生销售额方面的有效性。通过对华盛顿州大麻市场零售店的研究，我们发现，在黑人居民（该行业中的市场污名化群体）集中度较高的地区，展示策略与较低的销售额相关，而疏远策略则具有不同的影响。本研究通过证明污名管理策略的有效性取决于市场污名化群体的局部集中度，展示了污名如何在不同层面相互作用以影响组织结果，并识别了污名化市场中绩效异质性的来源，从而对污名研究做出了贡献。

## Abstract / 摘要:

Research shows that certain work roles constrain labor market success when individuals transition to new work roles, as they are viewed as discrediting by potential role partners. However, workers increasingly hold multiple roles simultaneously, which may alter the inferences drawn from roles that are discrediting in isolation. Building on role accumulation theory, we theorize that work roles that are net liabilities in isolation, such as the entrepreneur role, can become net assets as part of a compensatory role set, and we identify a new theoretical mechanism of role rectification through which this effect occurs. Mobilizing verbal protocol, experimental, and archival data sources, we find evidence for role rectification using the case of hybrid entrepreneurs, but we also find that the benefits of role rectification are attenuated in contexts where role accumulation magnifies role nonconformity risks.

研究表明, 当个人向新的工作角色转型时, 某些工作角色会限制其在劳动力市场上的成功, 因为潜在的角色伙伴会认为这些角色具有负面影响(丧失信誉)。然而, 劳动者越来越多地同时承担多个角色, 这可能会改变从孤立的负面角色中得出的推论。基于角色累积理论, 我们提出, 在孤立状态下属于净劣势的工作角色(如创业者角色), 作为补偿性角色集的一部分时可以转化为净资产, 并识别出一种新的“角色矫正”理论机制, 通过该机制产生这种效应。通过动员口语报告、实验和档案数据源, 我们以混合型创业者为例找到了角色矫正的证据, 但同时也发现, 在角色累积放大角色非规范风险的情境下, 角色矫正的收益会有所减弱。

## Abstract / 摘要:

A key theoretical tension in organizational network research lies in understanding how interpersonal connections shape employee turnover. While extensive workplace networks can reduce turnover by granting access to valuable information and resources, they can also increase it by exposing employees to information overload, leading to cognitive strain and disengagement. Drawing on process theory, we bridge these two previously disconnected mechanisms—information access and information overload—to uncover how they jointly influence turnover. We propose that an intermediate number of instrumental workplace connections maximizes retention, as it balances the benefits of information access with the burdens of overload. Specifically, we theorize that information access exhibits diminishing marginal returns in mitigating turnover as additional connections provide less value, while information overload accelerates as employees struggle to process a growing volume of inputs, resulting in a U-shaped relationship between the size of an employee's network and turnover. We test these arguments across four studies: two preregistered experiments and two field studies of employees in large organizations. Our findings challenge conventional wisdom that larger networks are universally beneficial, providing insights into how the structure of informal networks drives turnover dynamics.

组织网络研究中的一个核心理论张力在于理解人际连接如何影响员工离职。虽然广泛的职场网络可以通过提供获取宝贵信息和资源的渠道来减少离职，但它们也可能通过使员工暴露于信息过载中，导致认知压力和职业倦怠，从而增加离职。借鉴过程理论，我们桥接了两个此前相互独立的机制——信息获取和信息过载——以揭示它们如何共同影响离职。我们提出，中等数量的工具性职场连接能使留任率最大化，因为它平衡了信息获取的收益与信息过载的负担。具体而言，我们认为，随着额外连接提供的价值降低，信息获取在缓解离职方面的边际收益递减；而随着员工难以处理日益增长的输入量，信息过载会加速。这导致员工网络规模与离职率之间呈现 U 型关系。我们通过四项研究测试了这些论点：两项预登记实验和两项针对大型组织员工的实地研究。我们的发现挑战了“网络规模越大普遍越好”的传统观点，并为非正式网络的结构如何驱动离职动态提供了见解。

