Abstract / 摘要:

Reserch Summary: Breakthrough inventions are cen- tral to firms' competitive advantage, yet what consti- tutes a breakthrough remains unclear. We examine the relationship between technological quality (measured by forward citations) and economic value (measured by grant-day abnormal stock-returns) of patents. Using U.S. patents assigned to publicly listed firms, we find that among the most exceptional inventions—that is, breakthroughs—the correlation between these two measures disappears: technologically outstanding pat- ents are not necessarily the most economically valu- able. We attribute this divergence to a structural tension between value creation and value capture in patenting, driven by novelty, the availability of comple- mentary assets, and competitive dynamics. Firms that successfully manage both dimensions earn a dispropor- tionate market premium. This outcome is often associ- ated with firms that diversify their technological portfolios asynchronously across technology S-curves. Managerial Summary: Breakthrough innovations are widely viewed as the lifeblood of corporate success. Yet what truly defines a breakthrough—and how its value Received: 6 March 2026 Revised: 6 March 2026 Accepted: 13 March 2026 DOI: 10.1002/smj.70086 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–31. wileyonlinelibrary.com/journal/smj 1 should be assessed—remains unclear. Companies typi- cally rely on two indicators: technological quality (mea- sured by forward citations) and economic value (captured by stock market reactions at patent grant). Conventional wisdom assumes these move together. Our analysis of U.S. patents challenges this view. For the most exceptional inventions, technological quality and economic value diverge. We identify the drivers of this tension and show that firms able to manage it earn disproportionate market returns. 研究摘要：突破性发明对于企业的竞争优势至关重要，但究竟什么构成了“突破”仍不清晰。本研究探讨了专利的技术质量（通过前向引用衡量）与经济价值（通过授权日异常股票收益率衡量）之间的关系。通过对美国上市公司的专利数据进行分析，我们发现，在最卓越的发明（即突破性发明）中，这两项指标之间的相关性消失了：技术上杰出的专利并不一定是经济价值最高的。我们将这种背离归因于专利活动中价值创造与价值获取之间的结构性张力，这种张力由创新性、互补性资产的可得性以及竞争动态所驱动。能够成功管理这两个维度的企业可以获得超额的市场溢价。这种结果通常与那些在技术 S 曲线中实现跨阶段异步多元化其技术组合的企业相关。管理摘要：突破性创新被广泛视为企业成功的命脉。然而，究竟什么是突破，以及其价值如何实现，仍然是一个挑战。

Abstract / 摘要:

Research Summary: This exploratory paper introduces a new type of family business by studying the investment strategies of family-managed venture capital funds ("Family VCs") across a multi-country setting. It shows that Family VCs are more likely to invest in (syndicate with) geographically proximate startups (investors), indicating a preference for local investments. This tendency is stronger when the VC is named after the family and the family is closely involved in the decision-making process of the fund. I provide suggestive evidence that this pattern reflects both superior local knowledge (rational response) and home bias (non-rational response), with the latter becoming more pronounced when performance pressure is lower. **Managerial Summary:** Family-managed VC funds (Family VCs), managing roughly \$29 billion, represent an important segment of the venture capital industry. I show that family control shapes both the selection of startups and syndicate partners. Family VCs are indeed more likely to support ventures and partner with investors from their communities, particularly when family members are highly involved in investment decisions and the fund is named after the family. I provide suggestive evidence that this local preference stems from both rational factors, like superior local knowledge and networks, and a non-rational preference for local Received: 21 April 2023 Revised: 3 February 2026 Accepted: 7 March 2026 DOI: 10.1002/smj.70082 This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Their local focus becomes relatively less pronounced when families must demonstrate strong financial performance, such as when a follow-on fund has not yet been raised and during competitive market conditions. **K E Y W O R D S** entrepreneurship, family firms, local investments, performance pressures, venture capital 1 |

研究摘要: 这篇探索性论文通过研究多国背景下由家族管理的风险投资公司（简称“家族风投”）的投资策略，引入了一种新型的家族企业类型。研究显示，家族风投更有可能投资于地理位置邻近的初创企业（或与其联合投资），表明其对本地投资具有偏好。当风投公司以家族命名且家族深度参与基金决策过程时，这种倾向更为明显。我提供的启发性证据表明，这种模式既反映了卓越的本地知识（理性反应），也反映了本地偏好（非理性反应），且后者在业绩压力较小时表现得更为显著。管理摘要：管理着约 290 亿美元资金的家族管理型风投基金是风险投资行业的重要组成部分。本研究表明，家族控制塑造了初创企业和联合投资伙伴的选择。家族风投确实更有可能支持其所在社区的企业并与当地投资者合作，尤其是在家族成员高度参与投资决策且基金以家族命名的情况下。

Abstract / 摘要:

Research Summary: Many new employees leave their firms before realizing the returns to experience. One reason is that they cannot see how performance evolves with tenure. We study whether making performance trajectories visible improves retention and firm performance. In a randomized controlled trial at a multinational spa chain in China, workers received twice-weekly information for 28 weeks about the performance path of a high-performing senior coworker. The intervention reduces new-worker attrition by 11–12% and increases revenue by 15% in stores with more new workers. These effects are largely driven by reduced stress and improved mental health, as the information lowers their beliefs about how well senior coworkers performed early in their careers. By contrast, showing only the current performance of a similar-tenure peer has no detectable effect. Managerial Summary: In many firms, new employees leave before realizing the returns to experience because they lack information about how performance evolves with tenure. We examine whether making senior workers' performance trajectories visible improves retention and firm performance. In a randomized controlled trial involving over 7,000 workers at a multinational spa chain in China, employees received twice-weekly information for 28 weeks about the performance trajectory of a high-performing senior coworker. The intervention reduces new-worker attrition by 11–12% and increases revenue by 15% in stores with more new workers. These effects are driven by reduced stress and improved mental health, as the information lowers beliefs about senior coworkers' early-career performance. Overall, our findings show that making senior workers' performance trajectories visible can mitigate social comparison costs within firms. **KEYWORDS** employee retention, experience curve, field experiment, performance transparency, social comparison 1 |

研究摘要: 许多新员工在获得经验回报之前就离开了公司, 原因之一是他们无法看到绩效随任期演变的过程。我们研究了使绩效轨迹可视化是否能提高员工留存率和企业绩效。在中国一家跨国水疗连锁机构进行的一项随机对照试验中, 工人们在 28 周内每周两次收到关于一名高绩效资深同事绩效路径的信息。该干预使新员工流失率降低了 11-12%

- **Theories:** Information Asymmetry, Information-seeking Lobbying, Strategic Stockpiling Mechanism
- **理论:** 信息不对称, 信息寻求型游说, 战略性囤货机制

Abstract / 摘要:

Research Summary: This study investigates how firms engage in information-seeking lobbying to address trade policy uncertainty. I argue that lobbying enables firms to gain early insights into forthcoming tariff actions, allowing them to strategically stockpile products likely to be targeted. Using shipping records of US firms during the 2018 US–China trade war, I find that lobbying firms increased imports of soon-to-be-tariffed products before tariff lists were publicly released, compared to non-lobbying firms. This selective stockpiling pattern disappeared after tariff announcements. Further analysis shows that lobbying firms were less likely to request tariff exemptions for products they had preemptively stockpiled, suggesting that information-seeking lobbying during policy formulation provides an additional benefit by reducing the need for costly government engagement during the implementation phase. **Managerial Summary:** To manage heightened trade policy uncertainty, firms often adjust global supply chains or engage with the government—but how can they integrate these strategies? This study proposes that firms can engage in lobbying not just to influence policy outcomes, but to gain early insights into pending trade actions. Using data from the 2018 US–China trade war, I find that lobbying firms stockpiled more of the products that were later targeted by tariffs before those tariffs were publicly announced. These firms were also less likely to request tariff exemptions for products they had preemptively stockpiled, indicating potential cost savings by avoiding expensive government engagement. The findings underscore the strategic value of early-stage lobbying and highlight the importance of coordination between government affairs and operation departments. **KEYWORDS** global supply chains, information-seeking lobbying, strategic stockpiling, trade policy uncertainty, US–China trade war 1 |

研究摘要：本研究调查了企业如何通过信息寻求型游说来应对贸易政策的不确定性。我认为，游说使企业能够尽早洞察即将实施的关税行动，从而使其能够对可能成为目标的商品进行战略性囤货。利用2018年中美贸易战期间美国公司的航运记录，我发现与非游说企业相比，游说企业在关税清单公开公布之前，增加了对即将被征收关税产品的进口。这种选择性囤货模式在关税公告发布后消失。进一步分析表明，游说企业不太可能为其预先囤积的产品申请关税豁免，这表明在政策制定阶段进行信息寻求型游说提供了额外的好处，即减少了在实施阶段进行昂贵政府交涉的需求。**管理摘要：**为了管理加剧的贸易政策不确定性，企业通常会调整全球供应链或与政府接触。本研究提出，企业进行游说不仅是为了影响政策结果，也是为了获取有关待决贸易行动的早期见解。

