Abstract / 摘要:

Research Summary: This study examines how product shortages among legal firms create competitive opportunities for illegal firms. We analyze 713 drug shortages in the United States between 2017 and 2023 and show that shortages substantially increase illicit pharmacies' sales of affected drugs, which rise by 40.5% during shortages and remain 32.8% higher in the six months after shortages are resolved. The effects are strongest for drugs treating chronic conditions, drugs with fewer substitutes, and drugs experiencing more intense shortages. We also find spillover effects, as illegal sales of drugs typically consumed alongside the shortage drug also increase during shortages and remain higher after shortages are resolved. This evidence underscores how regulatory constraints that limit legal firms' flexibility create opportunities for illegal competitors to capture unmet demand. **Managerial Summary:** We examine how product shortages reshape competition between legal and illegal firms in highly regulated markets. Looking at prescription drug shortages in the United States, we show that illicit pharmacies experience substantial and lasting increases in sales when legal firms are unable to meet demand. Received: 15 October 2025 Revised: 9 February 2026 Accepted: 12 February 2026 DOI: [10.1002/smj.70078](https://doi.org/10.1002/smj.70078) This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). These gains extend beyond the drugs in shortage to related medications, indicating both direct and spillover effects. The results reveal a paradox: regulatory frameworks designed to ensure consumer safety may also restrict legal firms' flexibility, strengthening illegal competitors. These findings highlight the importance of designing regulatory systems and supply chains that safeguard consumer safety without undermining the competitiveness of compliant firms. Coordination between regulatory policy, supply resilience, and enforcement is essential to prevent illicit actors from exploiting market disruptions. **KEYWORDS** drug shortages, illegal competition, informal markets, prescription drugs, regulation 1 |

研究总结: 本研究探讨了合法企业的策略短缺如何为非法企业创造竞争机会。我们分析了 2017 年至 2023 年间美国发生的 713 起药品短缺事件, 结果表明, 短缺显著增加了非法药房对受影响药品的销售额: 在短缺期间, 其销售额增长了 40.5

Abstract / 摘要:

Research Summary: Board human capital theory posits that directors' skills shape firm behavior. Most studies, however, examine one skill type at a time, assuming that each director contributes independently of the other skills represented on the board. We introduce the concept of director skill interdependence, theorizing that a director's influence depends on the skills of fellow directors and their committee assignments. Focusing on entrepreneurial directors in technology-intensive firms, we find that they increase resource allocation toward corporate entrepreneurship (CE); however, this effect diminishes as the number of finance-skilled directors increases, whether on the board or on its corporate development committee. These findings challenge the view of directors' skills as isolated inputs. Instead, the effects of directors' skills are contingent on the board's skill composition and committee structure. Managerial Summary: In technology-intensive firms, directors with entrepreneurial skills are often expected to stimulate corporate entrepreneurship (CE). Our Received: 4 October 2022 Revised: 27 January 2026 Accepted: 9 February 2026 DOI: 10.1002/smj.70075 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–29. wileyonlinelibrary.com/journal/smj 1 findings suggest this relationship is less straightforward. While entrepreneurial directors do increase investment in CE, their impact weakens when directors with finance skills are prevalent on the board or its corporate development committee. These results underscore the importance of director skill interdependence—the idea that a director's influence depends on the skills and roles of fellow directors. Boards should therefore consider not only who is appointed, but also how directors' skills align with one another and how those skills are deployed through committee assignments. Preventing the dominance of conflicting skill sets may enhance the board's ability to support innovation, venturing, and long-term strategic renewal. KEYWORDS board of directors, corporate entrepreneurship, director human capital, entrepreneurial human capital, technology-intensive firms 1 |

研究总结: 董事会人力资本理论认为, 董事的技能塑造了企业的行为。然而, 大多数研究一次只考察一种技能类型, 并假设每位董事的贡献与其董事会中代表的其他技能相互独立。我们引入了董事技能相互依赖性的概念, 理论化认为董事的影响力取决于其同事的技能及其所在的委员会分配。针对技术密集型企业中的创业型董事, 我们发现他们增加了向公司创业 (CE) 的资源配置; 然而, 随着财务背景董事人数的增加, 无论是在董事会还是在其公司发展委员会中, 这种效应都会减弱。这些发现挑战了将董事技能视为孤立投入的观点。相反, 董事技能的效果取决于董事会的技能构成和委员会结构。管理总结: 在技术密集型企业中, 拥有创业技能的董事通常被期望能激发公司创业。我们的研究表明, 这种影响并非在所有情况下都一致。

Abstract / 摘要:

Research Summary: How do new ventures strategically position their products to accelerate regulatory clearance? We investigate this question in the medical device industry, where regulatory clearance is a prerequisite for market entry. We examine 239 new firms' 510(k) device clearances by the FDA between 2001 and 2019. Our approach combines quantitative analysis of firms' claims of similarity with extensive field research. We find that strategic positioning significantly impacts time to clearance, and that effective strategies evolve over time. For first products, firms accelerate clearance by citing fewer reference products while strategically positioning relative to same-category products and to category exemplars; for second products, firms accelerated clearance by referencing their own products. These findings extend positioning theory into regulatory contexts and reveal how a firm's optimal strategic positioning changes across successive products. Managerial Summary: We study how new medical device startups can speed up regulatory approval by strategically positioning their products for the FDA. Analyzing 239 firms' 510(k) clearances from 2001 to Received: 5 June 2025 Revised: 16 January 2026 Accepted: 28 January 2026 DOI: 10.1002/smj.70072 This is an open access article under the terms of the Creative Commons Attribution-NonCommercial-NoDerivs License, which permits use and distribution in any medium, provided the original work is properly cited, the use is non-commercial and no modifications or adaptations are made. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–34. wileyonlinelibrary.com/journal/smj 1 2019, we find that the way companies frame their products for regulators plays a key role in how quickly they are cleared. For their first products, firms benefit from referencing fewer existing devices and aligning with well-known or similar products. For their second product, referencing their own previously cleared device helps accelerate the process. Our findings show that positioning is a powerful tool for navigating regulatory hurdles. We highlight how the most effective strategy changes as a company grows, offering practical guidance for leaders bringing new medical technologies to market. **KEYWORDS** category exemplars, FDA 510(k) clearance, new ventures, regulatory strategy, strategic positioning 1 |

研究总结: 新创企业如何通过产品的战略定位来加速监管审批? 我们在医疗器械行业调查了这一问题, 在该行业中, 监管审批是市场准入的先决条件。我们考察了 2001 年至 2019 年间, 239 家新公司获得的 510(k) 器械审批情况。我们的研究方法结合了对公司相似性声明的定量分析和广泛的实地研究。我们发现, 战略定位显著影响审批时间, 且有效的策略会随时间而演变。对于首款产品, 企业通过引用较少的参考产品, 并相对于同类产品和类别典范进行战略定位来加速审批; 对于第二款产品, 企业则通过引用自己的产品来加速审批。这些发现将定位理论扩展到了监管语境中, 并揭示了公司的最优战略定位如何随着后续产品的推出而改变。管理总结: 我们研究了医疗器械初创企业如何通过针对 FDA 对其产品进行战略定位来加快监管审批速度。