- **领域:** 组织行为学, 社会心理学, 社会资本
- **Theories:** Appraisal Theory, Social Capital Theory, Social Comparison Theory
- **理论:** 评价理论, 社会资本理论, 社会比较理论

**Abstract / 摘要:**

This research examines why and when coworkers undermine employees who have social capital through high-level friends (i.e., friendship contact status). Drawing on appraisal theory, we theorize that coworkers envy—and subsequently undermine—such employees when they hold unfavorable core evaluations of the employees and perceive these employees' friendship networks as sparse. For coworkers, unfavorable core evaluations of an employee signal that the person is undeserving of high-level friends, and sparse employee friendship networks signal a lack of guardian protection that increases coworkers' own dominance-based control potential. These three components—high employee friendship contact status, low core evaluations (low employee deservingness) and low friendship network density (high coworker dominance-based control potential)—jointly drive the envy that fuels coworker undermining. We tested our theory and hypotheses across three studies. Study 1 supports our premise that coworkers negatively appraise employees' high friendship contact status. Study 2 shows that coworkers' core evaluations of employees and perceived friendship network density jointly moderate the effects of employee friendship contact status on coworker envy and undermining. Study 3 confirms that envy and undermining arise in response to high friendship contact status only when appraised employee deservingness is low and coworker dominance-based control potential is high. Our work highlights the liabilities of social capital, the role of perpetrator predation in workplace mistreatment, and how appraisal processes drive envy in organizations.

本研究探讨了同事为何以及何时会破坏那些通过高层朋友拥有社会资本（即友谊接触地位）的员工。基于评价理论，我们提出，当同事对这些员工持有负面的核心评价，并认为这些员工的友谊网络稀疏时，他们会嫉妒并随后破坏这些员工。对于同事而言，对员工的负面核心评价信号传递出该员工不配拥有高层朋友；而稀疏的员工友谊网络则意味着缺乏“保护者”的庇护，从而增加了同事自身基于支配的控制潜能。这三个要素——员工的高友谊接触地位、低核心评价（员工低配得感）以及低友谊网络密度（同事高支配控制潜能）——共同驱动了引发同事破坏行为的嫉妒情绪。我们通过三项研究测试了我们的理论和假设。研究 1 支持了我们的前提，即同事会负面评价员工的高友谊接触地位。研究 2 显示，同事对员工的核心评价和感知的友谊网络密度共同调节了员工友谊接触地位对同事嫉妒和破坏行为的影响。研究 3 证实，只有在评估的员工配得感较低且同事基于支配的控制潜能较高时，高层友谊接触地位才会引发嫉妒和破坏行为。本研究揭示了社会资本的潜在风险。

- **理论:** 话语制度主义, 制度理论, 交往行为理论

**Abstract / 摘要:**

In this article, I develop insights into deliberate silence as a facilitator of institutional change. I argue that deliberate silence constitutes a form of text that can influence dynamics of discourse positions and discourse content, thereby affecting relationships among relevant actors as well as institutional dynamics. This makes it a useful resource for change proponents located at the center of fields to inconspicuously shift voice toward more peripheral allies, facilitate the visibility of problematizations and novel theorizations, and mitigate the effect of defense strategies from central opponents of change. Starting from a basic discourse-based model of institutional change, I show how a systematic acknowledgment of deliberate silence facilitates a better understanding of discursive dynamics. Specifically, I synthesize four types of deliberate silence—activating, suppressing, affirming, and concealing—in institutional change processes, and model a set of communication strategies based on these types of silence that support change in various ways. These ideas contribute to existing literature by suggesting novel ways of understanding how actors navigate barriers to institutional change, and how interactions between different types of actors during institutional dynamics unfold.