- **理论:** 路径依赖, 制度理论, 获利能力制度, 组织惯例

Abstract / 摘要:

Research Summary: While changes in intellectual property rights (IPR) protection significantly shape firm innovation, the mechanisms driving firms' responses remain poorly understood. Leveraging the Second Amendment to China's Patent Law, which strengthens appropriability particularly for state-owned enterprises (SOEs), as a natural experiment, we show that stronger IPR has mixed effects on SOEs' innovation. While SOEs

increase the rate of innovation subsequent to the Amendment, they shift the direction of innovation toward more familiar areas in which they face a lesser need to adjust existing routines. This directional change suggests a quality decline in SOEs' innovation that may be attributed to path dependence. We further show that this change varies systematically depending on different firm- and industry-level characteristics that loosen or tighten the historical grip of path dependence. Managerial Summary: This study offers valuable insights for corporate leaders navigating intellectual property rights (IPR) reforms and shaping their firms' innovation strategies, particularly in emerging Received: 7 February 2015 Revised: 31 January 2026 Accepted: 6 February 2026 DOI: 10.1002/smj.70074 Strat Mgmt J. 2026;1–36. wileyonlinelibrary.com/journal/smj © 2026 John Wiley & Sons Ltd. 1 economies. While stronger IPR protection can increase innovation output, it may also lead firms to concentrate on familiar technologies rather than pursue more novel ideas. Thus, corporate leaders should look beyond patent volume as a performance metric and instead foster creative thinking and engage in external collaborations to access new, cutting-edge knowledge. Such efforts can help firms move beyond established routines and strengthen their long-term competitiveness. To promote innovation of greater novelty, policymakers must complement stronger IPR protection with broader institutional support, including enhancing economic freedom, encouraging market competition, and cultivating a culture that values breakthrough innovation. KEYWORDS appropriability, intellectual property rights (IPR), patent regime, path dependence, rate and direction of innovation 1 |

研究摘要：尽管知识产权（IPR）保护的变化显著塑造了企业创新，但驱动企业反应的机制仍未被充分理解。本研究利用中国《专利法》第二次修订（该修订加强了专利权的获利能力，特别是对国有企业而言）作为一个自然实验，表明加强知识产权保护对国企创新具有复杂影响。虽然国企在修订后提高了创新频率，但它们将创新方向转向了更熟悉的领域，在这些领域它们调整现有惯例的需求较小。这种方向性的改变暗示了国企创新质量的下降，这可能归因于路径依赖。我们进一步表明，这种变化根据企业和行业层面的不同特征而呈现系统性差异，这些特征会削弱或加强路径依赖的历史束缚。管理摘要：本研究为在新兴经济体中应对知识产权改革并塑造创新战略的企业领导者提供了宝贵的见解。虽然加强知识产权保护可以增加创新产出，但它也可能导致企业专注于熟悉的技术，而非追求更具新意的想法。

- **Theories:** Strategic Ambiguity, Expectation Management Framework, Strategic Flexibility, Signaling Theory
- **理论:** 战略模糊, 预期管理框架, 战略灵活性, 信号理论

Abstract / 摘要:

Research Summary: CEO promises are powerful but understudied communication tools. We develop a dual-mechanism framework theorizing that while CEO promises elevate stakeholder expectations, they simultaneously constrain strategic flexibility. We argue that CEO promise-making is shaped by two competing pressures: making more promises when the need to manage expectations upward is heightened and fewer promises when the need to preserve flexibility is increased. Further, we predict that under heightened uncertainty, CEOs preserve flexibility through strategic ambiguity (i.e., issuing promises with extended or vague time horizons and lower specificity). Leveraging Large Language Models (LLMs) to analyze over 69,000 earnings-call transcripts from S&P 1500 firms (2010–2022), we identify 74,017 CEO promises and find sup-

port for our predictions. We contribute an original, publicly available dataset of CEO promises. Managerial Summary: When CEOs publicly promise positive future results, they shape how investors and Received: 29 June 2024 Revised: 24 October 2025 Accepted: 21 January 2026 DOI: 10.1002/smj.70068 This is an open access article under the terms of the Creative Commons Attribution-NonCommercial-NoDerivs License, which permits use and distribution in any medium, provided the original work is properly cited, the use is non-commercial and no modifications or adaptations are made. © 2026 The Author(s). Strategic Management Journal published by John Wiley & Sons Ltd. Strat Mgmt J. 2026;1–82. wileyonlinelibrary.com/journal/smj 1 analysts view the company. These promises are a double-edged sword: they can boost investor and stakeholder confidence, but they also lock the company into a pre-determined path and make later shortfalls or pivots reputationally costly. Analyzing more than 69,000 earnings calls (2010–2022), we find that CEOs make more promises when needing to prove their legitimacy, such as during early tenure, when facing gender bias, or after missing earnings targets. However, in uncertain environments, CEOs often pull back from promise-making or employ “strategic ambiguity” by making promises with vaguer timelines and details to maintain flexibility. Our analysis suggests that failing to deliver on these public commitments significantly increases the likelihood of CEO dismissal. KEYWORDS CEO promises, corporate communications, earnings calls, Large Language Model (LLM), stakeholder expectations 1 |

研究摘要：CEO 承诺是极具影响力但尚未得到充分研究的沟通工具。我们开发了一个双重机制框架，从理论上阐述了 CEO 承诺在提高利益相关者预期的同时，也限制了战略灵活性。我们认为，CEO 的承诺行为受两种相互竞争的压力影响：当向上管理预期的需求增加时，承诺会增多；而当保持灵活性的需求增加时，承诺则会减少。此外，我们预测在不确定性加剧的情况下，CEO 会通过战略模糊性（即发布时间跨度较长或模糊且具体性较低的承诺）来保持灵活性。利用大语言模型（LLMs）对标准普尔 1500 指数公司在 2010 年至 2022 年间的超过 69,000 份业绩说明会文本进行分析，我们识别出 74,017 项 CEO 承诺，并证实了我们的预测。本文贡献了一个原始的、公开可用的 CEO 承诺数据集。管理摘要：当 CEO 公开承诺积极的未来结果时，他们塑造了投资者的预期，但也可能限制了公司未来的行动空间。本研究探讨了这种平衡行为。

- **理论:** 网络理论, 人力资本理论, 流动网络, 社会资本

Abstract / 摘要:

Research Summary: We adopt a network-based perspective to examine the effects of hiring strategies in terms of the diversity of hiring sources. Considering the transferability of general and firm-specific skills, we propose that firms can reduce integration costs while gaining diversity benefits when they hire from a focused set of firms that themselves hire broadly. We suggest that occupying this position in the mobility network enhances both innovation and productivity outcomes. Moreover, we posit that a strong cultural orientation, characterized by high intensity and consistency, further amplifies these benefits. Our analysis of mobility data from US public firms between 2005 and 2021 uncovers the pathways through which firms attain this position. Evidence from the panel matching method and fixed-effects regressions provides support for our hypotheses. Managerial Summary: We take a network perspective to understand how firms' hiring choices—particularly the range of companies they recruit from—shape their performance. We argue that firms can benefit when they hire from a small, consistent group of companies that themselves draw talent from

many different firms. This approach allows firms to gain a wide variety of skills and experiences Received: 2 July 2024 Revised: 24 January 2026 Accepted: 10 February 2026 DOI: 10.1002/smj.70076 This is an open access article under the terms of the Creative Commons Attribution-NonCommercial-NoDerivs License, which permits use and distribution in any medium, provided the original work is properly cited, the use is non-commercial and no modifications or adaptations are made. © 2026 The Author(s). Abstract / 摘要:

How does the process of identity formation unfold in emerging occupations? While extant research has focused primarily on occupational identity formation through differentiation from other occupational groups, we theorize identity formation in occupations that emerge in unsaturated spaces, where competitive dynamics are less salient. We address this question through a qualitative historical analysis of American astronauts at the inception of space exploration (1958–1974). Our work theorizes layered accretion as a distinct identity formation process whereby a new occupation' s identity begins with importing an identity from an existing occupation (proto identity), refinement of the identity through work–identity alignment (core identity), and subsequent layering of new, distinct identities that are accreted on to the core. We specify the mechanisms underpinning layered accretion and contribute to deeper understanding of how multiple identities are managed in the early stages of identity formation in new occupations.