Abstract / 摘要:

How can a firm increase its chances of spotting an up-and-coming competitor? I examine how the experience of top management teams (TMTs) relates to the foresight needed to spot “rising stars” —that is, competitors that are currently ignored by other firms in a market but later grow to become prominent threats. My theory hinges on the primacy of relational versus categorical reasoning in mental models of competition. Firm mental models conceptualize competition through a relational lens, such that deep experience within the focal firm encourages fixation on familiar, proximate rivals while varied experience across firms redirects attention to the competitive periphery. In contrast, industry mental models rely on categorical reasoning, such that varied experience across industries yields a shallow understanding of divergent—and often irrelevant—categorical logics while deep experience in the focal industry builds the expertise to see which competitors will break out in the future. I further show that deep industry experience enables the TMT to draw more useful insights from varied firm experience, while a combination of varied firm and industry experience creates harmful information overload. I find support for my theory using a hand-collected dataset on competitor identification and TMTs in the enterprise software industry.

企业如何才能增加发现潜在竞争对手的机会？我考察了高管团队（TMT）的经验与发现“新星”——即目前被市场中其他公司忽视但随后成长为突出威胁的竞争对手——所需的前瞻性之间的关系。我的理论核心在于竞争心理模型中关系型推理与范畴型推理的优先地位。企业的心理模型通过关系视角来构思竞争，因此在目标公司内部的深厚经验会促使高管关注熟悉的、临近的对手，而跨公司的多样化经验则会将注意力转向竞争外围。相比之下，行业的心理模型依赖于范畴型推理，因此跨行业的多元经验会导致对不同的（且往往无关的）范畴逻辑理解浅薄，而目标行业的深厚经验则能建立起洞察哪些竞争对手将在未来脱颖而出的专业知识。我进一步表明，深厚的行业经验使高管团队能够从多元的公司经验中提取更有用的见解，而多元的公司经验与多元的行业经验相结合则会产生有害的信息过载。我利用关于企业软件行业中竞争对手识别和高管团队的手工收集数据集，为我的理论找到了支持证据。

Abstract / 摘要:

Social intermediaries play a critical role in addressing exclusion, but must navigate entrenched power relations within informal institutions. Drawing on comparative case studies of three social intermediaries, this study examines how intermediaries negotiate systemic power—manifested through domination and discipline—across intersecting caste–gender hierarchies. We identify three distinct approaches to elite engagement: elite delegation, elite co-optation, and creative accommodation. Each of these reflects a specific combination of communal positioning and power frame adopted by intermediaries. Elite delegation, grounded in a detached communal positioning and a zero-sum power frame, prioritizes rapid scaling but reproduces existing hierarchies. Elite co-optation, marked by pragmatic communal positioning and a conditional positive-sum power frame, fosters short-term cooperation yet achieves only partial inclusion. Creative accommodation, characterized by embedded communal positioning and a positive-sum power frame, enables social transformation by simultaneously empowering marginalized groups and constructively engaging elites. By demonstrating how communal positioning and power frames shape these approaches, the study advances understanding of how systemic power sustains exclusion and how it can be reconfigured from within. We contribute to research on informal institutions and inclusion by elucidating how intermediaries can leverage positive-sum engagements to reshape domination and discipline, fostering more equitable and enduring informal institutional change.

社会中介在解决社会排斥问题中发挥着关键作用，但必须应对非正式制度中根深蒂固的权力关系。通过对三个社会中介机构的比较案例研究，本研究探讨了中介机构如何在交叉的种姓-性别等级制度中，应对通过“支配”与“规训”体现出的系统性权力。我们识别了三种不同的精英参与路径：精英委派、精英吸纳和创造性调适。每种路径都反映了中介机构所采取的特定社群定位与权力框架的结合。精英委派基于超脱的社群定位和零和权力框架，优先考虑快速扩张，但会复制现有的等级制度。精英吸纳以务实的社群定位和有条件的正和权力框架为特征，促进了短期合作，但仅实现了部分包容。创造性调适以嵌入式社群定位和正和权力框架为特征，通过在赋能边缘群体的同时与精英进行建设性接触，实现了社会转型。通过论证社群定位和权力框架如何塑造这些路径，本研究增进了对系统性权力如何维持排斥以及如何从内部重构权力的理解。通过阐明中介机构如何利用正和参与来重塑支配关系，我们为正式制度和包容性研究做出了贡献。

4. Knowledge Bridging: How Acquirers Leverage the Knowledge of Their Targets' Prior Alliance Partners

知识桥接：收购方如何利用目标方先前联盟伙伴的知识

Abstract / 摘要:

Extensive research has examined how firms rely on alliances and acquisitions for sourcing technological knowledge, but we do not know whether acquirers can benefit from the technological knowledge of their targets' pre-acquisition alliance partners. This study demonstrates that acquirers leverage relational assets inherited from their targets to access knowledge from the targets' prior partners—knowledge that the target itself did not absorb during the alliance, including knowledge developed by the partner post-alliance. We term this form of knowledge absorption “knowledge bridging.” We reveal that knowledge bridging enables acquirers to more effectively absorb knowledge from their targets' prior partners, compared to similar firms without prior alliances with the target. Knowledge bridging intensifies with the target' s previous knowledge absorption from its partners. Yet, this effect is weakened by the relatedness between the knowledge bases and business domains of the acquirer and the target' s partners and strengthened by the target' s post-acquisition autonomy.

现有研究广泛探讨了企业如何依靠联盟和收购来获取技术知识，但我们尚不清楚收购方是否能从被收购目标方之前的联盟伙伴那里获益。研究表明，收购方可以利用从目标方继承的关系资产，获取目标方先前合作伙伴的知识——这些知识包括目标方在联盟期间未吸收的知识，以及合作伙伴在联盟结束后开发的知识。我

们将这种知识吸收形式称为“知识桥接”。研究发现，与未与目标方建立过联盟的同类企业相比，知识桥接使收购方能够更有效地从目标方的先前合作伙伴处吸收知识。知识桥接的强度随着目标方从其合作伙伴处预先吸收知识的增加而增强。然而，这一效应会因收购方与目标方合作伙伴之间知识基础和业务领域的关联性而减弱，并因目标方在收购后的自主权而增强。

Abstract / 摘要:

Violence that erupts in communities invites complex interpretations that can create a dilemma for business leaders about how to respond. Investigating how organizations respond to violence in protests, we build on the community embeddedness literature and propose that business leaders' responses to protest violence depend on their perceptions of whether the violence is justified. Leaders may view reported protest violence as evidence of either social disorder or a valid grievance in the community where the violence occurs and where their companies are headquartered. We theorize that business leaders' interpretations of violence are influenced by their community's recent history: A history of protest violence unrelated to the social cause underlying the current protest weakens the managerial perception that the social issue is relevant to the community, while a history of grievance-validating events strengthens this perception. Using hand-collected data on corporate announcements following the 2020 Black Lives Matter (BLM) movement, we find that firms are less likely to announce diversity actions in response to reported protest violence in communities marked by persistent violence in previous non-BLM protests, but they are more likely to do so in communities with records of more police shootings. These same community conditions also shape the effect of violence on whether firms decide to publicly endorse the movement when they announce their corporate actions. Demonstrating that violence reshapes the ways that organizations respond to protests, we discuss the implications of our findings for research on violence, social movements, and corporate activism. 1 Cornell University 2 Dartmouth College 3 The Chinese University of Hong Kong * All authors contributed equally; authorship is listed in alphabetical order. 社区中爆发的暴力冲突引发了复杂的解读，这令企业领导者在决定如何应对时陷入困境。通过研究组织如何应对抗议活动中的暴力行为，我们基于社区嵌入理论提出，企业领导者对抗议暴力的反应取决于他们对暴力

是否正当的感知。领导者可能将报道的抗议暴力视为社会动荡的证据，也可能将其视为所在社区（公司总部所在地）正当诉求的体现。我们推论，企业领导者对暴力的解读受社区近期历史的影响：如果该社区曾发生过与当前抗议诉求无关的暴力史，会削弱管理者对该社会议题与社区相关性的感知；而若社区曾发生过验证诉求正当性的事件，则会强化这种感知。利用 2020 年“黑人的命也是命”（BLM）运动后企业公告的数据，我们发现，在过去非 BLM 抗议中存在持续暴力记录的社区，企业较少因报道的抗议暴力而宣布多样性举措；但在警察枪击事件记录较多的社区，企业则更有可能宣布此类举措。这些社区条件同样影响了暴力行为对企业在宣布行动时是否公开支持该运动的决策。

Abstract / 摘要:

We examine the formal authority structure in multisubsidiary firms, focusing on comanaged subsidiaries owned by two or more subsidiaries that belong to the same firm. We argue that a subsidiary is more likely to be comanaged when its need for intrafirm coordination and thus, the need for information processing are high. Accordingly, the likelihood that a subsidiary will be comanaged by other subsidiaries is positively associated with the extent of its relatedness and multimarket contact. Furthermore, the turbulence of the subsidiary's environment moderates these relationships; it amplifies the relatedness and comanagement link but attenuates the multimarket contact and comanagement link, reflecting the complementary and substitutive nature of these interdependencies, respectively. Results of analyses based on the population of subsidiaries of manufacturing firms operating in France between 1999 and 2004 support the predictions. Our theory and findings have implications for the study of multiauthority structures more broadly, including project-based and matrix organizations, where similar demands shape the design of formal authority relationships across multiple superiors.

本文探讨了多子公司企业的正式权威结构，重点关注由同一公司旗下的两个或多个子公司共同拥有的“共同管理子公司”。我们认为，当子公司的内部协调需求以及信息处理需求较高时，该子公司更有可能被共同管理。因此，一个子公司被其他子公司共同管理的可能性，与其相关程度及多市场接触的程度呈正相关。此外，子公司环境的动荡性调节了这些关系：它增强了相关性共同管理之间的联系，但削弱了多市场接触与共同

管理之间的联系，这分别反映了这些相互依赖关系的互补性和替代性特征。基于 1999 年至 2004 年间在法国运营的制造业子公司总体的分析结果支持了上述预测。我们的理论和发现对于更广泛的多重权威结构研究（包括基于项目的组织和矩阵式组织）具有启示意义，在这些组织中，跨多个上级的正式权威关系设计同样受到类似需求的影响。

2. Supervisory Support Shift: The Impact of Disability Inclusion on Coworker Productivity

主管支持的转移：残障包容对同事生产力的影响

Abstract / 摘要:

A growing number of organizations hire employees with visible physical disabilities into jobs where they can perform as effectively as their nondisabled counterparts. Many practitioners expect such inclusion to positively impact nondisabled coworkers. Yet, the consequences for nondisabled coworkers' productivity remain unclear. We focus on an underexplored mechanism: frontline managers' discretionary allocation of supervisory support. Drawing on research on benevolent ableism and finite managerial capacity, we theorize that adding an employee with a visible physical disability—even one fully capable of performing the task—can shift supervisory support toward the disabled employee, reducing the support available to nondisabled coworkers. We test this theory using a natural experiment in a teleservice company that randomly assigned recruits, including individuals with visible physical disabilities, to project teams. We analyze 40,334 employee-month productivity bonus records, a standardized, nondiscretionary measure consolidating multiple performance indicators and net of supervisor evaluations. Supplemented with interviews with 15 frontline managers and 28 subordinate agents, our analyses show that managers allocated more supervisory support to disabled employees and that this reallocation dampened nondisabled coworkers' productivity. Our study advances understanding of how disability inclusion shapes supervisory support patterns and its implications for coworker performance. Funding: X. 越来越多的组织雇佣显性身体残障人士从事其表现能与非残障同事一样出色的工作。许多从业者预期这种包容行为会对非残障同事产生积极影响。然而，其对非残障同事生产力的后果仍不明确。本研究关注一个尚未被充分探索的机制：一线经理对主管支持的自由裁量分配。借鉴善意能力歧视（benevolent ableism）和有限管理能力的理论，我们推论：增加一名显性身体残障员工——即使该员工完全有能力胜任工作——也可能导致主管支持向残障员工转移，从而减少对非残障同事的支持。我们通过在一家人远程服务公司进行的自然实验测试了这一理论，该公司将包括显性身体残障人士在内的新员工随机分配到项目团队。我们分析了 40,334 条员工月度生产力奖金记录，这是一种标准化的、非自由裁量的衡量指标，综合了多个绩效指标且排除了主管评价的影响。辅之以对 15 名一线经理和 28 名下属代理人的访谈，我们的分析显示，经理向残障员工分配了更多的主管支持，而这种重新分配抑制了非残障同事的生产力。本研究推进了对残障包容如何塑造主管支持模式及其对同事绩效影响的理解。

3. Knowing Enough to Be Dangerous: The Problem of “Artificial Certainty” for Expert Authority When Using AI for Decision Making and Planning

一知半解的危险：使用人工智能进行决策和规划时专家权威面临的“人为确定性”问题

Abstract / 摘要:

This study examines how experts who use advanced artificial intelligence (AI) technologies that generate highly detailed and realistic representations can create what we term “artificial certainty,” which we define as the illusion that complex future outcomes are definitively knowable, even though they are inherently uncertain. Through a comparative study of two urban planning organizations using the same AI simulation tool, we show how this artificial certainty emerges from the ways process experts create and deploy AI-generated representations. The findings reveal three interconnected representational practices that shape how laypeople perceive the certainty of a representation: controlling the level of detail, shaping stakeholder engagement, and constructing the model’s meaning. We find that when process experts emphasize enhancement—amplifying technological capabilities within these practices—stakeholders mistake representations for reality, undermining expert authority. Conversely, when process experts engage in modulation—tempering how AI outputs are presented and integrated into decision making—they preserve the authority necessary to keep uncertainty alive. These findings reconceptualize process expertise as a distinct form of interpretive work that helps maintain useful levels of uncertainty in the face of growing pressures toward artificial certainty. Based on these insights, we develop a critical distinction between representations of the future versus representations for the future, offering new ways to theorize decision making under uncertainty as organizations increasingly deploy sophisticated AI systems. Funding: This work was supported by the National Science Foundation [Grants SES-1057148 and SES-2051896].