在本文中，我深入探讨了刻意沉默作为制度变迁促进因素的作用。我认为，刻意沉默构成了一种可以影响话语立场和话语内容动态的“文本”形式，从而影响相关行动者之间的关系以及制度动态。这使其成为位于场域中心的变革倡导者的有用资源，使他们能够隐蔽地将发言权转移给更具边缘性的盟友，促进问题化和新理论化的可见性，并减轻来自制度变迁核心反对者的防御策略的影响。从基于话语的制度变迁基本模型出发，我展示了对刻意沉默的系统性认知如何促进对话语动态的更好理解。具体而言，我合成了制度变迁过程中的四种刻意沉默类型——激活型、抑制型、肯定型和隐藏型，并基于这些沉默类型建模了一套以多种方式支持变革的沟通策略。这些观点通过提出理解行动者如何规避制度变迁障碍以及制度动态过程中不同类型行动者之间如何互动的新方法，为现有文献做出了贡献。

**Abstract / 摘要:**

We propose a conceptual framework of transaction governance that augments the existing transaction cost economics (TCE) model with research on organizational identity orientation. Our focus is on how particular identity orientations imply preferences for formal versus informal governance mechanisms. These preferences, in turn, are activated when a firm faces particular transaction hazards. In general, the identity orientation construct augments the current perspective on governance choice and helps expand the current TCE model. We also discuss how a firm's identity orientation is itself systematically shaped (strengthened or weakened) by transactional outcomes. These feedback processes involve certain paradoxes. For instance, even successfully governed transactions may actually weaken a firm's identity orientation, to the extent that the governance choice is incompatible with the firm's prevailing identity orientation.

我们提出了一个交易治理的概念框架，通过组织身份取向的研究扩展了现有的交易成本经济学（TCE）模型。我们的重点在于特定的身份取向如何暗示对正式或非正式治理机制的偏好。当企业面临特定的交易风险时，这些偏好就会被激活。总的来说，组织身份取向这一概念增强了目前关于治理选择的视角，并有助于扩展现有的 TCE 模型。我们还讨论了企业的身份取向本身如何受到交易结果的系统性塑造（增强或削弱）。这些反馈过程涉及某些悖论。例如，即使是成功治理的交易，在治理选择与企业主流身份取向不相容的情况下，实际上也可能削弱企业的身份取向。

**Abstract / 摘要:**

While acquisitions are a popular means of corporate development, it is often uncertain whether acquirers capture positive value. This uncertainty is further compounded by the profound competitive implications associated with acquisitions. To shed more light on these implications, we develop the concepts of negative and positive competitive externalities in acquisitions in more detail and outline a framework that explains which acquisitions give rise to which competitive externalities. We then predict their impact on acquirers' and rivals' value capture under different synergy and information conditions, providing several insights: First, when negative competitive externalities exist, when no bidder can create unique synergies and bidders are aware of the synergies and externalities, bidders engage in value-destroying acquisitions to avoid negative externalities. A bidder with unique synergies only captures positive value if the unique synergies exceed a rival's negative competitive externalities. Second, information advantages of one bidder over others are a key factor enabling positive value capture even when competitive externalities exist. Third, faced with positive competitive externalities, bidders may lack incentives to acquire even if further synergies exist, and

the most capable acquirer may not capture the most value. Our paper sheds light on competitive externalities in acquisitions and provides important insights for strategic management research.

虽然收购是企业发展的常用手段，但收购方是否能获取正向价值往往是不确定的。这种不确定性因收购所带来的深刻竞争影响而进一步加剧。为了进一步阐明这些影响，我们详细阐述了收购中负向和正向竞争外部性的概念，并勾勒出一个框架来解释哪些收购会产生何种竞争外部性。随后，我们预测了在不同协同效应和信息条件下，这些外部性对收购方和竞争对手价值获取的影响，并提出几项见解：首先，当存在负向竞争外部性且没有竞标者能创造独特协同效应，且竞标者意识到这些协同效应和外部性时，竞标者会为了避免负向外性而进行价值受损的收购。只有当独特协同效应超过竞争对手的负向竞争外部性时，拥有独特协同效应的竞标者才能获得正向价值。其次，一个竞标者相对于其他竞标者的信息优势是即使在存在竞争外部性时也能实现正向价值获取的关键因素。第三，面对正向竞争外部性，即使存在进一步的协同效应，竞标者也可能缺乏收购动力，且能力最强的收购方可能无法获得最高价值。本文揭示了收购中的竞争外部性，并为战略管理研究提供了重要见解。