新兴职业的身份形成过程是如何展开的？现有研究主要关注通过与其他职业群体的区分来形成职业身份，而我们对出现在非饱和空间（竞争动态较不显著）中的职业身份形成进行了理论化。我们通过对航天探索初期（1958–1974 年）美国宇航员的定性历史分析来探讨这一问题。我们的研究将“分层增生”理论化为一个独特

的身份形成过程，即一个新职业的身份始于从现有职业中引入身份（原始身份），通过工作与身份的对齐进行身份精炼（核心身份），以及随后在核心身份上堆叠新的、独特的身份。我们明确了支撑分层增生的机制，并有助于深入理解在新职业身份形成的早期阶段如何管理多重身份。

Abstract / 摘要:

We examine how entrepreneurs transition to angel investing through the lens of generalized reciprocity and embeddedness. Using a multimethod approach combining archival analysis with three experiments, we reveal how psychological and social mechanisms shape this transition. We find that entrepreneurs who have received angel funding are more likely to become angel investors themselves, particularly when they share educational, professional, or geographic ties with their initial investors. While angel investors, like all investors, seek financial returns, we theorize that choosing angel investing over alternative investment vehicles reflects prosocial motivations rooted in reciprocity. Our mediation analyses demonstrate that gratitude, rather than reputation concerns, drives this initial transition. Furthermore, entrepreneurs who received embedded funding preferentially direct their investments toward entrepreneurs with whom they share embedded ties. This reveals a two-part process: emotional mechanisms drive the decision to become an angel investor, while structural embeddedness guides investment targeting. These findings integrate psychological accounts of generalized reciprocity with sociological perspectives on embeddedness, linking individual-level and structural explanations of prosocial behavior in economic contexts. Our study highlights how angel investing perpetuates itself through self-reinforcing cycles that create both opportunities and constraints for ecosystem development.

我们从广义互惠和嵌入性的视角考察了创业者如何转型为天使投资人。通过结合档案分析与三项实验的多方法研究，我们揭示了心理和社会机制如何塑造这一转型。我们发现，获得过天使投资的创业者自身更有可能成为天使投资人，尤其是当 they 与最初的投资者拥有共同的教育、职业或地理渊源时。虽然天使投资人与其

他投资者一样追求财务回报，但从理论上认为，选择天使投资而非其他投资工具反映了植根于互惠的亲社会动机。我们的中介分析表明，驱动这一初步转型的是感激之情而非声誉考量。此外，获得过嵌入式融资的创业者会优先向与之具有嵌入式联系的创业者进行投资。这揭示了一个由两部分构成的过程：情感机制驱动了成为天使投资人的决定，而结构嵌入性则引导了投资目标的筛选。这些发现将广义互惠的心理学区解释与嵌入性的社会学视角结合起来，联系了经济背景下亲社会行为的个体层面和结构层面解释。我们的研究强调了天使投资如何通过自我强化循环实现自我延续，从而为生态系统的发展创造了机遇与限制。

Abstract / 摘要:

Drawing on a study of Syrian refugees engaged in informal work in Turkey, we examine how and why workplace relationships of marginalized groups break down and, in some cases, may be repaired. We develop a process model to explain the concept of relationship splintering—the gradual and recursive deterioration of relationships. We identify degrading, silencing, and distancing as key organizational mechanisms of splintering. These mechanisms are triggered by an attribution of blame and collectively constitute a system of organizational dehumanization. Over time, these mechanisms may cause complete relationship fracture, or, under certain conditions, be reversed to enable repair. Our work offers a more dynamic understanding of relationship processes extending theories of workplace marginalization. We also contribute to the literature on refugee workforce integration by foregrounding integration as a relational and processual phenomenon in organizational contexts characterized by structural inequality.

借鉴对土耳其从事非正规工作的叙利亚难民的研究，我们考察了边缘群体在工作场所的关系如何以及为何破裂，以及在某些情况下如何得到修复。我们开发了一个过程模型来解释“关系裂解”（relationship splintering）的概念，即关系的逐渐且循环的恶化。我们识别出降级、沉默和疏远是裂解的关键组织机制。这些机制由责任归因触发，共同构成了一个组织非人化系统。随着时间的推移，这些机制可能导致关系彻底断裂，或者在某些条件下发生逆转从而实现修复。我们的工作为关系过程提供了更具动态性的理解，扩展了工作场所边缘化理论。此外，我们通过将整合视为结构性不平等组织背景下的一种关系性和过程性现象，对难民劳动力整合文献做出了贡献。

Abstract / 摘要:

Integrating insights from research on newcomer socialization and generalization of learning, we theorize that individuals' prior mobility across organizations may offer learning opportunities that mitigate the barriers they face as newcomers transitioning into subsequent employment contexts. Building on evidence that individuals experience a temporary decline in performance when they switch employers, we argue that more mobile individuals will experience a smaller performance decline and shorter time to performance recovery following entry into a new employer as they are better equipped to adapt to the norms, values, and expectations of new organizational social contexts. We further theorize that the benefits associated with prior mobility are likely to be greatest when newcomers' social integration into a new organization is more challenging or more central to their new role. We find overall support for our theory using data on moves made by 8,693 hedge fund managers between 2,129 firms in the U.S. hedge fund industry from 2004 to 2019. We contribute to research on the influence of individuals' career experiences on their transitions into new organizations, and offer insights to ongoing conversations related to the implications of employees' investments in firm-specific human capital.

结合新员工社会化和学习泛化的研究见解, 我们提出理论认为, 个体跨组织的前期流动性可能提供学习机会, 从而减轻他们在向随后的就业环境过渡时作为新员工面临的障碍。基于个体在更换雇主时会经历暂时性绩效下降的证据, 我们认为, 流动性更强的个体在进入新雇主后会经历更小的绩效下降和更短的绩效恢复时间, 因为他们能更好地适应新组织社会环境的规范、价值观和预期。我们进一步推论, 当前期流动性带来的益处在新员工融入新组织的社交挑战更大或社交对其新角色更核心时最为显著。我们利用 2004 年至 2019 年美国对冲基金行业 8,693 名基金经理在 2,129 家公司间的流动数据, 验证了上述理论并获得了总体支持。我们对关于个体职业经历如何影响其向新组织过渡的研究做出了贡献, 并为有关员工对企业特定人力资本投资影响的持续讨论提供了见解。

Abstract / 摘要:

Current scholarship offers divergent views on whether broadening stakeholder governance creates joint gains or redistributes value away from equity holders. To address this tension, we develop a temporal model of stakeholder governance that specifies how these gains are distributed over time. We argue that broadening stakeholder governance initially reduces rewards for equity stakeholders because coordination costs rise and value is reallocated toward contracted stakeholders. However, over time, diminishing coordination costs and increasing returns from firm-specific investments increase rewards for equity stakeholders. Additionally, because contracted stakeholders make firm-specific investments, they may be willing to compromise their claims on firm resources when their firms face economic difficulties. Given these dynamics, we argue that broadening stakeholder governance is likely to increase firm survival. To test these arguments, we analyze longitudinal data for French firms with varying governance structures. Overall, our findings suggest that broadening stakeholder governance produces a dynamic balance in which stakeholders protect their interests

yet deepen their commitments over time. In this way, we elevate survival as a primary outcome of stakeholder governance and offer guidance on the design of resilient democratic governance.

目前的学术研究对于扩大利益相关者治理究竟是创造了共同收益，还是将价值从权益持有者手中重新分配出去，存在不同看法。为了解决这一矛盾，我们开发了一个利益相关者治理的时间模型，具体说明了这些收益如何随时间分配。我们认为，扩大利益相关者治理最初会减少权益持有者的回报，因为协调成本会上升，且价值会向契约利益相关者重新分配。然而，随着时间的推移，协调成本的降低和企业专用性投资回报的增加会提高权益持有者的回报。此外，由于契约利益相关者进行了企业专用性投资，当公司面临经济困难时，他们可能愿意在公司资源索取权上做出妥协。基于这些动态，我们认为扩大利益相关者治理可能会提高企业的生存率。为了验证这些论点，我们分析了具有不同治理结构的法国企业的纵向数据。总的来说，我们的研究结果表明，扩大利益相关者治理产生了一种动态平衡，利益相关者在此平衡中既保护了自己的利益，又随着时间的推移加深了他们的承诺。通过这种方式，我们将生存视为利益相关者治理的主要结果，并为韧性民主治理的设计提供了指导。

Abstract / 摘要:

When crises strike, new forms of emergent organizing often arise to address urgent societal needs that formal institutions struggle to meet. Among these, emergent response groups (ERGs)—self-organized communities that form to respond to unexpected and extreme events—offer a particularly salient example of decentralized and nonhierarchical organizing. This multicase study investigates eight ERGs that formed during the COVID-19 pandemic to design and distribute critical medical supplies. Drawing on sensemaking theory, we show how bricolage—making do with at-hand resources—supports coordination and community structuring by reducing equivocality caused by distributed actors. Our findings describe how these ERGs grew rapidly by using bricolage to reduce action, goal, and resource equivocality, enabling coordinated and scalable crisis response efforts. We contribute to research on emergent organizing in crisis contexts by revealing how bricolage fosters coherence and rapid scaling in the absence of formal hierarchies. Our study also challenges the dominant assumption that bricolage is inherently limiting to organizational growth, showing that—in the context of self-organizing collectives—it offers a novel solution to the problem of coordinating action among distributed agents.