本研究探讨了使用先进人工智能 (AI) 技术 (能生成高度详尽且逼真表征) 的专家, 如何创造出我们称之为“人为确定性”的现象。我们将此定义为一种错觉, 即认为复杂的未来结果是明确可知的, 尽管它们本质上具有不确定性。通过对两家使用相同 AI 模拟工具的城市规划组织的对比研究, 我们展示了这种“人为确定性”是如何从流程专家创建和部署 AI 生成表征的方式中产生的。研究结果揭示了三种相互关联的表征实践, 它们塑造了外行如何感知表征的确定性: 控制细节水平、塑造利益相关者参与以及构建模型的意义。我们发现, 当流程专家强调“增强”(即在这些实践中放大技术能力) 时, 利益相关者会误将表征当成现实, 从而损害专家权威。相反, 当流程专家进行“调节”(即缓和 AI 输出的呈现方式并将其整合进决策过程) 时, 他们保留了维持不确定性所需的权威。这些发现将流程专门知识重新定义为一种独特的解释性工作, 有助于在日益增长的人为确定性压力面前维持有益的不确定性水平。基于这些见解, 我们对“未来的表征”与“表征的未来”进行了批判性的区分。

4. Advisor–Advisee Research Overlap and Its Implications for Scientists’ Early-Career Performance in the United States

Abstract / 摘要:

A genealogical training process, in which senior (advisor) scientists mentor and train junior (advisee) scientists is one of the core organizational features of modern science. In this paper, we examine a key question faced by all junior scientists during their training: What impact does an advisee’s research agenda overlap with

his or her advisor have on the advisee's career-relevant performance outcomes? To answer this question, we constructed a novel, bibliometric-record-based data set on 11,289 U.S. biomedical scientists (advisees) who were trained in 5,632 principal investigator advisors' labs between 1985 and 2009. We examined the relationship between advisor-advisee research overlap and an array of performance outcomes for emerging scientists, revealing a consistently positive relationship between high advisor-advisee research overlap and the junior scientist's early-career funding outcomes. We further provide evidence that this positive relationship rests upon enhanced tacit knowledge transfer, as well as providing suggestive evidence for the boundary conditions of an intellectual independence imperative and potential competition between advisors and advisees. Taken together, these findings provide a more complete understanding of how advisor-advisee relationships shape new scientists' performance during their early careers. Supplemental Material: The online appendix is available at <https://doi.org/10.1287/orsc.2023.17601>.

由资深科学家（导师）指导和培训初级科学家（学生）的谱系化培训过程，是现代科学的核心组织特征之一。在本文中，我们探讨了所有初级科学家在培训期间面临的一个关键问题：学生的研究议程与导师的重叠会对学生的职业绩效结果产生什么影响？为回答这一问题，我们构建了一个全新的、基于文献计量记录的数据集，涵盖了 1985 年至 2009 年间在 5,632 名首席科学家（PI）实验室中接受培训的 11,289 名美国生物医学科学家（学生）。我们考察了导师-学生研究重叠与新兴科学家一系列绩效结果之间的关系，揭示了高度的导师-学生研究重叠与初级科学家早期职业资助结果之间存在一致的正相关关系。我们进一步提供证据表明，这种正相关关系建立在增强的隐性知识转移基础之上，并为知识独立性的必然要求以及导师与学生之间潜在竞争的边界条件提供了暗示性证据。综上所述，这些发现为导师-学生关系如何塑造新科学家早期职业表现提供了更全面的理解。

5. Lending Leniency: The Relationship Between High-Status Affiliations and Consumer Acceptance of Products in Contested Markets

Abstract / 摘要:

Markets are often sites of ongoing contestation regarding the acceptability of various product features and production practices. Although prior research has explored how producers resolve moral controversies, less attention has been paid to how they convince consumers of their products' moral acceptability when consensus remains elusive. This study addresses this gap by examining a prominent tactic: producers' strategic affiliations with high-status moral advisors. We theorize that such affiliations reassure consumers, making them more likely to accept reduced financial returns for products bearing a strong stamp of moral approval. We test and find support for this argument using data on 1,540 Shariah-compliant bonds, or sukuk, where there has been ongoing debate over what product features are allowed according to Islam. We find that sukuk endorsed by high-status Shariah scholars (sheikhs) have significantly lower coupon rates, indicating consumers' willingness to accept reduced financial returns in exchange for moral reassurance. Additionally, the impact of high-status endorsements weakens as sukuk adhere more closely to strict moral interpretations, highlighting a compensatory relationship between status signals and substantive product features. Supplementary analyses reveal that issuers are more likely to seek endorsements from high-status moral advisors when their products are complex or opaque. Overall, this research helps to build a more comprehensive picture of the tactics producers use to overcome the challenges of contested moral markets.

市场往往是关于各种产品特征和生产实践可接受性的持续争议场所。尽管先前的研究已经探讨了生产者如何解决道德争议，但对于在尚未达成共识时，生产者如何说服消费者接受其产品的道德合理性，关注较少。本研究通过考察一种突出的策略——生产者与高地位道德顾问的战略性关联——来填补这一空白。我们推论，这种关联能安抚消费者，使他们更愿意接受带有强烈道德认可标记的产品所带来的较低财务回报。我们利用

1,540 只伊斯兰债券 (sukuk) 的数据测试并证实了这一论点, 在该领域, 关于哪些产品特征符合伊斯兰教法一直存在争议。我们发现, 由高地位伊斯兰学者 (谢赫) 背书的债券, 其票息率显著较低, 这表明消费者愿意接受较低的财务回报以换取道德上的宽慰。此外, 随着债券本身更严格地遵循道德解释, 高地位背书的影响会减弱, 这突显了地位信号与实质性产品特征之间的补偿关系。补充分析显示, 当产品复杂或不透明时, 发行人更有可能寻求高地位道德顾问的背书。总体而言, 本研究有助于构建一个更全面的图景, 展示在争议市场中生产者如何获取合法性。

Abstract / 摘要:

Institutional alignment comprises the integration of sanctioned organizational models and standardized managerial roles, thus reconstructing traditional organizations as contemporary actors with homogenous global identities. We adopt this perspective to illuminate the processes by which a business family homogenizes to conform to the global world order, through extensive use of advisors and management consultants. To do so, we narrate the experience of a third-generation Israeli-based multinational enterprise. We find that the cumulative adoption of standardized corporate organizational models periodically shifts the family's decision-making reference points, enabling it to expand its product and geographic scope and act as a global player.