**Fields & Theories / 领域与理论:**

- **Fields:** Organizational Design, Social Entrepreneurship, Strategic Management
- **Theories:** Organization Design Theory, Hybrid Organizations, Behavioral Theory of the Firm

**Abstract / 摘要:**

Although the phenomenon of dual-purpose organizations (DPOs)—market-based organizations that pursue both private (commercial) and broader social objectives simultaneously—has been explored extensively in prior literature, the role of organization design in addressing the distinct coordination problems inherent to DPOs has been largely overlooked. We develop a theoretical framework that conceptualizes how design considerations can influence organizational outcomes for DPOs. We identify two central coordination challenges faced by DPOs: an aggregation problem, in which heterogeneous individual preferences and organizational goals must be effectively aligned; and a consolidation problem, in which the dual-purpose nature of DPOs prevents the consolidation of goals into a single organizational meta-goal, resulting in nonhierarchical decision-making structures. We argue that formal organization design processes and mechanisms alone may fail to resolve these coordination problems, and we conceptualize the role and notion of soft governance, which we define as the agentic deployment of informal design mechanisms that shape an organization's informal decision-making structure. Our core contribution lies in developing an integrative model of dual-purpose organizing that demonstrates how soft governance may complement formal organization design in alleviating the coordination problems inherent in DPOs, thereby supporting their stability and growth.

- **Theories:** Organizational Learning Theory, Knowledge-Based View, Technology-in-Practice

**Abstract / 摘要:**

Organizational knowledge is essential for sustained competitive advantage, yet it naturally depreciates over time. Traditional rule-based technologies help counter this erosion by serving as stable repositories of knowledge. In contrast, machine learning (ML) systems—an increasingly prevalent and relied-upon technology—introduce new risks. Because their predictive models depend on historical training data, ML systems are vulnerable to model drift: a gradual misalignment with evolving operational realities that creates recurring needs for human-led repair. We develop a multilevel process model showing how and when repeated cycles of ML use and repair can unintentionally accelerate organizational knowledge depreciation. In doing so, we highlight the distinct vulnerabilities of ML systems, challenge the conventional view of technologies as stable repositories of knowledge, and emphasize the importance of deliberate human engagement alongside automation to sustain organizational knowledge over time.

- **Theories:** Knowledge-Based View, Network Theory, Resource Dependence Theory, Transaction Cost Economics

**Abstract / 摘要:**

Organizations can gain substantial knowledge synergies from their alliance portfolios, and research suggests firms may benefit even more when their partners compete directly with each other. However, firms can only capture such synergies if their own inventors are allowed to freely exchange knowledge obtained from these partners to create novel combinations. We challenge this premise and argue that, because partners in such configurations are more concerned about the risks of knowledge leakage to their rivals, they will pressure the focal firm into imposing credible safeguards that restrict the access and handling of knowledge inside its organization. We predict that the constraints imposed by these safeguards will be reflected in a higher disconnectedness in the focal firm's inventor collaboration network, with the extent of these constraints tied to the relative technological bargaining power the focal firm holds over its partners. Importantly, these safeguards are not costless, and we predict that the disconnectedness induced will affect the focal firm's innovation performance by undermining its ability to create and appropriate inventive value. Using a longitudinal sample of pharmaceutical firms, we find consistent support for these arguments. Our study contributes to research on interfirm alliances, intraorganizational networks, and innovation while offering practical insights for managers. #### Abstract / 摘要:

Previous research has produced mixed evidence on the success of green crowdfunding campaigns. We investigate whether country-level environmental institutions help explain these inconsistencies by moderating backers' responses. While such institutions may enhance campaign legitimacy, they can also reduce the perceived urgency to contribute by offering alternative support channels. Analyzing a large Kickstarter dataset with machine learning, we find that green campaigns are less likely to succeed, particularly in countries with stronger environmental institutions. Post-hoc analyses point to a crowding-out effect of institutional support, which dampens individual backing, and suggest that omitted variable bias may partly account for prior conflicting results.