当危机袭来时，往往会出现新型的突发性组织，以解决正式机构难以满足的紧急社会需求。其中，突发响应小组（ERGs）——为应对意外和极端事件而形成的自组织社群——提供了一个去中心化和非层级化组织的显著范例。本多案例研究调查了在 COVID-19 疫情期间为设计和分发关键医疗用品而形成的八个 ERGs。借鉴意义建构理论，我们展示了拼凑（利用手头资源凑合）如何通过减少分布式参与者造成的模糊性来支持协调和社群构建。我们的研究结果描述了这些 ERGs 如何通过利用拼凑来减少行动、目标和资源的模糊性，从而实现协调且可扩展的危机应对努力，进而获得快速增长。通过揭示在缺乏正式层级制度的情况下拼凑如何促进连贯性和快速扩张，我们对危机背景下突发性组织的研究做出了贡献。我们的研究还挑战了拼凑本质上限制组织增长的主流假设，表明在自组织集体的背景下，它为分布式主体之间的行动协调问题提供了一种新颖的解决方案。

- **理论:** 自我分类理论, 社会认同理论, 群际互动研究

Abstract / 摘要:

Mega-threats—public, shocking, and identity-relevant events involving violence or injustice—can disrupt organizational life. Yet, research has largely overlooked the fact that such events may create asymmetric identity-based threats for employees who share identities with victims versus those who share identities with perceived perpetrators, leading to divergent psychological responses and workplace cooperation within and between groups. We examine how the salience of a race-based mega-threat shapes cooperation between Black and White employees. Drawing on self-categorization theory and intergroup interaction research, we propose that mega-threat salience more strongly increases intra-racial cooperation among Black versus White employees, due to heightened in-group identification among the former. Conversely, we hypothesize that mega-threat salience more strongly reduces White employees' willingness to initiate cooperation with Black colleagues, driven by perceptions of a morally tainted social identity and concerns about social rejection. We argue that this negative effect is attenuated when White employees hold relatively lower (vs. higher) professional status than their Black interaction partners. We find support for these predictions in over 124,000 dyadic interactions between Black and White players in the National Basketball Association during periods of heightened Black Lives Matter salience. Two experimental studies replicate these findings and provide evidence for the envisioned mechanisms.

重大威胁——涉及暴力或不公正的、具有身份相关性的公共震撼性事件——会扰乱组织生活。然而,研究在很大程度上忽略了一个事实,即此类事件可能会为那些与受害者身份相同以及与感知到的施害者身份相同的员工,创造基于身份的非对称威胁,从而导致不同的心理反应以及群体内部和群体间的职场合作。我们研究了种族相关的重大威胁显著性如何塑造黑人和白人员工之间的合作。借鉴自我分类理论和群际互动研究,我们提出,由于黑人员工内部群体认同感的增强,重大威胁显著性对黑人员工内部合作的提升作用强于白人员工。相反,我们假设重大威胁显著性会更强烈地降低白人员工发起与黑人同事合作的意愿,这是由于感知到受道德玷污的社会身份以及对社会排斥的担忧所驱动的。我们认为,当白人员工的职业地位相对于其黑人互动伙伴较低(而非较高)时,这种负面影响会减弱。我们在美国职业篮球联赛(NBA)中黑人和白人球员之间超过124,000次成对互动中找到了支持这些预测的证据,这些互动发生在BlackLivesMatter显著性较高的时期。两项实验研究复制了这些发现,并为其背后的机制提供了证据。

Abstract / 摘要:

Organizations devoted to care, morality, and social purpose sometimes generate rather than relieve suffering. Paradoxically, such suffering often persists not because it is unseen, but because acknowledging it threatens the organization and its members’ identities as benevolent and caring. We develop a process theory explaining how organizations respond to organizationally caused suffering under identity threat, and why responses diverge toward either propagation or mitigation. Drawing on systems psychodynamics, compassion research, and identity threat theory, we argue that identity-threatening harm activates threat appraisal concerning valued self-definitions. This appraisal channels responses along two pathways. “Constriction” narrows responsibility, localizes blame, and produces bounded or performative forms of compassion that stabilize personal identity while leaving systemic injuries unaddressed. “Expansion” distributes ownership of harm and enables responsible compassion that more substantively engages suffering. We further theorize how internal sensegivers and organizational conditions shape movement both along and between these pathways. By foregrounding identity threat appraisal as a central mechanism, we explain why compassionate intentions do not reliably produce compassionate outcomes, and why suffering may be compounded in organizations most committed to alleviating it.

致力于关怀、道德和社会目标的组织有时会产生而非缓解苦难。矛盾的是，此类苦难往往持续存在，并非因为未被察觉，而是因为承认它会威胁到组织及其成员作为仁慈和关怀者的身份。我们开发了一个过程理论，解释组织在身份威胁下如何应对由组织引起的苦难，以及为什么应对方式会向“传播”或“缓解”两个方向分化。借鉴系统心理动力学、怜悯研究和身份威胁理论，我们认为威胁身份的伤害会激活针对重要自我定义的威胁评估。这种评估将应对方式引向两条路径：“收缩”路径缩小了责任范围，使指责局部化，并产生受限

或表演式的怜悯形式，这种形式在稳定个人身份的同时，使系统性损伤未得到解决；“扩张”路径则分配了伤害的所有权，并促成能更实质性处理苦难的负责任的怜悯。我们进一步探讨了内部意义提供者（sensegivers）和组织条件如何塑造在这两条路径上及路径间的移动。通过将身份威胁评估作为核心机制，我们解释了为什么怜悯的意图并不能可靠地产生怜悯的结果，以及为什么在最致力于减轻苦难的组织中，苦难反而可能会加重。

Abstract / 摘要:

As humans and AI increasingly work together in organizations, how can they dynamically allocate tasks and roles amid evolving task demands? Humans and AI represent the world in distinct yet complementary ways, creating both performance opportunities and coordination challenges for human-AI collaboration (HAIC). Tackling this, we advance a novel theory of "hybrid cognitive alignment" (HCA) as an emergent coordination mechanism that explains microprocesses leading to a functional compatibility between human and AI, enabling both parties to anticipate and adapt to each other. We apply the taskwork-teamwork framework to explain what needs to align, and create an AI-typology to elucidate how HCA can be achieved. We delineate how humans collaborate with "tool-like," "assistant-like," "rigid-teammate-like," and "teammate-like" AI through four distinct pathways to develop instrumental, contextualized, prescribed, and reciprocal alignments. Our theory complements the current top-down organization design approach with a bottom-up, emergent perspective. We highlight AI's material properties as a distinctive driver of emergent coordination in HAIC, in parallel to human-AI's iterative exchanges. Our work creates a new theoretical frontier for the coordination literature, helps to synthesize mixed findings regarding HAIC effectiveness, and generates implications for designing and deploying AI as a collaborator.

随着人类与人工智能在组织中的合作日益增加，在不断演变的任务需求中，它们如何动态地分配任务和角色？人类和人工智能以不同但互补的方式呈现世界，这为人机协作（HAIC）带来了绩效机遇，也带来了协调挑战。针对这一问题，我们提出了一种名为“混合认知对齐”（HCA）的新理论，将其视为一种涌现的协调机制，解释了导致人机之间功能兼容的微观过程，使双方能够相互预测和适应。我们应用“任务工作-团队工作”框架来解释需要对齐的内容，并创建了一个人工智能类型学来阐明如何实现 HCA。我们通过四种不同的路径，描绘了人类如何与“工具型”、“助手型”、“刚性队友型”和“队友型”人工智能进行协作，以发展出工具性、情境化、规定性和互惠性的对齐。我们的理论通过自下而上的涌现视角，补充了当前自上而下的组织设计方法。我们强调人工智能的物质属性是人机协作中涌现协调的独特驱动力，与人机之间的迭代交换并进。本研究为协调文献开辟了新的理论前沿，有助于综合关于人机协作有效性的各种矛盾研究结果，并为将人工智能作为协作伙伴进行设计和部署提供了启示。

Abstract / 摘要:

This paper proposes that firms' positioning in digital markets involves offering combinations of core and peripheral product functions that add value to customers. When new entrants face demand uncertainty and seek positions that match customer needs and preferences, they draw on external market feedback, specifically customer evaluations of other products, as an input to their positioning decisions. Using data on Photo & Video mobile applications in the Apple App Store, we theorize and show that two dimensions of external market feedback—overall customer dissatisfaction and customer evaluation heterogeneity—convey distinct information about the demand environment. These cues shape whether entrants position as generalists combining multiple functions or as specialists that concentrate on a core function, as well as the extent to which they differentiate from existing competitive products. Our results show that higher customer dissatisfaction is associated with greater focus on the core function and stronger differentiation in the peripheral functions. On the other hand, higher customer evaluation heterogeneity is associated with reduced focus on the core function and greater imitation in peripheral functions. This study contributes to the emerging literature on firm strategies in digital markets by identifying external market feedback as a key driver of product variety and positioning. It also advances a demand-side view of market entry by demonstrating how entrants use broad market signals to manage demand uncertainty when choosing their initial positions. 本文提出，企业在数字市场中的定位涉及提供能为客户增加价值的核心与外围产品功能组合。当新进入者面临需求不确定性并寻求匹配客户需求和偏好的定位时，他们利用外部市场反馈（特别是客户对其他产品的评价）作为其定位决策的输入。利用苹果应用商店中照片与视频类移动应用的数据，我们通过理论推导并证明了外部市场反馈的两个维度——总体客户不满和客户评价异质性——传递了关于需求环境的不同信息。这些线索决定了进入者是定位为结合多种功能的通用型企业，还是专注于核心功能的专业型企业，以及他们与现有竞争产品的差异化程度。我们的结果表明，较高的客户不满与对核心功能的更多关注以及外围功能的更强差异化相关。另一方面，较高的客户评价异质性与对核心功能的关注减少以及在外围功能上的更多模仿相关。本研究通过确定外部市场反馈是产品多样性和定位的关键驱动因素，为数字市场中企业战略的新兴文献做出了贡献。它还通过论证进入者如何利用外部反馈，推进了市场进入的需求侧视角。