制度对齐包含受认可的组织模式与标准化管理角色的整合, 从而将传统组织重塑为具有同质化全球身份的当代行动者。我们采用这一视角, 通过对顾问和管理咨询师的大量使用, 阐明了家族企业为顺应全球世界秩序而进行同质化的过程。为此, 我们叙述了一家总部位于以色列的第三代跨国企业的经历。研究发现, 对标准化公司组织模式的累积采用会周期性地改变家族决策的参考点, 使其能够扩大产品和地理范围, 并以全球参与者的身份采取行动。

- **理论:** 反事实思维, 行为决策理论, 预期遗憾理论, 社会比较理论

Abstract / 摘要:

This study explores the role of investors' counterfactual thinking regarding errors of commission and omission and how these relate to willingness to invest in new ventures. Drawing from behavioral economics and psychology, we focus on the salience of prospective counterfactuals at the screening stage. Our experimental findings demonstrate that increasing the salience of commission-related counterfactuals, particularly social counterfactuals, significantly reduces investors' willingness to invest. This effect underscores the influence of anticipated regret, social comparison, and emotional responses in shaping investment behavior. By contrast, omission-related counterfactuals show no measurable impact, suggesting a prevailing not-investing norm and limited effect of potential fear of missing out among new-venture investors. Our results provide a deeper understanding of how investors navigate the tension between avoiding missed opportunities and minimizing losses, emphasizing the salience of situational triggers as opposed to stable traits or market-wide factors. These insights highlight the importance of counterfactual thinking as a theoretical lens for studying decision-making in the high-risk, high-reward context of new-venture investing.

本研究探讨了投资者关于“做错之误”（commission errors）和“错过之误”（omission errors）的反事实思维在投资决策中的作用，以及这些思维如何与投资新创企业的意愿相关联。借鉴行为经济学和心理学，我们重点研究了筛选阶段前瞻性反事实的显著性。实验结果表明，增强与“做错之误”相关的反事实（尤其是社交反事实）的显著性，会显著降低投资者的投资意愿。这种效应强调了预期遗憾、社会比较和情感反应在塑造投资行为中的影响。相比之下，与“错过之误”相关的反事实没有表现出可衡量的影响，这表明新创企业投资者中普遍存在“不投资”的规范，且潜在的“错失恐惧症”（FOMO）影响有限。研究结果有助于深入理解投资者如何在避免错失机会与最小化损失之间权衡，并强调了情境诱因相对于稳定特质或市场因素的显著性。这些见解突显了反事实思维作为研究高风险、高回报背景下创业投资决策理论视角的重要性。

Abstract / 摘要:

Drawing on insights from the knowledge-based view of the firm, we introduce a path that links founders' founding experience to organizational design choices in tech-based ventures that instill absorptive capacity, which, in turn, allows them to produce innovation output at scale. We hypothesize that founders' recognition of the importance of knowledge management, and their acquisition of skills to implement knowledge management systems effectively, underlie this venture-building path. We also suggest that this path is stronger when experienced founders have been exposed to venture capital investors in their prior ventures. We test our theoretical predictions with a longitudinal sample of 1,560 U.S. tech-based ventures.

借鉴企业知识基础观的见解，我们引入了一条路径，将创始人的创业经验与科技型企业的组织设计选择联系起来。这些选择培育了吸收能力，进而使其能够实现规模化的创新产出。我们假设，创始人对知识管理重要性的认知，以及他们有效实施知识管理系统的技能习得，是这一企业构建路径的基础。我们还认为，当资深

创始人在此前的创业经历中接触过风险投资人时，这一路径会更加强化。我们通过 1,560 家美国科技型企业的纵向样本对理论预测进行了验证。

Abstract / 摘要:

This study examines how entrepreneurial orientation (EO) influences firms' likelihood of product recalls. Integrating EO and upper echelons theory, we first argue that EO's bold, variance-enhancing actions increase a firm's product recall risk by diverting managerial attention away from quality control. Using 23 years of data on U.S. public firms, we find that EO increases recall likelihood. Second, we argue that this relationship is moderated by chief operating officer (COO) power, and the effectiveness of COO power is contingent on the firm's product life cycle context. Empirical analyses support our theory and offer new insights about EO's potential downsides.

本研究探讨了创业导向（EO）如何影响企业产品召回的可能性。结合创业导向和高层梯队理论，我们首先认为，创业导向所包含的大胆、增加变异的行为会分散管理层对质量控制的注意力，从而增加企业的产品召回风险。通过对美国上市公司 23 年的数据分析，我们发现创业导向确实增加了召回的可能性。其次，我们认为这种关系受到首席运营官（COO）权力的调节，且 COO 权力的有效性取决于企业的产品生命周期背景。实证分析支持了我们的理论，并为创业导向的潜在弊端提供了新的见解。

- **理论:** 角色身份理论

Abstract / 摘要:

Hybrid entrepreneurship—pursuing a venture while maintaining paid employment—can enhance or undermine well-being. Based on a longitudinal, qualitative study, we identify two distinct trajectories shaped

by envisioned future selves: delayed entrepreneurial gratification with cumulative strains on well-being, and present gratification with supportive effects on well-being. Drawing on role identity theory, we theorize how role internalization and identity centrality relate to the well-being experiences of hybrid entrepreneurs and introduce gratification and rationalization as ways to handle strains on well-being. Our findings offer a deeper understanding of the divergent well-being experiences in hybrid entrepreneurship.

混合型创业（即在保持受薪工作的同时开展创业活动）既可能增强也可能损害个体的福祉。基于一项纵向定性研究，我们确定了由预想的未来自我塑造的两条截然不同的轨迹：伴随累积性福祉压力的延迟创业满足感，以及对福祉具有支持作用的当下满足感。借鉴角色身份理论，我们构建了角色内化和身份中心性如何与混合型创业者的福祉体验相关的理论，并引入满足感和合理化作为处理福祉压力的方法。我们的研究结果为混合型创业中差异化的福祉体验提供了更深入的理解。

- **Theories:** Status-based Perspective, Resource-Based View
- **理论:** 基于地位的视角, 资源基础观

Abstract / 摘要:

Abstract

Star inventors are highly valuable resources, offering scarce knowledge and expertise that significantly enhance a firm's innovation performance. Beyond their expertise, what sets star inventors apart is their star status—a role that prescribes them high positions in organizational hierarchy and the power to steer resource allocation within the organization. The status-based perspective suggests that star inventors pursue activities that align with and reinforce their high-status. Integrating these insights, we explore how star inventors distinctively influence incremental innovation and radical innovation of firms. Specifically, we propose that the effect of star inventors on incremental innovation follows an inverted U-shaped relationship, whereas their effect on radical innovation is continuously positive. Further, we posit that collaboration intensity between star inventors enhances radical innovation but does not similarly benefit incremental innovation. Analysing data from publicly traded, R&D-active US firms and their more than one million patents, we broadly find support for our hypotheses. Our primary contribution lies in explaining how status shapes star inventors' distinct contributions to incremental and radical innovations, offering insights to support strategic decision-making in managing star talent.