先前的研究对于绿色众筹活动的成功给出了不一致的证据。我们调查了国家层面的环境制度是否通过调节出资者的反应来解释这些不一致性。虽然此类制度可能会提高众筹活动的合法性,但它们也可能通过提供替代性的支持渠道,降低出资者贡献的感知紧迫性。通过使用机器学习分析大型 Kickstarter 数据集,我们发现绿色项目成功的可能性较小,特别是在环境制度较完善的国家。事后分析指向了制度支持的挤出效应,这抑制了个人出资,并表明遗漏变量偏差可能是导致先前研究结果相互矛盾的部分原因。

#### Abstract / 摘要:

Research Summary: We examine how entrepreneur- expressed humility affects early stage investors' willingness to fund new ventures. In pitching contexts where investors rely on relational cues and implicit prototypes of entrepreneurs, we theorize three distinct pathways through which expressed humility shapes funding decisions. First, building on research regarding interpersonal signals in early stage valuation, we propose that humility fosters perceptions of interpersonal affect and trust and team-building qualities, increasing investors' willingness to fund. Second, drawing on implicit leadership theories, we argue that humility may trigger negative perceptions regarding the entrepreneur's ability to make rapid and risky decisions. Across a video- metric analysis of 140 real-world pitches and a randomized experiment with French early stage investors, we show that expressed humility elicits both pathways, but investors prioritize positive attributions. Managerial Summary: Although humility is often regarded as a positive leadership trait, it contradicts implicit prototypes of successful entrepreneurs, who are typically seen as dominant and assertive. We examine how early stage investors perceive and respond to displays of humility during pitches. We propose that entrepreneur-expressed humility Received: 4 October 2023 Revised: 19 December 2025 Accepted: 24 January 2026 DOI: 10.1002/sej.70016 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). ### Abstract / 摘要:

Abstract Although employee diversity can contribute to team creativity, extant research has shown that, when diverse employees form strong demographic faultlines, subgroup identity separation and intensified relationship conflicts may be harmful to team creativity. Therefore, effective remedies in managing relationships and bridging identities between subgroups are urgently needed in these teams. Building on brokering research, we introduce team iungens practice (TIP) —so named from a Latin phrase meaning ‘joins or unites’— as a new team process that team members or leaders can engage to forge and strengthen connections or facilitate new coordination among team members. We propose that teams can effectively utilize this behavioural strategy to bridge structural (faultline) and process (conflict) divides rooted in subgroup identity separation, thereby mitigating their negative impacts on team creativity. In Study 1, we developed and validated a scale to measure TIP. In Study 2, we found that TIPs effectively mitigated the positive effect of demographic faultline strength on relationship conflict and attenuated the negative impact of relationship conflict on team creativity from a multisource and multistage survey study. We demonstrate the value of TIPs as a behavioural strategy for managing demographic faultlines and relationship conflicts in teams.

尽管员工多样性有助于团队创造力，但现有研究表明，当多元化员工形成强烈的人口统计断裂带时，子群体身份的分离和加剧的关系冲突可能会损害团队创造力。因此，在这些团队中，迫切需要有效的补救措施来管理关系并桥接子群体间的身份。基于中介研究，我们引入了“团队连接实践”（TIP）——该名称源自拉丁语词组，意为“加入或联合”——作为一种新的团队过程，团队成员或领导者可以利用它来锻造和加强联系，或促进成员之间的新协调。我们提出，团队可以有效地利用这种行为策略来桥接根植于子群体身份分离的结构性（断裂带）和过程性（冲突）分歧，从而减轻其对团队创造力的负面影响。在研究 1 中，我们开发并验证了衡量 TIP 的量表。在研究 2 中，通过一项多来源、多阶段的问卷调查研究，我们发现 TIP 有效减轻了人口统计断裂带强度对关系冲突的正向影响，并减弱了关系冲突对团队创造力的负面影响。我们证明了 TIP 作为一种管理团队中人口统计断裂带和关系冲突的行为策略的价值。