Abstract / 摘要:

How do firms balance market competitiveness with internal cohesion when setting employee pay? We examine this question using confidential compensation data on 19 million U.S. employees across 479 firms varying in knowledge intensity. We construct precise pay reference groups: internal benchmarks based on skill-equivalent peers across functions and market benchmarks based on same occupation, skill level, and region at other firms. We find that in low knowledge-intensity firms, pay is equally sensitive to both internal and market benchmarks, whereas in high knowledge-intensity firms, pay becomes decoupled from market forces and aligns with internal benchmarks. Internal pay alignment also increases following chief executive officer transitions that prioritize innovation. These patterns are driven by high-skilled employees in roles requiring complex problem-solving and collaboration. Moreover, firms with greater internal pay alignment generate more patents, including breakthrough innovations. Altogether, our findings reveal that although some firms maintain close market alignment, knowledge-intensive firms appear to decouple pay from market forces. This is particularly the case for their skilled workers, consistent with firms prioritizing internal social dynamics in contexts where complex problem-solving and collaboration are important for value creation. Supplemental Material: The online appendix is available at <https://doi.org/10.1287/orsc.2024.19959>.

企业在设定员工薪酬时，如何平衡市场竞争力和内部凝聚力？我们利用涉及 479 家知识密集度不同的企业的 1,900 万美国员工的机密薪酬数据研究了这一问题。我们构建了精确的薪酬参考群体：基于跨职能技能相当的同伴的内部基准，以及基于其他企业中相同职业、技能水平和地区的市场基准。我们发现，在低知识密集型企业中，薪酬对内部和市场基准的敏感度相同；而在高知识密集型企业中，薪酬与市场力量脱钩，转而与内部基准保持一致。在优先考虑创新的首席执行官继任后，内部薪酬对齐程度也会增加。这些模式是由在需要复杂问题解决和协作的角色中的高技能员工驱动的。此外，内部薪酬对齐程度较高的企业会产生更多专利，包括突破性创新。总而言之，我们的研究结果表明，尽管一些企业保持与市场紧密对接，但知识密集型企业似乎将薪酬与市场力量脱钩。对于其技能型员工而言尤其如此，这与企业在复杂问题解决和协作对价值创造至关重要的背景下，优先考虑内部社会动态的情况相一致。

Abstract / 摘要:

Theories of gender inequality in the workplace rely heavily on stereotypes that describe women as more communal (e.g., warm and kind) and less agentic (e.g., assertive and forceful) than men. In this paper, we highlight the existence of an uncommunal feminine stereotype wherein women are also believed to be more conniving and devious than men, pursuing their personal goals at the expense of others. To explain how this uncommunal stereotype can coexist with its communal counterpart, we posit that women are believed to

behave more communally in public and more uncommunally in private. This public-private distinction can reconcile conflicting stereotypes of women's communality and better account for aspects of inequality. In particular, the uncommunal stereotype provides an alternative attribution for women's success when it occurs, explains the greater vigilance to and sanctioning of women's unethical behavior, and strengthens backlash theory by better explaining why successful women are distrusted. In these ways and others, accounting for the uncommunal feminine stereotype can enhance gender theory. 关于职场性别不平等的理论主要依赖于将女性描述为比男性更具“共同性”（Communal，如温暖、善良）而较少“代理性”（Agentic，如坚定、有力）的刻板印象。在本文中，我们强调了一种“非共同性女性刻板印象”的存在，即女性也被认为比男性更具心机和狡诈，会为了追求个人目标而不惜损害他人利益。为了解释这种非共同性刻板印象如何与共同性刻板印象共存，我们假设人们认为女性在公共场合表现得更具共同性，而在私下场合则表现得更具非共同性。这种公私之分可以调和女性共同性刻板印象中的矛盾，并更好地解释不平等的各个方面。具体而言，非共同性刻板印象为女性取得成功提供了另一种归因方式，解释了为何女性的不道德行为会受到更多的警惕和制裁，并通过更好地解释成功的女性为何不被信任，强化了“反弹理论”（Backlash Theory）。通过这些方式，将非共同性女性刻板印象纳入考量可以增强性别理论。本作品采用知识共享署名 4.0 国际许可协议进行授权。

- **理论:** 网络理论, 结构洞理论, 平衡理论, 中介理论

Abstract / 摘要:

Prior research on the relationship between network brokerage and firms' innovation performance has predominantly portrayed the brokering firm as a tertius gaudens, or "the benefiting third," which gains informational and coordination advantages from its network position by bridging disconnected and relationally neutral partner firms. We extend this view by theorizing a disadvantaged brokering firm, or broker, which spans two uncooperative partners, or alters, engaged in active conflict with one another. Described as a tertius dolens, or "the suffering third," this broker occupies a position in which interalter conflict transforms brokerage from a structural advantage into a liability by constraining knowledge exchange, increasing coordination costs, and damaging the broker's network reputation, thereby reducing innovation performance. We further argue that these adverse effects can be partly mitigated by structural conditions that restore balance to the broker's position, including access to conflict-free structural holes, higher network status, and multiplex relational commitments with the conflicting alters. Using longitudinal data on 2,735 publicly listed biopharmaceutical firms and their vertical alliances from 2000 to 2009, combined with U.S. patent infringement lawsuits to capture interorganizational conflict, we find strong empirical support for these arguments. Taken together, our findings refine brokerage theory by identifying conflict among a broker's alters as a hidden source of structural disadvantage and clarifying why brokers do not always realize the innovation benefits predicted by the tertius gaudens logic. Supplemental Material: The online supplementary material is available at <https://doi.org/10.1287/orsc.2024.19168>.

以往关于网络中介 (Brokerage) 与企业创新绩效关系的研究, 主要将中介企业刻画为“得利的第三者” (Tertius Gaudens), 即通过连接互不往来且关系中立的合作伙伴, 从其网络位置中获得信息和协调优势。我们扩展了这一观点, 提出了“受苦的第三者” (Tertius Dolens) 理论, 即中介者跨接在两个处于积极冲突状态且不合作

的合作伙伴 (Alters) 之间。在这种情况下, 合作伙伴间的冲突使中介行为从结构优势转变为一种负担, 通过限制知识交换、增加协调成本以及损害中介者的网络声誉, 从而降低创新绩效。我们进一步论证, 这些不利影响可以通过恢复中介者地位平衡的结构性条件得到部分缓解, 包括接触无冲突的结构洞、更高的网络地位以及与冲突双方建立多重关系承诺。通过分析 2000 年至 2009 年间 2735 家上市生物制药企业及其纵向联盟的轨迹数据, 并结合美国专利侵权诉讼来捕捉组织间冲突, 我们的论点得到了强有力的实证支持。总之, 我们的研究通过确定合作伙伴间的冲突是中介过程中的一个重要边界条件, 完善了中介理论。

Abstract / 摘要:

A consistent finding in research on cultural markets is that innovation often involves recombining stylistic features across categorical boundaries. Cultural products routinely borrow features from other categories while maintaining their primary classification. However, we observe considerable variance in outcomes: Some borrowing achieves remarkable success, whereas others fail spectacularly. Existing theories of optimal differentiation and category spanning tell us that balancing familiarity and novelty matters and that improperly spanning categories can be costly, yet they provide limited guidance on how to differentiate effectively by borrowing features from alternative categories. Analyzing nearly 6,000 films and the narrative features they employ, I find that borrowing succeeds when products incorporate recognizable, familiar features from other categories. I further show that borrowing from sparsely populated categories provides greater benefits than borrowing from crowded ones, because audiences grow weary of features associated with oversaturated categories. These findings reconcile two influential but previously unconnected perspectives: the theory of optimal differentiation and the theory of category-spanning penalties. The results reveal conditions under which borrowing from other categories can enhance rather than diminish appeal and demonstrate that differentiation strategies succeed when borrowing is visible and interpretable to audiences. Supplemental Material: The online appendix is available at <https://doi.org/10.1287/orsc.2023.18354>.