明星发明人是极具价值的资源，他们提供稀缺的知识和专业技能，能够显著提升企业的创新绩效。除了专业技能外，明星发明人的独特之处在于其“明星地位”——这一角色赋予了他们在组织层级中的高位，以及引导组织内资源配置的权力。基于地位的视角表明，明星发明人倾向于从事与其高地位相符并能强化该地位的活动。结合这些见解，本文探讨了明星发明人如何对企业的渐进式创新和激进式创新产生不同的影响。具体而言，我们提出明星发明人对渐进式创新的影响呈倒 U 型关系，而对激进式创新的影响则是持续正向的。此

外，我们假设明星发明人之间的协作强度会增强激进式创新，但对渐进式创新并无同等益处。通过分析来自美国上市、研发活跃的企业及其超过一百万项专利的数据，我们的假设得到了广泛支持。本文的主要贡献在于解释了地位如何塑造明星发明人对渐进式和激进式创新的独特贡献，为管理明星人才的战略决策提供了见解。

Abstract / 摘要:

Abstract This study addresses the problem of handling constraints in innovative projects. Using a qualitative research design on base of the pyramid (BOP) innovation projects, we examine how creativity emerges from constraints. By investigating responses to experienced constraints from 60 BOP innovation projects, we identify specific micro-processes used to deal with constraints, which we introduce as constraint-handling practices. Moreover, we investigate the interplay between these constraint-handling practices and the nature of the constraints in the resultant sequence of such micro-processes, distinguishing between goal and task constraints. Drawing from theory on effectuation and causation, we explain how different constraint-handling practices are implemented in innovation projects in response to these constraints. We demonstrate that instead of relying on an either/or mode of effectuation versus causation, actors in constrained BOP innovation projects exhibit repeated cycles of both effectuation- and causation-based constraint-handling practices.

本研究旨在解决创新项目中的约束处理问题。通过对金字塔底层（BOP）创新项目的定性研究设计，我们探讨了创造力是如何从约束中产生的。通过调查 60 个 BOP 创新项目对所遇约束的反应，我们识别了用于应对约束的具体微观过程，并将其定义为“约束处理实践”。此外，我们研究了这些约束处理实践与约束性质在微观过程序列中的相互作用，并对目标约束和任务约束进行了区分。借鉴效果推理（Effectuation）和因果推理（Causation）理论，我们解释了创新项目如何针对这些约束实施不同的约束处理实践。研究表明，受限的 BOP 创新项目中的行动者并非依赖于单一的效果推理或因果推理模式，而是表现出基于这两种理论的约束处理实践的重复循环。

- **Theories:** Strategic Orientation
- **理论:** 战略导向

Abstract / 摘要:

Abstract Integration decisions are not isolated, as they are embedded in an organizational context. Using a multi-country sample (Nordics, German speaking Europe, and China) of small- and medium-sized acquirers, we explore the influence of firm strategic orientations on how managers conceptualize acquisitions, make integration decisions, and impact acquisition performance. Both market- and entrepreneurial-oriented firms coordinate activities following an acquisition, but they do so differently. Entrepreneurial-oriented acquirers use human integration to align target managers with common goals and reinforce their decision-making autonomy. In contrast, market-oriented acquirers strive for functional integration and use human integration to reduce target firm managers' decision-making autonomy. Thus, achieving coordination after an acquisition can follow different paths that are closely aligned with the strategic orientation of the acquirer. In other words, different strategic orientations guide managers' decisions, resulting in different paths to acquisition success.

整合决策并非孤立存在, 而是植根于组织背景之中。利用来自多个国家(北欧、德语区欧洲和中国)的中小型收购方样本, 我们探讨了企业战略导向如何影响管理者对收购的构想、整合决策的制定以及收购绩效。市场导向和创业导向的企业在收购后都会进行活动协调, 但其方式有所不同。创业导向的收购方利用人力整合使目标公司的管理者与共同目标保持一致, 并强化其决策自主权。相比之下, 市场导向的收购方力求职能整合, 并利用人力整合来降低目标公司管理者的决策自主权。因此, 收购后的协调可以通过与收购方战略导向密切相关的不同路径来实现。换言之, 不同的战略导向引导着管理者的决策, 从而产生了通往收购成功的不同路径。

Abstract / 摘要:

Abstract

This conceptual article argues that the mutual relevance of grand challenges and organization and management studies is best approached phenomenologically. Rather than constituting objects to be theorized or denoting special empirical contexts, grand challenges structure researchers' attention and shape their interpretations of the processes and systems of deliberation through which collective action is coordinated. From this perspective, grand challenges require researchers to innovate their understandings of deliberation and to ensure that newly generated knowledge is redirected towards management and policymaking. The article integrates the Carnegie School theory of organization with French pragmatic sociology's theory of

justification, or economies of worth, to develop a phenomenological model of situated deliberation that links decision-making with moral reasoning. This model highlights deliberation's articulated, evaluative, contestable, and trans-institutional character, as well as its grounding in the cognitive capacities and sociality of actors and observers—regardless of the scale, scope, or stratification of the underlying coordination problems. Building on this framework, the article advocates that grand challenge researchers adopt the standpoint of entrepreneurial observers: actors anchored by socio-economic and scientific commitments who envision the integration of previously disjointed social systems of deliberation to orient collective action.

这篇概念性文章认为，重大挑战与组织管理研究之间的相互关联性最好通过现象学的方法来探讨。重大挑战不应仅被视为理论化的对象或特殊的实证背景，它还结构化了研究者的注意力，并塑造了他们对协调集体行动的审议过程和系统的解释。从这个角度来看，重大挑战要求研究者创新对“审议”的理解，并确保新产生的知识被重新导向管理和决策制定。本文将卡内基学派的组织理论与法国实用主义社会学的辩护理论（或称价值体制）相结合，开发了一个情境化审议的现象学模型，将决策制定与道德推理联系起来。该模型强调了审议的清晰表达性、评估性、可争论性和跨制度特征，以及它在行动者和观察者的认知能力和社会性中的基础——无论底层协调问题的规模、范围或分层如何。基于这一框架，文章倡导重大挑战研究者采取“创业型观察者”的立场。

Abstract / 摘要:

I have measured out my life with coffee spoons.—T.S. Eliot, *The Love Song of J. Alfred Prufrock* 5 o' clock on a Friday afternoon. Raining outside. And here I am, scribbling a footnote to my application for another tenured position: 'Dear colleagues, these are publications in journals one could describe as (ahem...) 'modestly ranked'. Yet, what a thrill it has been to conduct this fieldwork, investigate with subtlety, write with passion, and share the results with all my colleagues! Isn't the pleasure of research worth all the stars in the world?' The short answer is no. But the longer answer draws us deep into the fabric of this joyless scholarship and its consequences. As scholars, pleasure sounds like a dirty secret. Whisper it between corridors, or better: keep it for yourself. If you are lucky enough to enjoy your work on top of our achievements—bravo. But collectively, pleasure is our taboo. Of course, as scholars, we want to be credible, so we base our work on facts, objectivity, and rigour. Bragging about stars, publications and gruelling efforts? Sure you can (although not too much). But telling your colleagues about how much you enjoy your work? Reactions would range from 'meh' to 'Yeah, no wonder he enjoys his work: he is not working at all'. Yet, three years into academia, I realize that this hustle, publication-driven culture that dismisses pleasure only leads us into the dire situation we are stuck in. When academic institutions hinge on the 'coffee spoons' of narrow metrics, they suffocate pleasure; this breeds conformist research and strains scholars to the point of exhaustion. Our toxic culture does not reflect joyless scholarship; it grows from it. Pleasure is therefore not a 'nice-to-have' for academia, but a crucial spark to challenge our practices and institutions. By pleasure, I mean more than ephemeral enjoyment but the intrinsic satisfaction we find in values that make our work meaningful (Schueller and Seligman, 2010). This intrinsic pleasure carries us through all our mundane and more ambitious tasks: chatting with colleagues, attending conferences, supervising students, advancing scientific knowledge, discussing at lab meetings. Pleasure is the powerhouse of academia: we need to reconnect with it. Reflecting on my journey as a young scholar, I will first delve into the manufacture of this joyless scholarship—where we trade 'achievement coupons' and neat articles for pleasure. I will then trace how reclaiming pleasure can inspire...