#### Abstract / 摘要:

Abstract Recent research has shown how cycles of globalization and deglobalization can disrupt firms and networks. Understanding this process requires a historical perspective on how firms and networks coordinate, strategize, and respond to the effects of deglobalization. This paper examines firm-level, network-enabled strategic responses to deglobalization by analysing a selection of key firms operating within the Liverpool (UK) and New York (USA) networks at the turn of the nineteenth century. The case study analyses firms within a broader network structure through network visualization, supplemented by various archival data sources. We explore the strategic responses of multiple firms and demonstrate how the network supported them, enabling them to address the challenges posed by deglobalization. We identify five categories of network-enabled strategic responses to deglobalization: reinforcement, adaptation, shared risk, lobbying, and exit.

近期研究表明,全球化和去全球化的周期性波动会干扰企业和网络。理解这一过程需要从历史视角审视企业和网络在去全球化影响下如何进行协调、制定战略并做出反应。本文通过分析19世纪之交在利物浦(英国)和纽约(美国)网络中运营的一系列关键企业,探讨了企业层面、网络赋能的去全球化战略应对。本案例研究通过网络可视化结合多种档案数据资源,分析了更广泛网络结构中的企业。我们探讨了多家企业的战略应对,并展示了网络如何支持它们应对去全球化带来的挑战。我们确定了网络赋能的五类去全球化战略应对:强化、适应、风险共担、游说和退出。

#### Abstract / 摘要:

Careers in creative crafts are perceived to be precarious: workers face constant rejection and receive low and erratic pay. Yet, some creative craft workers handle these challenges better than others. Precarity sometimes subsides as careers progress, and the core-periphery structure that typifies creative craft production systems is navigable. This raises the question of how creative craft workers can cope productively with the precarity of craft work. We research a prominent creative craft worker collective: country music songwriters. Our study captures the voices of 90 creative craft workers, drawing on secondary interviews with 66 songwriters working

at the core of Nashville's highly corporatized country music production system, and 24 operating at its social and spatial periphery. We find that the key to coping with precarity lies in achieving supportive patterns of social embeddedness by investing in primary craft skills, advancing higher-order vocational skills, and navigating the core-periphery structure of the creative craft production system. As apprentice songwriters practice their craft and learn how to organize Acknowledgments: We are grateful to Journal of Management Associate Editor Nicky Dries for her thoughtful and constructive editorial guidance throughout the review process. We are likewise indebted to four anonymous reviewers, who not only helped to develop the paper methodologically and theoretically, but who also proved to be exceptionally knowledgeable about the context of craft work and the music industry. We also benefitted from spirited conversations during seminar presentations at the Copenhagen Business School, Nova School of Business and Economics, City University of Hong Kong, and the Rotterdam School of Management, Erasmus University. We furthermore presented this paper at the 2022 Academy of Management Annual Meeting and the 2023 EGOS Colloquium, as well as at an inspiring Craft Studio meeting in January 2022, where Tina Dacin was our raconteur.