文化市场研究的一个一致发现是, 创新往往涉及跨越类别边界的风格特征重组。文化产品通常在保持其主要分类的同时, 借鉴其他类别的特征。然而, 我们观察到结果存在显著差异: 有些借鉴取得了巨大成功, 而有些则惨遭失败。现有的“最优区分”和“类别跨越”理论告诉我们, 平衡熟悉感与新颖性至关重要, 且不当的类别跨越可能付出高昂代价, 但在如何通过借鉴替代类别的特征来进行有效区分方面, 这些理论提供的指导有限。通过分析近 6000 部电影及其采用的叙事特征, 我发现当产品结合了来自其他类别的可识别、熟悉的特征时, 借鉴行为会取得成功。我进一步表明, 从成员较少的类别中借鉴比从拥挤的类别中借鉴能带来更大的益处, 因为受众对与过度饱和和类别相关的特征会感到厌倦。这些发现调和了两个极具影响力但此前互不关联的视角: 最优区分理论和类别跨越惩罚理论。研究结果揭示了借鉴其他类别特征能增强而非削弱吸引力的条件, 并表明当借鉴行为对受众而言可见且可解释时, 分化策略就会取得成功。

Abstract / 摘要:

We investigate how the decline of local newspapers affects firms' corporate social responsibility (CSR) engagement. Historically, local newspapers have shaped firms' informational environments by providing two interconnected functions that influence local stakeholders' perceptions: external monitoring and enhanced visibility of corporate behaviors. Their decline weakens both functions simultaneously, creating uncertainty about how firms adjust behaviors sensitive to scrutiny and public recognition. We develop a contingency framework explaining how firms respond to this dual erosion depending on the broader informational environment. We theorize that nonlocal informational intermediaries—national newspapers, financial analysts, and credit rating agencies—shape whether firms continue to experience credible accountability pressures or opportunities for public visibility, and that firms respond differently to local newspaper decline based on the availability of these intermediaries. When such intermediaries remain active, firms face sustained evaluative scrutiny and retain channels through which CSR activities can be communicated, increasing the strategic value of CSR. When they are absent, diminished oversight and limited visibility reduce both the pressures and incentives to maintain CSR, making retrenchment more likely. Interviews with journalists and corporate executives contextualize and refine the proposed mechanisms by illustrating how firms interpret the erosion of local oversight and visibility and navigate evolving informational ecosystems. Using a staggered difference-in-differences design exploiting local newspaper declines across U.S. counties from 1996 to 2014, we find evidence consistent with these heterogeneous responses. Our theory advances understanding of how firms strategically adapt their CSR engagement to evolving informational environments. 我们研究了地方报纸的衰落如何影响企业的社会责任（CSR）参与。历史上，地方报纸通过提供两种相互关联的功能——外部监督和提高企业行为的可见性——来塑造企业的信息环境，从而影响当地利益相关者的认知。地方报纸的衰落同时削弱了这两种功能，导致企业在调整受审查和公众认可影响的行为时产生不确定性。我们开发了一个权变框架，解释企业如何根据更广泛的信息环境对这种双重削弱做出反应。我们提出，非地方性信息中介（如全国性报纸、金融分析师和信用评级机构）决定了企业是否继续面临可靠的问责压力或公众可见性的机会，且企业会根据这些中介机构的存在与否，对地方报纸的衰落做出不同的反应。当这些中介机构保持活跃时，企业面临持续的评价性审查，并保留了沟通 CSR 活动的渠道，从而增加了 CSR 的战略价值。当这些中介机构缺失时，监督的减弱和可见性的受限降低了维持 CSR 的压力和动力，使企业更有可能采取收缩策略。对记者和企业高管的访谈进一步背景化并完善了所提出的机制，说明了企业如何解读这种环境侵蚀。

Abstract / 摘要:

Accent is a powerful, yet still socially acceptable, basis of discrimination that shapes interpersonal evaluations and access to opportunities, potentially disadvantaging entrepreneurs seeking funding. Bridging role congruity theory with sociolinguistic literature, we hypothesize that entrepreneurs whose regional accents align with the stereotypical entrepreneur are more likely to secure funding. We test this hypothesis in entrepreneurial pitching contexts using an observational study and two pre-registered experiments that manipulate entrepreneurs' accents in pitch videos through a professional voice actor and AI. Across the UK, Italy, and the United States, the results support our hypothesis, providing robust evidence of accent-based discrimination in entrepreneurial fundraising.

口音是一种强大但仍被社会普遍接受的歧视基础，它影响人际评估和机会获取，可能使寻求资金的创业者处于不利地位。结合角色一致性理论与社会语言学文献，我们假设如果创业者的地域口音与刻板印象中的创业者形象相符，他们更有可能获得资金。我们在创业路演情境下测试了这一假设，包括一项观察性研究和两项预注册实验，实验通过专业配音演员和人工智能操控路演视频中创业者的口音。在英国、意大利和美国的研究结果均支持了我们的假设，为创业融资中基于口音的歧视提供了有力的证据。

Abstract / 摘要:

We examine the capabilities of large language models (LLMs) in evaluating early-stage ventures. In pre-registered experiments, we prompt selected LLMs to generate investment evaluations and survival predictions for an archival dataset of 171 new venture pitches under systematically varied information cues. We compare these LLM-generated evaluations with realized fundraising outcomes, post-campaign survival rates, and evaluations provided by a benchmark sample of human investors. LLMs show strong capabilities in mirroring real fundraising outcomes. In contrast, their apparent accuracy in predicting venture survival largely reflects prior exposure to some ventures' digital footprints rather than genuine reasoning under uncertainty. Providing LLMs with scientific, contextual, and social information cues can improve their evaluations, but can also activate human-like heuristics, including anchoring and herding. Our study highlights LLMs' potential in venture evaluations while cautioning that unobserved influences can mislead interpretations of their capabilities.

本研究探讨了大语言模型（LLMs）在评估早期创业企业方面的能力。在预注册实验中，我们提示选定的大语言模型针对一个包含 171 个新创企业推介方案的档案数据集，在系统变化的各种信息线索下生成投资评估和生存预测。我们将模型生成的评估结果与实际融资结果、众筹后的生存率以及由人类投资者组成的基准样本提供的评估进行了比较。结果显示，大语言模型在反映真实融资结果方面表现出较强的能力。相比之下，它们在预测企业生存方面的表现准确性在很大程度上反映了其先前接触过某些数字足迹的结果，而非在不确定性下的真实推理。向大语言模型提供科学、情境和社会信息线索可以提高其评估质量，但也可能激活类似于人类的启发式偏见，包括锚定效应和羊群效应。本研究强调了大语言模型在创业评估中的潜力，同时也提醒人们，未观察到的影响因素可能会误导对其能力的解读。

- **理论:** 框架理论, 印象管理, 信号理论, 修辞理论

Abstract / 摘要:

Research Summary: We examine how promotional language (“hype”) in reward-based crowdfunding is associated with campaign success, and whether those associations vary across sector contexts and with campaign execution burden. Using dictionary-based text measures from 635 U.S. Kickstarter campaigns across five sectors, we distinguish three novelty-framing moves: capability/rigor language, excellence/status language, and attitude/affect language. We find no uniform association between aggregate hype and success. Instead, the observed associations vary systematically across rhetorical moves, sectors, and goal levels. Capability/rigor language is positively associated with success in Technology, attitude/affect language is positively associated with success in Entertainment, and excellence/status language is negatively associated with success in Design. Beyond these sector differences, the paper’s clearest cross-cutting pattern is that capability/rigor language becomes more positively associated with success as funding goals increase. Managerial Summary: The value of “hype” on Kickstarter depends on what is said, what is being offered, and how ambitious the ask is. In our data, Technology campaigns are more positively associated with success when descriptions emphasize testing, technical specificity, and execution Received: 31 January 2025 Revised: 11 March 2026 Accepted: 14 March 2026 DOI: [10.1002/sej.70022](https://doi.org/10.1002/sej.70022) This is an open access article under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. © 2026 The Author(s). Strategic Entrepreneurship Journal. 2026;1–26. wileyonlinelibrary.com/journal/sej 1 readiness, whereas Entertainment campaigns are more positively associated with attitude/affect language. In contrast, excellence/status claims are associated with lower success in Design. Across contexts, the clearest pattern is that feasibility-oriented language becomes more positively associated with success as funding goals increase, suggesting that larger asks benefit more from cues of deliverability than from undifferentiated promotional intensity. **KEYWORDS** crowdfunding, hype, Kickstarter, novelty, persuasion 1 |

本研究探讨了奖励型众筹中的宣传语言（“炒作”）如何与项目的成功相关联，以及这些关联是否因行业背景和项目执行负担而异。我们利用基于词典的文本测量方法，分析了 Kickstarter 上涵盖五个行业的 635 个美国项目，区分了三种新颖性框架策略：能力/严谨型语言、卓越/地位型语言以及态度/情感型语言。研究发现，总体“炒作”程度与项目成功之间并无统一的关联。相反，观察到的关联随修辞策略、行业和目标金额的不同

而发生系统性变化。能力/严谨型语言在技术类项目中与成功正相关；态度/情感型语言在娱乐类项目中与成功正相关；而卓越/地位型语言在设计类项目中与成功负相关。除了这些行业差异外，本文最显著的跨行业模式是：随着筹款目标的提高，能力/严谨型语言与项目成功的正相关性变得更强。管理启示在于：Kickstarter 上“炒作”的价值取决于说了什么、提供了什么以及筹款目标的宏大程度。在我们的数据中，当技术类项目的描述强调测试、技术特异性和执行力时，其成功的可能性更高。

Abstract / 摘要:

Abstract This paper investigates the impact of rivals' Mergers and Acquisitions (M&A) activities on the innovation orientation of firms that are not directly involved in these transactions, hereafter referred to as focal firms. Drawing on the Awareness-Motivation-Capability (AMC) framework, we find that rivals' M&A activities positively affect a focal firm's exploratory innovation, while negatively influencing its exploitative innovation, a dynamic that is predominantly driven by rival firms acting as acquirers. We further identify key boundary conditions that moderate this relationship and find that the influence of rival acquirers is amplified when their M&A deals are exploitative in nature, suggesting that focal firms respond strategically by differentiating through exploration. In addition, high levels of market competition intensify the positive effect of rival acquirers on focal firms' exploratory innovation. Finally, focal firms with greater financial slack are more likely to shift their innovation orientation towards exploration in response to rivals' M&A. Together, our findings reveal how external strategic moves by rivals can trigger forward-looking innovation responses and highlight the importance of firm capabilities and market context in shaping these dynamics.