“我用咖啡匙量走了我的生命。”——T.S. 艾略特,《阿尔弗瑞德·普夫洛克的情歌》。周五下午 5 点,外面下着雨。我在这里,为我申请另一个终身职位的申请书写注脚:“亲爱的同事们,这些发表在(被描述为(咳咳……))‘排名平平’的期刊上的文章。然而,进行这些田野调查、敏锐地研究、充满激情地写作并与所有同事分享结果,是多么令人激动!研究的乐趣难道不比世界上所有的‘星级’更有价值吗?”简短的回答是否定的。但长篇的回答则把我们带入这种毫无乐趣的学术研究的深层结构及其后果中。作为学者,“愉悦”听起来像是一个肮脏的秘密。在走廊间低声耳语,或者最好还是把它留给自己。如果你足够幸运,在获得成就之余还能享受工作——那太棒了。但在集体层面,愉悦是我们的禁忌。当然,作为学者,我们希望具有公信力,因此我们将工作建立在事实、客观性和严谨性的基础上。吹嘘星级、发表量和艰辛的努力?当然可以(虽然不要太过分)。但是告诉你的同事你有多享受你的工作?反应可能从“哦”到“难怪他享受工作:他根本没在干活”。然而,进入学术界三年后,我意识到这种排斥愉悦、追求速度、发表至上的文化只会把我们带入目前所处的困境。当学术机构仅仅依靠这些“咖啡匙”来衡量时……

- **理论:** 仪式理论, 依恋理论, 社会心理学视角

Abstract / 摘要:

Leader succession, the transition of a leadership position from a former leader to a new one, is a common yet potentially disruptive organizational process. Leader succession inherently carries risks and uncertainties, while rituals are often employed to instill order and provide stability. Building on this theoretical link between leader succession and rituals, we explored different types of leader succession rituals and investigated their impacts on succession outcomes. In a qualitative study (Study 1), we identified six types of leader succession rituals: artifact adoption, endorsement act, welcome ceremony, artifact return, closure act, and farewell ceremony. A duality emerged in our data: The first three ritual types focus on building attachment to the new leader, while the other three emphasize detachment from the former leader. Based on the findings from Study 1, we conducted a quantitative field study (Study 2) in a technology firm undergoing large-scale leader succession following an acquisition, as well as an experiment (Study Acknowledgments: This work was supported by the National Natural Science Foundation of China (72472134), the Research Grants Council of Hong Kong's General Research Fund (17621925), and the Guangdong Basic and Applied Basic Research Foundation (2024A1515012621). Abstract / 摘要:

Managerial dismissal decisions are a common yet challenging task for CEOs, particularly those joining as new CEOs in organizations characterized by strong values. The purpose of this research is to shift the perspective on such decisions from being a quick rational cost-benefit analysis to being value-based and relational, thus creating an ambiguous and often time-consuming decision situation. We take a sensemaking perspective to understand how new CEOs make sense of potential managerial dismissals and how such sensemaking affects their ultimate dismissal decisions. We investigate this question through a multi-case approach, drawing on evidence from six family firms, which represent an extreme context of value-based organizations. We present a model of how dyadic and prospective sensemaking mechanisms shape whether CEOs are able to overcome their hesitancy to engage in managerial dismissals and, thus, engage in reasoned or rejected dismissals. Our findings extend knowledge on managerial Acknowledgments: We are grateful to the editor Cynthia Devers and the two anonymous reviewers for the highly constructive review process. We would also like to thank Alina Heurich, Julia de Groote, Lutz Kaufmann, Claus Rerup, Tim Risse, David Sauer, Miriam Simon, and Lajos Szabo, as well as participants of the research seminar at WHU, for their feedback on earlier versions of our manuscript.

经理人解雇决策对 CEO 而言是一项常见但极具挑战性的任务，对于加入具有强烈价值观组织的继任 CEO 来说尤其如此。本研究旨在将此类决策的视角从快速的理性成本效益分析转向基于价值观和关系的分析，从而揭示这种模糊且往往耗时的决策情境。我们采用意义建构视角来理解新任 CEO 如何理解潜在的经理人解雇行为，以及这种意义建构如何影响他们最终的解雇决策。我们通过多案例研究方法调查了这一问题，借鉴了来自六家家族企业的证据，这些企业代表了基于价值观的组织的极端情境。我们提出了一个模型，阐述了二元和前瞻性意义建构机制如何塑造 CEO 是否能够克服解雇经理人的犹豫，并进而做出理性的解雇或拒绝解雇的决定。我们的发现扩展了关于经理人的知识（致谢：我们感谢编辑 Cynthia Devers 和两位匿名审稿人提供的高度建设性的评审过程。我们还要感谢 Alina Heurich、Julia de Groote、Lutz Kaufmann、Claus Rerup、Tim Risse、David Sauer、Miriam Simon 和 Lajos Szabo，以及 WHU 研究研讨会的参与者，感谢他们对我们手稿早期版本的反馈）。

- **理论:** 戏剧理论, 污名理论, 观众管理理论

Abstract / 摘要:

This paper theorizes how organizations enable the societal integration of stigmatized groups. Drawing on Goffman's relational perspective on stigma and his dramaturgical metaphors, we conceptualize organizations as "stages" on which stigmatized groups are presented to diverse audiences. We identify two fundamental forms of staging—concealing and normalizing—through which organizations can reduce sanctions from stigmatizing audiences and elicit acceptance among more supportive ones, thereby ultimately enabling societal integration. Our model specifies the structural antecedents that shape the likelihood of each form of staging, offering a nuanced understanding of when organizations adopt them as well as the tensions that may arise from doing so. Based on this, we extend research on organizations' management of stigma by advancing a dramaturgical theory of the societal integration of stigmatized groups. Whereas prior work has largely assumed that managing the stigmatized attributes of groups is central (and often sufficient) for their broader integration, we demonstrate that integration ultimately depends on the management of audiences and must therefore be understood as an inherently audience-focused process.