创意手工艺职业被认为是不稳定的：从业者面临不断的拒绝，且报酬低廉且不稳定。然而，一些创意手工艺者比其他人能更好地应对这些挑战。随着职业的发展，不稳定性有时会消退，且典型创意手工艺生产系统的“核心-边缘”结构是可以驾驭的。这引发了一个问题：创意手工艺者如何有效应对其工作的不稳定性？我们研究了一个著名的创意手工艺者群体：乡村音乐词曲作者。我们的研究捕捉了 90 位创意手工艺者的声音，采用了对纳什维尔高度企业化的乡村音乐生产系统核心圈的 66 位词曲作者以及 24 位在社会和空间边缘工作的词曲作者的二手访谈。我们发现，应对不稳定性关键在于通过投资于基础手工艺技能、提升更高阶的职业技能以及驾驭创意手工艺生产系统的核心-边缘结构，来实现支持性的社会嵌入模式。随着学徒期的词曲作者练习他们的技艺并学习如何组织……

### Abstract / 摘要:

Secondary stakeholder demands represent increasingly important strategic issues for firms. However, the principal drivers of firm response remain poorly understood. We extend research on firm responsiveness to secondary stakeholders by introducing a new theoretical perspective to detail the cognitive processes through which key CEO attributes—namely, personal values and passion—shape the trajectories of firm responsiveness. We first outline key aspects of secondary stakeholder demands to explain why CEO values and passion are important determinants of a firm's response to secondary stakeholder demands. We then explain how a CEO's values and passion influence the process of firm responsiveness. Finally, we extend our arguments to illustrate how values and passion-infused responses may influence social (dis)approval among key organizational stakeholders. By focusing on the cognitive processes of CEOs, we offer novel theoretical contributions to stakeholder theory, strategic leadership research, and the literature on firm social evaluations.

次要利益相关者的诉求正日益成为企业重要的战略议题。然而，企业做出反应的主要驱动因素仍未得到充分理解。本研究通过引入新的理论视角，详细阐述了 CEO 的关键属性——即个人价值观和激情——塑造企业反应轨迹的认知过程，从而扩展了关于企业对次要利益相关者反应的研究。我们首先概述了次要利益相关者诉求的关键特征，以解释为何 CEO 的价值观和激情是企业应对此类诉求的重要决定因素。随后，我们阐释了

CEO 的价值观和激情如何影响企业反应的过程。最后，我们将论点延伸至探讨注入价值观与激情的反应如何影响关键组织利益相关者对企业的社会认可（或不认可）。通过关注 CEO 的认知过程，我们为利益相关者理论、战略领导力研究以及企业社会评价文献做出了新的理论贡献。

#### **Abstract / 摘要:**

Overconfident CEOs are frequently criticized for making value-destroying corporate acquisitions in which they acquire excessively and overpay for their acquisitions. By contrast, we argue that overconfident CEOs can deliver higher returns in acquisition waves because the motivation and the requirement for action speed that occur in acquisition waves are different from other acquisition contexts. Specifically, we hypothesize and find that overconfident CEOs are more likely to capture preemption opportunities by acting earlier in acquisition waves, and such rapid moves enable overconfident CEOs to achieve higher acquisition returns. In addition, drawing upon organizational learning research, we hypothesize and find that in acquisition waves, prewave experience with large and related acquisitions facilitates overconfident CEOs to pursue acquisitions even more quickly during acquisition waves, which further enhances acquisition returns. Contributions to the acquisitions and CEO overconfidence literatures are discussed. Keywords: Mergers & Acquisitions; Corporate Strategy; Strategic Leadership and Governance; Chief Executive Officer (CEO)

过度自信的 CEO 常因进行价值破坏性的公司并购（即过度收购和支付过高溢价）而受到批评。相比之下，本研究认为，由于并购浪潮中行动的动机和速度要求不同于其他并购情境，过度自信的 CEO 在并购浪潮中能够带来更高的回报。具体而言，我们假设并发现，过度自信的 CEO 更有可能通过在并购浪潮中更早采取行动来抓住先发制人的机会，而这种快速行动使他们能够获得更高的并购回报。此外，借鉴组织学习研究，我们假设并发现，在并购浪潮中，此前大规模和相关并购的经验会促使过度自信的 CEO 在浪潮期间更迅速地开展并购，从而进一步提升并购回报。本文最后讨论了对并购和 CEO 过度自信文献的贡献。