本文研究了竞争对手的并购（MA）活动对未直接参与这些交易的企业（以下简称“焦点企业”）创新导向的影响。基于“察觉-动机-能力”（AMC）框架，我们发现竞争对手的并购活动对焦点企业的探索式创新有正向影响，而对利用式创新有负向影响，这种动态主要由作为收购方的竞争对手驱动。我们进一步识别了调节这一关系的关键边界条件，并发现当竞争对手进行的并购交易具有利用性质时，其影响力会放大，这表明焦点企业通过探索式创新进行差异化战略响应。此外，高水平的市场竞争强化了竞争对手收购方对焦点企业探索式创新的正向影响。最后，拥有较多财务冗余的焦点企业更有可能在应对对手并购时将其创新导向转向探索。总之，我们的研究揭示了竞争对手的外部战略行动如何触发前瞻性的创新反应，并强调了企业能力和市场环境在塑造这些动态中的重要性。

Abstract / 摘要:

Abstract Although the behavioural theory of the firm (BTOF) literature argues that negative performance discrepancy triggers problemistic search, whether and how negative social versus historical performance discrepancy differ in their impact on such search—and how managers prioritize between these two aspirations—remains unclear. Drawing on the BTOF and temporal focus literature, we posit that negative social performance discrepancy leads to an increase in search scope, while negative historical performance discrepancy leads to an increase in search depth. We further find that CEO temporal focus moderates these relationships: the link between negative social performance discrepancy and search scope is stronger under CEOs high in present focus, whereas the link between negative historical performance discrepancy and search depth is stronger under CEOs high in past focus. Our findings contribute to the BTOF literature by clarifying the distinct roles of historical and social aspirations in problemistic search and by incorporating temporal focus in performance feedback studies.

尽管企业行为理论（BTOF）文献认为负向绩效差距会引发问题搜寻，但负向社会绩效差距与负向历史绩效差距在影响此类搜寻方面有何不同，以及管理者如何在两种抱负水平之间确定优先级，目前仍不清楚。借鉴企业行为理论和时间焦点文献，我们提出负向社会绩效差距会导致搜寻广度的增加，而负向历史绩效差距会导致搜寻深度的增加。我们进一步发现，CEO 的时间焦点调节了这些关系：在具有高现在焦点的 CEO 领导下，负向社会绩效差距与搜寻广度之间的联系更强；而在具有高过去焦点的 CEO 领导下，负向历史绩效差距与搜寻深度之间的联系更强。我们的研究通过阐明历史抱负和社会抱负在问题搜寻中的不同作用，并将时间焦点纳入绩效反馈研究，为企业行为理论文献做出了贡献。

Abstract / 摘要:

Abstract Research on media coverage of controversial corporate practices typically suggests firms respond instrumentally to mitigate stakeholder reactions. However, we argue that CEOs' moral concerns can sometimes override strategic considerations, because media criticism may expose them to scrutiny from personally valued audiences—for instance, their own children. As moral role models, parent CEOs may become more willing to accept lower compensation to avoid negative scrutiny. To test our theory, we study media reports on CEO overcompensation. We hypothesize that media criticism of pay arrangements increases parent CEOs' willingness to accept lower pay relative to peers when their parental identity is salient. We test this hypothesis in two studies. The first, an observational study using a hand-collected biographic dataset, provides suggestive evidence consistent with our hypothesis: when parenthood is a salient identity, media criticism is marginally associated with lower subsequent CEO pay relative to peers. The second, an experimental survey of executives and directors, offers suggestive evidence that activating respondents' parental identity marginally increases their willingness to forgo compensation and to support a less generous remuneration package.

关于争议性公司行为的媒体报道研究通常表明，企业会采取工具性反应以减轻利益相关者的反应。然而，我们认为 CEO 的道德考量有时会超越战略考量，因为媒体批评可能会使其暴露在个人重视的受众（例如他们自己的孩子）的审视之下。作为道德楷模，身为人父母的 CEO 可能更愿意接受较低的薪酬，以避免负面审查。为了验证这一理论，我们研究了关于 CEO 薪酬过高的媒体报道。我们假设，当为人父母的身份显著时，媒体对薪酬安排的批评会增加 CEO 接受比同行更低薪酬的意愿。我们在两项研究中测试了这一假设。第一项是利用手工搜集的传记数据集进行的观察性研究，提供了与假设一致的暗示性证据：当父母身份是显著身份时，媒体批评与随后 CEO 薪酬（相对于同行）的降低具有边际相关性。第二项是对高管和董事进行的实验调查，提供了暗示性证据，表明激活受访者的父母身份会边际增加他们放弃薪酬以及支持不那么优厚的薪酬方案的意愿。

Abstract / 摘要:

Abstract Overconfident CEOs have been shown to lead their firms to achieve different outcomes, but the literature has only a limited understanding why this is the case. In this paper, we focus on whether overconfident CEOs run their firms differently, focusing on a key internal interaction: CEOs' choices regarding whether to delegate to other executives. Delegation is increasingly required given the growing size and complexity of public firms, yet surprisingly, most prior empirical work on delegation has been focused on lower-level managers or non-strategic tasks. We argue why overconfident CEOs would have a lower baseline tendency to delegate, and then posit how overconfidence interacts with contextual considerations, such that overconfident CEOs are less responsive to these cues than other CEOs. We test our hypotheses using a sample of 3690 merger and acquisition announcements and find evidence that overconfident CEOs are less likely to delegate compared to other CEOs and less responsive to multiple indicators at the task and firm level. Our paper's central contribution is that CEO overconfidence, a widely studied psychological trait in external risk-taking and acquisitions, also shapes the internal management of firms via a different pattern and approach to delegating responsibility to other top executives.

研究表明，过度自信的 CEO 会带领公司取得不同的结果，但现有文献对其原因的理解较为有限。在本文中，我们关注过度自信的 CEO 在经营公司方式上是否存在差异，并聚焦于一个关键的内部互动：CEO 在是否向

其他高管委派任务方面的选择。随着上市企业规模和复杂性的日益增加，委派任务变得越来越必要。然而，令人惊讶的是，以往关于委派的大多数实证工作都集中在基层管理者或非战略性任务上。我们论证了为什么过度自信的 CEO 会有较低的初始委派倾向，然后假设过度自信如何与情境因素相互作用，使得过度自信的 CEO 对这些线索的反应不如其他 CEO 敏感。我们通过 3690 个并购公告样本测试了假设，并发现证据表明，与其他 CEO 相比，过度自信的 CEO 委派任务的可能性更小，且对任务和公司层面的多个指标反应更弱。本文的核心贡献在于，CEO 过度自信这一在外部风险承担和并购中被广泛研究的心理特质，也通过委派责任给其他高层管理者的不同模式和方法，塑造了公司的内部管理。

Abstract / 摘要:

Interorganizational ecosystems require governance arrangements that can align diverse and often competing organizations around a shared value proposition. Although blockchain, as a form of digital governance, promises to facilitate large-scale collaboration by codifying and enforcing rules, decentralizing control, and ensuring verifiable data exchange, many blockchain-based interorganizational ecosystems nevertheless fail. Leveraging 155 interviews and detailed internal records from a large technology provider covering 81 interor-

ganizational blockchain projects across 25 industries, supplemented by archival evidence on the trajectories of 196 projects and 70 podcast interviews, we develop a grounded theory explaining how governance misalignments trigger collaboration breakdowns. Specifically, we identify three underlying governance tradeoffs that expose tensions between blockchain's network-centric rules and actor-centric needs: consistency Acknowledgments: We are grateful to Cuili Qian, our action editor, for her clear and constructive guidance throughout the review process. We also extend our appreciation to the three anonymous reviewers for their thoughtful and developmental feedback. Special thanks go to Curtis Goldsby for providing access to research materials and for his helpful comments on multiple drafts. This study would not have been possible without the support of our numerous interviewees, who generously shared their time and expertise. We are thankful to Fabrice Lumineau and Wenqian Wang for their friendly and valuable comments on an early version of the manuscript, and to Pedro de Faria and colleagues in the Innovation Management & Strategy department at the University of Groningen for their insightful discussions during our revisions. We acknowledge Franziska Neugebauer for fruitful exchanges and artistic support, and IBM Corporation, especially Filipe Campos Silva Teixeira, for enabling this practitioner-academic collaboration, particularly through Pim Roozen's internship and access to internal records and employees that formed the foundation of this project. Finally, we thank Mary Lacity for her early encouragement and enthusiasm, which inspired this work. Supplemental material for this article is available with the manuscript on the JOM website. Abstract / 摘要:

Given the recent evaluation and reduction of Diversity, Equity, and Inclusion (DEI) initiatives in response to stakeholder concerns, we consider the context of applicant reactions to Fair Chance Hiring policies used to support the hiring of a stigmatized population: individuals with a criminal history. We draw on stigma and stereotyping literatures to examine non-stigmatized (those without a criminal history) applicants' reactions to organizations' use of Fair Chance Hiring language in recruitment. Specifically, we suggest that these third-party applicants will assign negative stereotypes to organizations with Fair Chance Hiring initiatives, subsequently impacting their job pursuit intentions. We also draw upon the diversity policy rationale literature to explore the effectiveness of moral and business case justifications in reducing negative stereotypes and increasing job pursuit intentions. Additionally, we consider an identity-based individual difference that qualifies these relationships. Through a vignette experiment and two behavioral experimental simulations exploring both active and passive job seekers, our results show that companies with Fair Chance Hiring policies are assigned higher levels of negative stereotypes, and that these stereotypes result in lower job pursuit intentions. However, using moral case (but not business case) justifications reduces applicants' assignment of negative stereotypes to companies with these policies and improves applicants' job pursuit intentions. In Ac-

knowledgments: The authors would like to thank the action editor, Enrica N. Ruggs, and the two anonymous reviewers for their constructive feedback across the developmental stages of this manuscript. 鉴于近期为响应利益相关者的关切而对多样性、公平性和包容性（DEI）倡议进行的评估与缩减，我们探讨了求职者对旨在支持雇佣污名化群体（有犯罪记录者）的“公平机会雇佣”政策的反应背景。我们借鉴污名和刻板印象文献，考察了非污名化（无犯罪记录）求职者对组织在招聘中使用“公平机会雇佣”用语的反应。具体而言，我们认为这些第三方求职者会对采取“公平机会雇佣”倡议的组织产生负面刻板印象，进而影响其择业意愿。我们还借鉴多样性政策理由文献，探讨了道德案例与商业案例辩护在减少负面刻板印象和提高择业意愿方面的有效性。此外，我们考虑了一种调节这些关系的基于身份的个体差异。通过一项情境实验和两项针对主动和被动求职者的行为实验模拟，结果显示，采取“公平机会雇佣”政策的公司被赋予了更高水平的负面刻板印象，这些刻板印象导致了更低的择业意愿。然而，使用道德案例（而非商业案例）理由能减少求职者对采取这些政策的公司的负面刻板印象归因，并提升求职者的择业意愿。

- **理论:** 经典行为学派, 新行为学派, 元综合

Abstract / 摘要:

We identify a divide between two schools of thought in leadership behavior research. The classical behavioral school (CBS) categorizes leadership behaviors based on their latent functions and meanings—task, relations, change, and moral—with the aim of achieving intersubjective agreement among evaluators. In contrast, the neo-behavioral school (NBS) focuses on the observable forms and manifestations of behavior—choices, embodiment, interactions, textual markers, and temporal patterns—in the pursuit of objective description. In this article, we conduct a metasynthesis to systematically describe, evaluate, and integrate these two schools. We identify their distinct research logics, showing that CBS categories enable cross-contextual generalization but conflate behavioral description with evaluative judgment, thereby risking causal indeterminacy and limiting actionability. Conversely, NBS approaches enable causally well-determined analyses of what leaders concretely do but risk reductionism and limited generalizability of meaning when studied in isolation. Building on this analysis, we identify school-specific best practices and distinguish limitations that can be mitigated within each school from those that require cross-school integration. We then develop an integrative framework that assigns distinct causal roles to concrete behavioral manifestations and to evaluations of their function and meaning, explicating how leadership behaviors acquire meaning across contexts and how CBS evaluations emerge as downstream consequences of NBS-specified behavioral aspects and various contextual factors. Finally, we propose a generative research agenda that advances leadership behavior research across schools of thought. The framework also has practical implications, enabling behaviorally grounded leadership development through actionable feedback, as well as more equitable and evidence-based leadership selection anchored in observable behavior.

我们识别了领导行为研究中两个学派之间的分歧。经典行为学派（CBS）根据领导行为的潜在功能和意义（任务、关系、变革和道德）对其进行分类，旨在使评估者达成主体间的一致。相比之下，新行为学派（NBS）专注于行为的可观察形式和表现（选择、具身、互动、文本标记和时间模式），以追求客观描述。在本文中，我们进行了一项元综合，系统地描述、评估并整合这两个学派。我们识别了它们独特的研究逻辑，指出经典行为学派的分类支持跨情境的概括，但将行为描述与评估性判断混为一谈，从而面临因果不确定性的风险并限

制了可操作性。相反，新行为学派的方法能够对领导者的具体行为进行因果明确的分析，但当孤立研究时，存在还原论和意义概括性有限的风险。基于这一分析，我们识别了各学派特有的最佳实践，并区分了可以在各学派内部缓解的局限性与需要跨学派整合的局限性。随后，我们开发了一个整合框架，为具体的行为表现及其功能和意义的评估分配了不同的因果角色，阐明了领导行为如何在不同情境下获得意义。

Abstract / 摘要:

Exits are key events in the life cycles of entrepreneurial ventures. Venture exits have immense practical impacts on a variety of stakeholders, including founders, employees, organizations, resource providers, and broader ecosystems. As a result, the phenomenon of venture exits is of interest to a broad community of scholars across fields such as general management, entrepreneurship, finance and accounting, strategy, economics, organizational behavior, and psychology. We examine the multidisciplinary literature on venture exits, including initial public offerings, acquisitions, buy-outs, secondary sales, and related exit events, by analyzing 317 research articles published from 1991 to 2025. We integrate extant findings into a unified model describing the pre-exit, exit execution, and post-exit phases across multiple units of analysis: the individual, venture, resource provider, and environment. We identify common themes, predominant tensions, and important gaps, laying the foundation for a reinvigorated research agenda. Central to this agenda is embracing a process perspective that considers the fluidity of the actors, interests, and resources shaping venture exit decisions and outcomes. Grounded in our Acknowledgments: We gratefully thank our associate editor, Nadine Kammerlander, and the two anonymous reviewers for their thoughtful guidance and constructive feedback throughout the revision process. Supplemental material for this article is available with the manuscript on the JOM website. Corresponding author: Petrit Ademi, University of St. Gallen, Dufourstr. 40a, St. Gallen, 9000, Switzerland.

退出是创业企业生命周期中的关键事件。创业退出对包括创始人、员工、组织、资源提供者以及更广泛的生态系统在内的各种利益相关者具有巨大的实际影响。因此，创业退出现象吸引了来自通用管理、创业学、财务与会计、战略、经济学、组织行为学 and 心理学等多个领域学者的广泛关注。我们通过分析 1991 年至 2025 年间发表的 317 篇研究论文，考察了关于创业退出的跨学科文献，包括首次公开募股 (IPO)、收购、管理层收购、二级市场出售及相关的退出事件。我们将现有研究发现整合到一个统一的模型中，该模型描述了跨越多个分析层面（个人、企业、资源提供者和环境）的退出前、退出执行和退出后阶段。我们识别了共同的主题、主要的冲突点和重要的研究空白，为重振研究议程奠定了基础。该议程的核心是采用过程视角，考虑塑造创业退出决策和结果的角色、利益和资源的流动性。本研究旨在为该领域的未来发展提供理论基础。

Abstract / 摘要:

Control conditions are essential to establishing causal relationships in experimental management research, yet they receive little attention compared to treatments. This study thus examines the current state of control-condition selection and design in top-tier management journals, reviewing 958 experiments from 421 study papers published from 2021 to 2023. Our review shows that researchers use true and pseudo-control conditions. True control conditions—such as no-treatment, all-but-treatment, and treatment-as-usual controls—provide a baseline for interpreting the effect of the treatment condition. In contrast, pseudo-control conditions (e.g., opposite-treatment-level or alternative-treatment designs) allow relative comparisons across conditions without providing a baseline. Notably, 20% of the studies we examined presented causal claims that were not supported by their designs, opening the risk of their results being misinterpreted and their effect sizes being exaggerated. These issues were further exacerbated by a lack of method transparency and construct validity. In response, we offer guidelines not only for primary study researchers to support the selection and design of control conditions, thereby enhancing transparency and yielding valid interpretations of causal claims, but also for research synthesists, reviewers, and editors to evaluate the same. Keywords: research methods; experiments; research design; control conditions Acknowledgments: The authors would like to acknowledge the help of two research assistants, Alexa Claes and Vinda Mohamed, and the participants of the management research seminars at UCL (UK) and the University of Groningen (NL).