本文探讨了组织如何促进被污名化群体的社会融合。借鉴戈夫曼关于污名的关系视角及其戏剧隐喻，我们将组织概念化为向不同观众展示被污名化群体的“舞台”。我们识别了两种基本的舞台化形式——隐瞒和规范，组织通过这些形式可以减少来自污名化观众的制裁，并在更具支持性的观众中诱导认可，从而最终实现社会融合。我们的模型明确了塑造每种舞台化形式可能性的结构性前因，对组织何时采用这些形式以及由此可能产生的紧张关系提供了细致的理解。在此基础上，我们通过提出被污名化群体社会融合的戏剧理论，扩展了关于组织污名管理的研究。以往的研究主要假设管理群体的污名化属性对于其广泛融合至关重要（且通常是足够的），而我们证明，融合最终取决于对观众的管理，因此必须被理解为一个本质上以观众为中心的过程。

Abstract / 摘要:

Innovation research has long shown that firms depend on their R&D personnel to strengthen their innovation capabilities, sparking scholarly interest in how to best staff R&D departments for competitive advantage, with a focus on gender diversity. However, left unexamined are the mechanisms linking gender diversity in R&D departments and firm-level innovation. Further, despite growing interest in the conditions under which diversity may enhance innovation, researchers have not adequately addressed how department-level gender rank inequality—the disproportionate concentration of men and women at various hierarchical ranks—interacts with numerical diversity to affect innovation outcomes. We address both limitations by integrating insights from the information/decision-making perspective on diversity and research on inequality with research on innovation capabilities. Specifically, we develop and test a model explaining how R&D department gender diversity and gender rank equality jointly affect three firm-level innovation capabilities: breadth of external

knowledge search, use of external knowledge, and quality of the innovation implementation process. We also examine the indirect effects of gender diversity on firm-level innovation, conditional on gender rank equality, via these capabilities. Our analyses of 552 corporate R&D departments over 12 years show how gender diversity and gender rank equality in R&D departments jointly relate to higher levels of all three firm-level innovation capabilities and, indirectly, to greater firm-level innovation. Our findings suggest that improving a firm's innovation capabilities and performance requires both increased representation of women in R&D departments and proportional representation of men and women at all ranks of R&D departments.

创新研究长期以来表明，企业依靠其研发人员来增强创新能力，这引发了学术界对如何优化研发部门人员配置以获得竞争优势的兴趣，并重点关注性别多样性。然而，研发部门性别多样性与企业层面创新之间的联系机制尚未得到深入研究。此外，尽管研究人员对多样性增强创新的条件越来越感兴趣，但尚未充分解决部门层面的性别职级不平等（即男性和女性在各个层级的分布不均）如何与数量上的多样性相互作用并影响创新结果。我们通过整合多样性的信息/决策视角、不平等研究以及创新能力研究，弥补了这两方面的不足。具体而言，我们开发并测试了一个模型，解释研发部门的性别多样性和性别职级平等如何共同影响三种企业层面的创新能力：外部知识搜索的广度、外部知识的利用以及创新实施过程的质量。我们还考察了在性别职级平等的条件下，性别多样性通过这些能力对企业层面创新产生的间接影响。我们对 12 年间 552 个企业研发部门的分析显示，研发部门的性别多样性和性别职级平等如何共同关联到更高水平的所有三种企业层面创新能力……

Abstract / 摘要:

Scholars have long and effectively used qualitative-inductive methodologies to understand the heterogeneous responses of established organizations—so-called incumbents—to emerging discontinuous technologies. However, after nearly 30 years of nuanced, contextualized qualitative research in this area, there is a unique opportunity—and essentially a need—for its distillation, integration, and critical reflection. In particular, while qualitative studies on heterogeneous incumbent responses aspire to develop “theories of the middle range,” and, thus, to acknowledge boundary conditions and contextual nuances, in practice, they rarely discuss a given theory's range systematically. This disconnect limits the comparability, generalizability, and integration of findings. To address this instability, we inductively and critically review 127 qualitative studies on incumbents' responses to discontinuous technologies published between 1998 and 2024. The central outcome of our review is an integrative framework of core contextual dimensions of incumbent responses to emerging discontinuous technologies, organized along six attributes related to the overarching domains of technology, market, and organization and institutions. Our distilled framework provides a taxonomic map for systematically comparing different empirical contexts of incumbent adaptation to discontinuous technologies and critically considering the boundary conditions of qualitatively induced theorizing in this regard. Our framework also enables us to present an encompassing program for future qualitative research on incumbent heterogeneity, one of the core phenomena underlying the overall process of creative destruction.

学者们长期以来有效地利用质性归纳方法来理解老牌组织（即所谓的“现任企业”）对新兴不连续技术的异质性响应。然而，在这一领域经历了近 30 年细致且情境化的质性研究之后，出现了一个对其进行提取、整合和批判性反思的独特机会——且本质上也是一种需求。特别是，虽然关于现任企业异质性响应的质性研究旨在开发“中层理论”，并因此承认边界条件和情境细微差别，但在实践中，它们很少系统地讨论特定理论的应用范围。这种脱节限制了研究结果的可比性、概括性和整合性。为了解决这种不稳定性，我们对 1998 年至 2024 年间发表的 127 项关于现任企业对不连续技术响应的质性研究进行了归纳和批判性回顾。我们综述的核心成果是一个关于现任企业对新兴不连续技术响应的核心情境维度的整合框架，该框架由与技术、市场、组织及制度三大领域相关的六个属性组成。我们提取的框架为系统比较现任企业适应不连续技术的不同实证情境，以及批判性地考虑质性归纳理论化在这一方面的边界条件提供了分类图。我们的框架.....

Abstract / 摘要:

Early 2026: in the United States, political violence circulates as a floating signifier invoked to harden policing, to delegitimize protest, and to sustain an anxious public dramaturgy. Many film critics have framed *One Battle After Another*, released worldwide in September 2025, as a political film that meets the moment head-on. Yet its most generative move lies elsewhere. Freely adapting Thomas Pynchon's *Vineland* (1990), the film treats revolution less as a program than as memorywork: clandestinity replayed like a beloved record, in the shelter of safe houses and code words, while the present stubbornly mutates its surveillance, its rhetorics, and its enemies. Read through an organizational lens, the film becomes less a manifesto than an inquiry into how underground collectives persist in the rear-view mirror: how secrecy is maintained, how partial organizations cohere, and how violence is organized, sensed, and survived. If the film feels timely, it is also because it insists on being out of sync: Its politics is filtered through the afterlives of older struggles. The underground it depicts does not merely hide from the present; it shelters inside a past that keeps replaying

itself.

Abstract / 摘要:

Imagine entering a museum and encountering a woman seated silently at a table, her gaze steady, an empty chair positioned opposite her. What would be your first thought or reaction? Is she attempting to communicate something? Has she been compelled to sit there in stillness? This is Marina Abramović's *The Artist Is Present* (2010, reprised in 2022), a seminal work of performance art that, as is often the case in this genre, immerses viewers in ambiguity. Is the performance art about seeing, being seen, or something else entirely? How might we analyze such encounters, and what can they reveal to organizational scholars about the visible-invisible continuum of organizing
